Handbook Of Hiv Prevention:

Handbook of HIV Prevention John L. Peterson, Ralph J. DiClemente, 2012-12-06 In the nearly two decades since the HIV pandemic began the rapid expansion of behavioral research on HIV prevention has prompted a crucial need for a sourcebook more advanced than an introductory textbook and broader and more readily accessible than a review periodical The Handbook of HIV Prevention is intended as the first attempt to meet this need The current state of affairs led us to edit a book that would represent the major areas of HIV behavioral research at a level appropriate for graduate students and experienced researchers in public health medicine nursing education and the social and behavioral sciences In addition we expect that the handbook will be useful in advanced undergraduate courses and as a reference book for health care professionals Our plans to assemble the Handbook began in the fall of 1996 when we prepared a tentative outline of chapters and invited a large number of distinguished researchers in the field to be the authors of various chapters We received an overwhelmingly favorable response from potential authors to our letters of invitation After considerable effort by both the contributors and the editors the volume was completed in 1999 when all chapters went to press **Handbook of HIV**

Prevention John L. Peterson, Ralph J. DiClemente, 2000-02-29 The Handbook of HIV Prevention is intended to provide a comprehensive overview of the theories methods and approaches for reducing HIV associated risk behaviors It represents the first single source of information about HIV prevention research in developed and developing countries The Handbook addresses the subject of HIV prevention from two interrelated perspectives First it presents the seminal theories currently used to guide the development and implementation of HIV prevention interventions Second it describes prevention approaches for diverse populations at risk of HIV infection This Handbook provides a compilation of knowledge on HIV prevention by the leading authorities in the field and will be an important resource for students researchers and clinicians in the field **Handbook of Economic Evaluation of HIV Prevention Programs** David R. Holtgrave, 2013-06-29 If

resources for HIV prevention efforts were truly unlimited then this book would be entirely unnecessary In a world with limitless support for HIV prevention activities one would simply implement all effective or potentially effective programs without regard to expense We would do everything useful to prevent the further spread of the virus that has already claimed hundreds of thousands of lives in the United States and millions of lives worldwide Unfortunately funding for HIV prevention programs is limited Even though the amount of available funding may seem quite large especially in the United States it is still fixed and not sufficient to meet all needs for such programs This was very well illustrated in the summer of 1997 when over 500 community based organizations applied for a combined total of 18 million of HIV prevention funding from the U S Centers for Disease Control and Prevention CDC Less than one fifth of these organizations received support via this funding mechanism Hence although 18 million may seem like a large amount of money at first blush it is not enough to meet all of the prevention needs that could be addressed by these community based organizations Power in the Blood William N.

Elwood,1998-11-01 In this single volume William N Elwood has gathered potent evidence of the impact that the HIV AIDS epidemic has had on the world its communities and its inhabitants and he addresses the role of communication in affecting the way in which people respond to AIDS With a multidisciplinary group of contributors and topics ranging from political rhetoric to interpersonal discourse *Power in the Blood* offers a multitude of ways in which to think about power politics HIV prevention and people living with HIV Readers will be able to use this information in class discussions program designs grant applications and research as well as in their own lives With this volume Elwood makes a thoroughly convincing argument that communication is the key to understanding treating and preventing AIDS and he inspires further action toward the goal of ending the AIDS crisis Encyclopedia of Primary Prevention and Health Promotion Thomas P. Gullotta,Martin Bloom,2003-01-31 Foundational topics such as history ethics and principles of primary prevention as well as specific issues such as consultation political issues and financing The second section addresses such topics as abuse depression eating disorders HIV AIDS injuries and religion and spirituality often dividing such topics into separate entries addressing childhood adolescence and adulthood **Handbook of Sexuality-Related Measures** Clive M. Davis,1998 Fundamental to understanding human sexual expression is reliable and valid measurement and assessment Many instruments have been developed to measure a myriad of sexuality related states traits behaviours and outcomes Few are easily accessible and the information is often limited concerning appropriate use and psychometric properties To counter these problems the *Handbook of Sexuality Related Measures* reproduces more than 200 instruments accompanied by essential information for their use in research educational and clinical settings Each chapter describes the development and appropriate use of each instrument Reliability and validity data are summarized and referenced **Handbook for HIV prevention** Academy for Educational Development,1994 **Handbook of Economic Evaluation of HIV Prevention Programs** David R. Holtgrave,1998-10-31 If resources for HIV prevention efforts were truly unlimited then this book would be entirely unnecessary In a world with limitless support for HIV prevention activities one would simply implement all effective or potentially effective programs without regard to expense We would do everything useful to prevent the further spread of the virus that has already claimed hundreds of thousands of lives in the United States and millions of lives worldwide Unfortunately funding for HIV prevention programs is limited Even though the amount of available funding may seem quite large especially in the United States it is still fixed and not sufficient to meet all needs for such programs This was very well illustrated in the summer of 1997 when over 500 community based organizations applied for a combined total of 18 million of HIV prevention funding from the U S Centers for Disease Control and Prevention CDC Less than one fifth of these organizations received support via this funding mechanism Hence although 18 million may seem like a large amount of money at first blush it is not enough to meet all of the prevention needs that could be addressed by these community based organizations **HIV/AIDS Prevention** ,1993 *HIV Prevention Planning Group Handbook* New York (N.Y.).
