Handbook For Teaching Introductory Psychology With An Emphasis On Assessment:

Handbook for Teaching Introductory Psychology Richard A. Griggs, 2002 Handbook for Teaching Introductory Psychology, 2001 **Teaching Psychology** Sandra Goss Lucas, Sandra Goss-Lucas, Douglas A. Bernstein, 2004-12-13 Most new psychology instructors enter their first undergraduate classrooms with little or no formal preparation for their role as a teacher. The goal of this book is to review the body of teaching research that is available as well as some of the well accepted lore so as to make the first foray into teaching psychology a positive experience. Teaching Psychology outlines the major problems and issues confronting psychology teachers. It presents an overview of the nuts and bolts of teaching psychology including dealing with troubled and troubling students, choosing and using technology, developing evaluation instruments, and selecting methods for self evaluation. Written by two award winning psychology professors with over 50 years of combined teaching experience, the book offers a wide range of down to earth suggestions and immediately usable materials intended to help psychology teachers teach better and help students learn more. The chapters are organized to roughly parallel the sequence of tasks that new psychology teachers face, beginning with goal setting and ending with evaluation of one's teaching. Each chapter is chockfull of helpful tools including checklists, sample lecture notes, writing assignments, and grading criteria. To make it easier to customize this material, these tools are available on an accompanying CD along with a rating sheet for choosing a textbook, a student grade record sheet, a sample statement on academic integrity, and a pool of less than perfect test items to hone item writing skills. This book offers guidelines for teaching such as setting goals in line with 10 basic principles of effective teaching, planning the basics including choosing a text, writing a syllabus, and creating a grading system, setting a positive tone in the classroom, providing tips on asking and answering questions, promoting critical thinking, and evaluating student performance. Intended for psychology graduate students who are learning to teach, faculty who train psychology instructors, and new psychology faculty at institutions ranging from high schools to universities as well as experienced faculty wishing to hone their teaching skills.

Handbook for Teaching Introductory Psychology Michelle Rae Hebl, Charles L. Brewer, Ludy T. Benjamin, Jr., 2001-08-01 Like its predecessors, Volume III of the Handbook for Teaching Introductory Psychology provides introductory psychology instructors with teaching ideas and activities that can immediately be put into practice in the classroom. It contains an organized collection of articles from Teaching of Psychology TOP, the official journal of the Society for the Teaching of Psychology, Division 2 of the American Psychological Association. Volume III contains 89 articles from TOP that have not been included in other volumes. Another distinction between this volume and its predecessors is its emphasis on testing and assessment. The book is divided into two sections. Section One, Issues and Approaches in Teaching Introductory Psychology, contains 52 articles on critical issues such as how to approach the course, understanding students' interests, perceptions, and motives, students' existing knowledge of psychology, including their misconceptions, a comparison of introductory textbooks, and tips on how to evaluate them, test questions, and student factors.

affecting exam performance an overview of different forms of feedback giving extra credit and how to deal with academic dishonesty Section Two consists of 37 articles that present demonstrations class and laboratory projects and other techniques to enhance teaching and learning in both the introductory as well as advanced courses in the discipline This section is organized so as to parallel the order of topics found in most introductory psychology textbooks Intended for academicians who teach the introductory psychology course and or oversee grad assistants who teach the course all royalties of the book go directly to the Society for the Teaching of Psychology to promote its activities to further improve the teaching of psychology

A Guide to Teaching Introductory Psychology Sandra Goss Lucas,2009-01-22 A Guide to Teaching Introductory Psychology focuses on the critical aspects of teaching introductory psychology to undergraduate students It includes ideas tips and strategies for effectively teaching this course and provides useful answers to commonly asked questions A concise and accessible guide to teaching introductory courses in Psychology Begins with an orienting history of the course Evaluates current trends in teaching and offers suggestions for developing personal techniques Addresses a number of relevant issues including how to teach difficult topics linking course content to everyday experience developing and using class presentations lectures and active learning ideas and increasing interest in course topics Supported by a website that provides links to useful websites and handouts that instructors can use in their classes <http://www.blackwellpublishing.com/teachpsychscience/lucas>
