Bislama Reference Grammar Terry

Crowley,2004-05-31 Bislama is the national language of Vanuatu the world s most linguistically diverse nation with at least 80 actively spoken Oceanic languages used by about 200 000 people Bislama began as a plantation pidgin based on English in the nineteenth century but it has since developed into a unique language with a grammar and vocabulary very different from English It is one of very few national languages for which there is no readily available reference grammar This book aims to fill this gap by providing an extensive account of the grammar of Bislama as it is used by ordinary Ni Vanuatu It does not therefore aim to describe any kind of artificial written norm but sets out to capture a range of different kinds of ways that Ni Vanuatu will say things in various contexts both written and spoken formal and informal The thrust of this volume is to show that Bislama has a grammar an unfamiliar concept for those educated in Vanuatu It also shows that Bislama is a language of considerable complexity which will come as a surprise to many of its users who have been taught to view their language as somehow simple and even deficient

Language Planning and Education in Australasia and the South Pacific Richard B. Baldauf,Allan Luke,1990 Includes papers on Aboriginal language planning Aboriginal bilingual education and language and education in the Torres Strait separately annotated

A Bibliography of Writings on Varieties of English, 1965-1983 ,1984-01-01 After the growth of English and American dialectology since the 1930 s and the expansion of sociolinguistics since the 1960 s the study of world English has emerged in recent years to join these other disciplines This bibliography is intended to reflect what has been achieved in this area and to serve as an indispensable research tool for further investigations The bibliography is divided into three parts each one is preceded by a preface which explains the procedures followed and each of the sections is followed by an index It classifies the items according to specific areas ethnic groups or similar topics

The Linguistics of Sitting, Standing and Lying John Newman,2002-09-24 This volume explores properties of sit stand and lie verbs reflecting three of the most salient postures associated with humans An introductory chapter by the Editor provides an overview of directions for research into posture verbs These directions are then explored in detail in a number of languages Dutch Korean Japanese Lao Chantyal Magar Tibeto Burman Chipewyan Athapaskan Trumai spoken in Brazil Kxoe Khoisan Mbay Nilo Saharan Oceanic Enga Ku Waru Papuan Arrernte Pitjantjatjara Ngan gityemerri Australian The contributors discuss data relevant to many fields of linguistic inquiry including patterns of lexicalization e g simplex or complex verb forms morphology e g state vs action formations grammaticalization e g extension to locational predicates aspect markers auxiliaries copulas classifiers and figurative extension A final chapter reports on an experimental methodology designed to establish the relevant cognitive parameters underlying speakers judgements on the polysemy of English stand Taken together the chapters provide a wealth of cross linguistic data on posture verbs

Melanesian Pidgin and Tok Pisin John W.M. Verhaar, S.J.,1990-01-01 The First International Conference on Pidgins and

Creoles in Melanesia was planned mainly for Tok Pisin but no predetermined theme s had been proposed to the participants Nevertheless in this collection of papers several principal themes stand out One is that of a revived interest in substratology both for Tok Pisin and for Bislama Another is what in fact amounts to a change in perspective from universalism as supposedly competitive with the substratological orientation towards a generalist approach to typology which reduces the apparent polarity from a theoretical point of view A third is the pervasive interest of contributors in wider language issues in the social and political life of Papua New Guinea These interests go back to the linguistic and social experience of the participants most of whom have a long record of living among the people whose languages they have studied on a day to day basis and to the relative remoteness of their inspiration from the more theoretical and perhaps ultimately untestable issues which surround the universalist approach and its claims for a bioprogram foundation for language

New Guinea and Neighboring Areas Stephen A. Wurm, 2019-11-18 No detailed description available for New Guinea and Neighboring Areas

The Genesis of Grammar Bernd Heine, Tania Kuteva, 2007-10-04 This book reconstructs what the earliest grammars might have been and shows how they could have led to the languages of modern humankind It considers whether these languages derive from a single ancestral language what the structure of language was when it first evolved and how the properties associated with modern human languages first arose

A New Bislama Dictionary Terry Crowley, 2003 A new Bislama dictionary is a substantially updated version of the first edition which reflects the ever changing vocabulary of Bislama the national language of Vanuatu Back cover
