Computational Quantum Chemistry Charles M. Quinn, 2002-02-28 Computational Quantum Chemistry removes much of the mystery of modern computer programs for molecular orbital calculations by showing how to develop Excel spreadsheets to perform model calculations and investigate the properties of basis sets Using the book together with the CD ROM provides a unique interactive learning tool In addition because of the integration of theory with working examples on the CD ROM the reader can apply advanced features available in the spreadsheet to other applications in chemistry physics and a variety of disciplines that require the solution of differential equations This book and CD ROM makes a valuable companion for instructors course designers and students It is suitable for direct applications in practical courses in theoretical chemistry and atomic physics as well as for teaching advanced features of Excel in IT courses *Handbook of Relativistic Quantum Chemistry* Wenjian Liu, 2016-02-08 This handbook covers new methodological developments and applications of relativistic quantum chemistry It also pays attention to the foundation of relativistic quantum mechanics and addresses a number of fundamental issues that have not been covered by any book For instance what is the appropriate relativistic many electron Hamiltonian How to do relativistic explicit local correlation How to formulate relativistic properties How to combine double group and time reversal symmetries How to do QED calculations for molecules Just to name a few This book aims to establish the big picture of relativistic molecular quantum mechanics ranging from pedagogic introduction for uninitiated readers advanced methodologies and efficient algorithms for experts to possible future perspectives such that the reader knows when how to apply develop the methodologies This self contained two volume book can be regarded as a supplement to the three volume Handbook of Computational Chemistry which contains no relativity at all It is to be composed of 6 sections with different chapters will be further expanded each of which is to be written by the most active experts who will be invited upon
