Students, 1906 *A handbook of anatomy for art students* Arthur Thomson, 1964 [A Handbook of Anatomy for Art Students](#) Arthur Thomson, 1896 **A Handbook of Anatomy for Art Students (Classic Reprint)** Arthur Thomson, 2018-02-11

Excerpt from *A Handbook of Anatomy for Art Students* In place of adopting as is usual the method of furnishing a complete description of the bones succeeded by an equally detailed account of the joints and muscles I have incorporated them in the description of regions As each region a limb for instance is considered its bones joints and muscles are described in so far as they have special reference to the moulding of the surface forms In this way it is hoped that the student may attain a better grasp of the subject than by the study of isolated descriptions of the various structures involved About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works **"A" Handbook of Anatomy for Art Students** Arthur Thomson, 1964 **A Handbook of Anatomy for Art Students** Arthur Thomson, 2024-02-18

The experience which I have had as a teacher and my acquaintance and sympathy with the requirements of students of Art have led me to the conclusion that hitherto too much stress has been laid on the nomenclature and technical details of Human Anatomy and too little emphasis placed on the relation of these details to the surface forms What the student requires is not a minute description of every bone muscle and joint but only such an account as will enable him to appreciate their influence on the modelling of the figure Names convey little to his mind forms alone interest him In the following pages which are based on the lectures which I have had the honour of giving at the Royal College of Art South Kensington I have endeavoured to carry out as far as possible these principles With this intention every effort has been made to avoid unnecessary detail and to rid the text as far as possible of technicalities Where there are English equivalents for the scientific terms more commonly employed they have been made use of but unfortunately their number is limited and the student is left with no other alternative than to accept the scientific nomenclature In place of adopting as is usual the method of furnishing a complete description of the bones succeeded by an equally detailed account of the joints and muscles I have incorporated them in the description of regions
