of the 20th century that it is surprising we have addressed it so inadequately. We have not made much progress in learning how to cooperate with one another more effectively or how to conduct our conflicts more peacefully. Instead we have increased the lethality of our combat through revolutions in weapons technology and military training. The Encyclopedia of Violence, Peace and Conflict is designed to help us to take stock of our knowledge concerning these crucial phenomena. Ten years on, the need for an authoritative and cross disciplinary approach to the great issues of violence and peace seems greater than ever. More than 200 authoritative multidisciplinary articles in a 3 volume set. Many brand new articles alongside revised and updated content from the First Edition. Encyclopedia of Police Science Jack Raymond Greene, 2006-10-23. In 1996, Garland published the second edition of the Encyclopedia of Police Science, edited by the late William G. Bailey. The work covered all the major sectors of policing in the US. Since then, much research has been done on policing issues, and there have been significant changes in techniques and in the American police system. Technological advances have refined and generated methods of investigation. Political events such as the terrorist attacks of September 11, 2001, in the United States have created new policing needs while affecting public opinion about law enforcement. These developments appear in the third, expanded edition of the Encyclopedia of Police Science. 380 entries examine the theoretical and practical aspects of law enforcement, discussing past and present practices. The added coverage makes the Encyclopedia more comprehensive, with a greater focus on today's policing issues. Also added are themes such as accountability, the culture of police, and the legal framework that affects police decision. New topics discuss recent issues such as Internet and crime, international terrorism, airport safety, or racial profiling. Entries are contributed by scholars as well as experts working in police departments, crime labs, and various fields of policing.

Between 1945 and 1991, tension between the USA, its allies, and a group of nations led by the USSR dominated world politics.
