Understanding Management in China Malcolm Warner, 2013-11-12 China has become one of the fastest growing economies ever seen in the world in recent times In the last three decades China has transformed itself from a command economy to a market one albeit a nominally socialist one and its management systems have been reformed accordingly In the light of these changes Malcolm Warner one of the leading authorities on management in China explores the past present and future of Chinese management The first part of the work examines the history of management practices in the Middle Kingdom outlining the influence of traditional Chinese values especially the Confucian inheritance and the legacy of the imperial bureaucracy with its meritocratic examination system as well as the role of industrialization and the influx of foreign owned businesses in the late nineteenth century and the twentieth century It next goes on to consider the current state of China s management showing how a new breed of manager has evolved since the beginning of Deng Xiaoping s reforms in the late 1970s and 1980s The resulting impact of this strategy which has continued into the 1990s and the 2000s up to the present day is then examined The final part of the book concludes with reflections on how management in China is likely to develop in the near future especially on how far it will converge with global practices or to what degree an indigenous form of management with Chinese characteristics will prevail

Euro-Asian Management and Business I Brij N. Kumar, 2013-06-29 impact in terms of new opportunity and risk In Japan new markets can be in the offering as a result of expected deregulation But on the other hand greater competition in the home countries can become a threat when a host of new fast growing Japanese companies appear on the scene as they break out of oversized and inflexible corporate groups and seek their fortune independently on global markets Six years after Tiananmen China stands today as one of the worlds leading growth nations Because of this and only for this reason it is recognized and to a certain extent even respected by all countries as a partner in commerce and industry Trade ties with the

western world are stronger than ever before Japanese trade with China has been booming since 1989 peaking at roughly U S 38 billion in 1993 U S China trade has almost tripled since 1988 to 41 billion in 1993 A similar pattern is seen in China s trade with West Europe which according to Chinese figures amounted to U S 22 billion in 1993 which was 50% above the volume reached in 1992 Although in China actual investment can be way below approved investment the fact remains that some U S 20 billion have been poured into the country since 1991 and another 12 billion were absorbed in 1992
