Credential Market Quentin Maire, 2021-09-22 This book makes an original contribution to credential sociology by analysing how high school certificates become and remain valuable in a context of mass high school participation i.e credentialism Building on a detailed analysis of the International Baccalaureate IB Diploma a senior secondary school certificate offered in over 150 countries Quentin Maire argues that the advent of new private credentials can be understood as a phenomenon of credential stratification in a context of intensified academic competition Using original data on high school credentials in Australia and internationally the author makes a strong case for certificates to be studied relationally by locating them in the credentialing structures in which they are inserted He systematically applies the comparative method to explain the role of the curriculum family resources school segregation and higher

education selection in creating a credential hierarchy His robust combination of theoretical construction and detailed empirical work allows him to offer new insights into social inequality in education systems credential theory and the IB Diploma

The Informal Economy Ioana Horodnic, Peter Rodgers, Colin Williams, Legha Momtazian, 2017-09-22 During much of the twentieth century informal employment and entrepreneurship was commonly depicted as a residue from a previous era Its continuing presence was seen to be a sign of backwardness whilst the formal economy represented progress In recent decades however numerous studies have revealed not only that informal employment is extensive and persistent but also that it is growing relative to formal employment in many populations Whilst in the developing world the informal economy is often found to be the mainstream economy nevertheless in the developed world too informality is currently still estimated to account for notable per cent of GDP The Informal Economy Exploring Drivers and Practices intends to engage with these issues providing a much need contextualised approach to explain the persistence and growth of forms of informal economic practices and entrepreneurial activities in the twenty first century Using a diverse range of empirical case studies from Europe Africa North Africa and Asia this book unpacks the different varieties of forms of informal work and entrepreneurship and provides a critical analysis of existing theorisations used to explain such phenomena This book s aim is to examine the nature and persistence of informal work and entrepreneurship across a variety of empirical settings from within the developed world the developing world and within transformation economies within post socialist spaces Given its worldwide interdisciplinary and multidisciplinary approach and recent interest in the informal economies by a number of disciplines and organisations this book will be of vital reading to those operating in the fields of Economics political economy and management Human and economic geography and Economic anthropology and sociology as well as development studies

Handbook on Global Value Chains Stefano Ponte, 2019 Global value chains GVCs are a key feature of the global economy in the 21st century They show how international investment and trade create cross border production networks that link countries firms and workers around the globe This Handbook describes how GVCs arise and vary across industries and countries and how they have evolved over time in response to economic and political forces With chapters written by leading

interdisciplinary scholars the Handbook unpacks the key concepts of GVC governance and upgrading and explores policy implications for advanced and developing economies alike

The Political Economy Reader Naazneen H. Barma, Steven K. Vogel, 2021-08-29 The Political Economy Reader advocates a particular approach to the study of political economy the market institutional perspective which emphasizes the ways in which markets are embedded in political and social institutions This perspective offers a compelling alternative to the market liberal view which advocates freer markets and less government intervention in the economy as if states and markets were naturally at odds with each other The reader embraces a truly interdisciplinary approach to the study of political economy with extensive coverage from sociology economics history and political science It includes some of the most important classical and contemporary theoretical perspectives on political economy And it engages some of the most topical debates in political economy today such as climate change the global financial crisis inequality the digital platform economy and the COVID 19 pandemic For political economy courses at a variety of levels and from a range of disciplines the reader is also of interest to scholars and citizens wanting perspective on the intersection of economics politics and society New to the Second Edition More than 20 new readings included by such notables as Elinor Ostrom E J Hobsbawm Dani Rodrik Amartya Sen Thomas Piketty and Mariana Mazzucato among many others Fully updated introductions to the book and each thematic chapter of readings Coverage of key emerging debates including climate change the financial crisis inequality the digital platform economy and COVID 19

Global Rivalries Amy A. Quark, 2013-08-05 As the economies of China India and other Asian nations continue to grow these countries are seeking greater control over the rules that govern international trade Setting the rules carries with it the power to establish advantage so it is no surprise that everyone wants a seat at the table or that negotiations over rules often result in stalemates at meeting of the World Trade Organization Nowhere is the conflict over rule setting more evident than in the simmering standards wars over the rules that define quality and enable the adjudication of disputes In *Global Rivalries* Amy A Quark explores the questions of how rules are made who makes them and how they are enforced using the lens of cotton a simple commodity that has become a poignant symbol of both the crisis of Western rule making power and the potential for powerful new rivals to supplant it Quark traces the strategies for influencing rule making processes employed not only by national governments but also by transnational corporations fiber scientists and trade associations from around the globe Quark analyzes the efficacy of their approaches and the implications for more marginal actors in the cotton trade including producers in West Africa By placing the current contest within the historical development of the global capitalist system *Global Rivalries* highlights a fascinating interaction of politics and economics

Markets William A. Jackson, 2019-04-18 Defining markets has never been an easy task Despite their importance for economic theory and practice they are hard to pin down as a concept and economists have tended to adopt simplified axiomatic models or rely on piecemeal case studies This book argues that an extended range of theory social as

well as economic can provide a better foundation for the portrayal of markets The book first looks at the definition of markets their inadequate treatment in orthodox economic theory and their historical background in the pre capitalist and capitalist eras It then assesses various alternatives to orthodox theory categorised as social cultural structural functional and ethical approaches Among the alternatives considered are institutionalist accounts Marxian views network models performativity arguments field theories Austrian views and ethical notions of fair trade A key finding of the book is that these diverse approaches valuable as they are could present a more effective challenge to orthodoxy if they were less disparate Possibilities are investigated for a more unified theoretical alternative to orthodoxy Unlike most studies of markets this book adopts a fully interdisciplinary viewpoint expressed in accessible non technical language Ideas are brought together from heterodox economics social theory critical realism as well as other social sciences such as sociology anthropology and geography Anybody seeking a broad critical survey of the theoretical analysis of markets will find this book useful and it will be of great interest to economists social scientists students and policy makers

Contested Powers John-Andrew McNeish, Axel Borchgrevink, Owen Logan, 2015-06-11 In the global North the commoditization of creativity and knowledge under the banner of a creative economy is being posed as the post industrial answer to dependency on labour and natural resources Not only does it promise a more stable and sustainable future but an economy focused on intellectual property is more environmentally friendly so it is suggested Contested Powers argues that the fixes being offered by this model are bluffs development as witnessed in Latin American energy politics and governance remains hindered by a global division of labour and nature that puts the capacity for technological advancement in private hands The authors call for a multi layered understanding of sovereignty arguing that it holds the key to undermining rigid accounts of the relationship between carbon and democracy energy and development and energy and political expression Furthermore a critical focus on energy politics is crucial to wider debates on development and sustainability Contested Powers is essential reading for those wondering how energy resources are converted into political power and why we still value the energy we take from our surroundings more than the means of its extraction

Corruption, Informality and Entrepreneurship in Romania Roxana Bratu, 2017-12-27 This book examines the meaning structure practices and symbolism of corruption in relationship to European Union structural funding in Romania It offers a unique account of the complex transformations faced by post communist societies Despite the new legislation that effectively re branded typical economic practices in Romanian society as corruption entrepreneurs continue to use them in everyday interactions The entrepreneurial culture described in the chapters is an ordinary trait of the local work routines Rather than pursuing the singular logic of corruption the author explores the concept of informality by focusing on the socio historical context and the meanings embedded in the society that provides solutions to the problems The book will appeal to students scholars and practitioners in the areas of corruption public policy and EU policy and politics

From Communists to Foreign Capitalists Nina Bandelj, 2011-10-16 From

Communists to Foreign Capitalists explores the intersections of two momentous changes in the late twentieth century the fall of Communism and the rise of globalization Delving into the economic change that accompanied these shifts in central and Eastern Europe Nina Bandelj presents a pioneering sociological treatment of the process of foreign direct investment FDI She demonstrates how both investors and hosts rely on social networks institutions politics and cultural understandings to make decisions about investment employing practical rather than rational economic strategies to deal with the true uncertainty that plagues the postsocialist environment The book explores how eleven postsocialist countries address the very idea of FDI as an integral part of their market transition The inflows of foreign capital after the collapse of Communism resulted not from the withdrawal of states from the economy as is commonly expected but rather from the active involvement of postsocialist states in institutionalizing and legitimizing FDI Using a wide array of data sources and combining a macro level account of national variation in the liberalization to foreign capital with a micro level account of FDI transactions in the decade following the collapse of Communism in 1989 the book reveals how social forces not only constrain economic transformations but also make them possible From Communists to Foreign Capitalists is a welcome addition to the growing literature on the social processes that shape economic life
