Handbook of Japan-United States Environment-Behavior Research Jack Demick, T. Takahashi, Seymour Wapner, C. Takiji Yamamoto, 2013-11-11 This volume is an outgrowth of research on the relations between human beings and their environments which has developed internationally This development is evident in environment behavior research studies conducted in countries other than the United States See Stokols and Altman 1987 for examples of such work in Australia Japan France Germany the Netherlands Sweden the United Kingdom the former Soviet Union and Latin and North America The international development of this research area is also evident in the establishment of professional organizations in different countries such as the Environment Behavior Design

Research Association EDRA in the United States the Man Environment Research Association MERA in Japan the International Association for People Environment Studies IAPS in Great Britain and the People and Physical Environment Research Association PAPER in Australia This volume focuses on environment behavior research within Japan and the United States as well as cross cultural studies involving both countries As we note in detail in Chapter 1 the conference on which the work presented herein is based was preceded by three Japan United States conferences on environment behavior research the first of which took place in Tokyo in 1980 As currently conceived the present volume stands alone as a compendium of a Significant proportion of cross cultural research on environment behavior relations in Japan and the United States that has been developing over the last 15 years As such we envision the volume as a basic interdisciplinary reference for anthropologists architects psychologists Sociologists urban planners and environmental geographers

Environmental Psychology Mirilia Bonnes, Gianfranco Secchiaroli, 1995-08-11 This textbook provides a clear and comprehensive introduction to the rapidly expanding field of environmental psychology The authors start with a review of the history of environmental psychology highlighting its interdisciplinary nature They trace its roots in architecture ecology and geography and examine the continuing relationship of these subjects to the psychological tradition The book then moves through key contemporary lines of research in the field contrasting models from perception and cognition such as those of Gibson and Brunswick with major social psychological approaches as represented by Lewin Barker and others The book concludes with an analysis of the most promising areas of research and practice

Person-Environment Psychology W. Bruce Walsh, Kenneth H. Craik, Richard H. Price, 2000-05 A variety of theoretical approaches to person environment psychology has been developed over the years representing a rich range of intellectual perspectives This second edition links the past and present and looks toward the future in reviewing new directions and perspectives in person environment psychology Stated differently the main thrust of this volume is to present contemporary models and perspectives that make some sensible predictions concerning the individual and the environment using the person environment relationship Within a person environment framework these models and perspectives are concerned with how people tend to influence environments and how environments reciprocally tend to influence people Thus this second edition presents new directions in person environment psychology and the implications for theory research and application
