theoretical perspective the moral polity thesis Lluch argues persuasively that disengagement between the central state and substate nationalists can lead to the adoption of more prosovereignty constitutional orientations Because many substate nationalists perceive that the central state is not capable of accommodating or sustaining a plural constitutional vision their radicalization is animated by a moral sense of nonreciprocity Mapping the complex range of political orientations within substate national movements Visions of Sovereignty illuminates the political and constitutional dynamics of accommodating national diversity in multinational democracies This elegantly written and meticulously researched study is essential for **Annual Report** Australia. Williams, 2021-12-16 In all but the rarest circumstances the world's deadly conflicts are ended not through outright victory but through a series of negotiations Not all of these negotiations however yield a durable peace To successfully mitigate conflict drivers the parties in conflict must address a number of puzzles such as whether and how to share and or re establish a state s monopoly of force reallocate the ownership and management of natural resources modify the state structure or provide for a path toward external self determination Successfully resolving these puzzles requires the parties to navigate a number of conundrums and make choices and design mechanisms that are appropriate to the particular context of the conflict and which are most likely to lead to a durable peace Lawyering Peace aims to help future negotiators build better and more durable peace agreements
