**Toward Effective Counseling and Psychotherapy** Robert Carkhuff, 2017-09-29. The field of counseling and psychotherapy has for years presented the puzzling spectacle of unabating enthusiasm for forms of treatment whose effectiveness cannot be objectively demonstrated. With few exceptions, statistical studies have consistently failed to show that any form of psychotherapy is followed by significantly more improvement than would be caused by the mere passage of an equivalent period of time. Despite this, practitioners of various psychotherapeutic schools have remained firmly convinced that their methods are effective. Many recipients of these forms of treatment also believe that they are being helped. The series of investigations reported in this impressive book resolve this paradoxical state of affairs. The investigators have overcome two major obstacles to progress in the past: lack of agreement on measures of improvement and difficulty of measuring active ingredients of the psychotherapy relationship. The inability of therapists of

different theoretical persuasions to agree on criteria of improvement has made comparison of the results of different forms of treatment nearly impossible. The authors have solved this intractable problem by using a wide range of improvement measures and showing that regardless of measures used in different studies a significantly higher proportion of results favor their hypothesis than disregard it. Overall this book represented a major advance at the time of its original publication and is of continuing importance. The research findings resolve some of the most stubborn research problems in psychotherapy and the training program based on them points the way toward overcoming the shortage of psychotherapists. *College Student Mental Health Counseling* Suzanne Degges-White, Christine Borzumato-Gainey, 2013-09-27 Print CourseSmart [Clinical Counselling in Further and Higher Education](#) Alison Vaspe Nfaa, John Lees, Alison Vaspe, 2016-02-04 In *Clinical Counselling in Further and Higher Education* a range of well known contributors show how this potential conflict can be used to the advantage of the counsellor. Clinical counselling in further and higher education is unique in that the counsellors work is in most cases to assist the primary educational task rather than be an end in itself. Yet little has been written about the implications or possibilities of what is a complex relationship. It should prove invaluable to students practising counsellors and psychotherapists. **Resources in Education**, 2001 [Highly Effective Therapy](#) Len Sperry, 2022-03-07 Trainees and practitioners need a trusted resource for mastering the essential skills and competencies necessary for effecting deep lasting change in their clients. This second edition of *Highly Effective Therapy: Effecting Deep Change in Counseling and Psychotherapy* is that resource. It updates the 20 essential skill sets and clinical competencies needed for a highly effective and successful clinical practice. It illustrates them in action with evidence based treatment protocols and clinical simulations to foster learning and competency. Sperry emphasizes the process of easily learning these research based clinical competencies with added case examples and session transcriptions. New to this edition is trauma assessment, protective factors and ultra brief cognitive behavioral interventions. This second edition is written in an accessible format and is essential for practitioners, trainees and instructors working in this field. **Helping Skills for Working with College Students** Monica Galloway Burke, Jill Duba Sauerheber, Aaron W. Hughey, Karl Laves, 2016-06-17 A primary role of student affairs professionals is to help college students dealing with developmental transitions and coping with emotional difficulties. Becoming an effective helping professional requires the complex integration of intrapersonal, interpersonal and professional awareness and knowledge. For graduate students preparing to become student affairs practitioners, this textbook provides the skills necessary to facilitate the helping process and understand how to respond to student concerns and crises including how to make referrals to appropriate campus or community resources. Focusing on counseling concepts and applications essential for effective student affairs practice, this book develops the conceptual frameworks, basic counseling skills, interventions and techniques that are necessary for student affairs practitioners to be effective, compliant and ethical in their helping and advising roles. *Intersections of Multiple Identities* Miguel E. Gallardo, Brian W. McNeill, 2011-02-11. Over the past two decades there has been an increase in the need to prepare and train mental health personnel in working with diverse populations. In order to fully understand individuals from different cultures and ethnic backgrounds, practitioners need to begin to examine, conceptualize, and treat individuals according to the multiple ways in which they identify themselves. The purpose of this casebook is to bridge the gap between the current practice of counseling with the newest theories and research on working with diverse clientele. Each chapter is written by leading experts in the field of multicultural counseling and includes a case presentation with a detailed analysis of each session, a discussion of their theoretical orientation and how they have modified it to provide more culturally appropriate treatment, and an explanation of how their own dimensions of diversity and worldviews enhance or potentially impede treatment. This text is a significant contribution to the evolving area of multicultural counseling and will be a valuable resource to mental health practitioners working with diverse populations.
