**CRC Handbook of Agricultural Productivity** Miloslav Rechcigl, 1982 The greatest challenge of our time is to produce sufficient food to keep pace with the rapidly growing population In the opinion of experts during the next 25 years there will be a need for as much food as was produced in the entire history of mankind to date Of the various measures available improvement in agricultural productivity is judged as the ultimate means of augmenting food production and supplies In this Handbook an international team of experts consider the most important factors affecting production of both crops and livestock This Handbook is intended as a scientific guide to practitioners and students as well as to researchers who should find here stimulating ideas for further exploration Provided by publisher

**Handbook of Agricultural Productivity** Miloslav Rechcigl, 2018-01-18 The greatest challenge of our time is to produce sufficient food to keep pace with the rapidly growing population In the opinion of experts during the next 25 years there will be a need for as much food as was produced in the entire history of mankind to date Of the various measures available improvement in agricultural productivity is judged as the ultimate means of augmenting food production and supplies In this Handbook an international team of experts consider the most important factors affecting production of both crops and livestock This Handbook is intended as a scientific guide to practitioners and students as well as to researchers who should find here stimulating ideas for further exploration

*Handbook of Naturally Occurring Food Toxicants* Miloslav Rechcigl, 2018-02-01 In the last decade an increased concern has been voiced against various environmental hazards particularly chemicals that may cause harm to humans or animals Numerous studies which have dealt with this subject invariably have focused on chemical contaminants of some component of a food chain In contrast much less attention has been paid to the potentially harmful substances that may occur in foodstuffs naturally The purpose of this Handbook is to sensitize the reader to this problem and to provide a systematic overview of the most important naturally occurring food toxicants The Handbook should be of interest to anybody who is concerned with nutritive and health aspects of food Inasmuch as many of the discussed toxicants can be removed or destroyed by a suitable method of food processing it should be of special value to food technologists

**Handbook of Nutritional Supplements** Miloslav Rechcigl, 2018-01-18 The Handbook is composed of two parts the first volume covering supplements for human use while the second volume is devoted to agriculture supplements This volume relating to food supplements for human use is organized on the basis of raw materials utilized in their production as well as on the basis of target groups for which they are intended

**Handbook of Nutritional Requirements in a Functional Context** Miloslav Rechcigl, 2018-01-18 The purpose of this Handbook is to bring together all the available information on the nutritional requirements of animal organisms for specific processes and functions This is believed to be the first systematic treatment of nutrition in a functional context Apart from furnishing specific nutritional data this Handbook provides a useful framework for a comparative physiologist or biochemist searching for commonality or differences among various biological systems

**CRC Handbook of Foodborne Diseases of Biological Origin** Miloslav Rechcigl, Jr., 2020-06-29 First published in 1983 This handbook provides an overview of different biological agents and important toxins that may cause diseases on ingestion with food or water

**Handbook of Nutritive Value of Processed Food** Miloslav Rechcigl, 2019-07-16 First published in 1982 This publication should be an invaluable tool to food technologists dieticians and nutritionalists as well as to livestock producers and persons engaged in production processing and formulation of animal feeds

**Environmental Stress and Amelioration in Livestock Production** Veerasamy Sejian, S.M.K. Naqvi, Thaddeus Ezeji, Jeffrey Lakritz, Rattan Lal, 2012-06-05 Given the importance of livestock to the global economy there is a substantial need for world class reference material on the sustainable management of livestock in diverse eco regions With uncertain climates involving unpredictable extreme events e g heat drought infectious disease environmental stresses are becoming the most crucial factors affecting livestock productivity By systematically and comprehensively addressing all aspects of environmental stresses and livestock productivity this volume is a useful tool for understanding the various intricacies of stress physiology With information and case studies collected and analyzed by professionals working in diversified ecological zones this book explores the influence of the environment on livestock production across global biomes The challenges the livestock industry faces in maintaining the delicate balance between animal welfare and production are also highlighted

**Environmental Physiology of Livestock** R. J. Collier, J. L. Collier, 2012-02-07 Environmental stress is one of the most significant factors affecting livestock performance and health and it is only expected to increase with effects of global warming Environmental Physiology of Livestock brings together the latest research on environmental physiology summarizing progress in the field and providing directions for future research Recent developments in estimating heat stress loads are discussed as well as key studies in metabolism reproduction and genetic expressions Environmental Physiology of Livestock begins with a survey of current heat indexing tools highlighting recent discoveries in animal physiology changes in productivity levels and new technologies available to better estimate stress response Using this synopsis as a point of orientation later chapters hone in on major effects of heat stress including changing metabolic pathways and nutrient requirements endocrine regulation of acclimation to environmental stress and reduced reproductive performance The text concludes with a thorough discussion of environmental effects on gene expressions providing important insight for future breeding practices Environmental Physiology of Livestock is a globally contributed volume and a key resource for animal science researchers geneticists and breeders
