

Complications of Hypertension

Brain Stroke

Reduced blood supply to the brain can lead to rapid loss of brain function or stroke.

Vision Loss

Hypertensive Retinopathy
High blood pressure can damage blood vessels in the retina, resulting in loss of vision.

Blood Vessel Damage

Atherosclerosis

Hypertension is a leading cause of atherosclerosis, the artery-narrowing process that can result in heart attack and stroke.

Kidney Failure

Damaged blood vessels in the kidneys can't effectively filter your blood, resulting in a dangerous accumulation of fluid and waste.

Heart Attack

Hypertension causes the heart to pump against high blood pressure, making it work harder than necessary. Over time, this causes the heart muscle to thicken, restricting blood flow which can lead to heart failure.

Bone Loss

High blood pressure may increase the amount of calcium in your urine. That excessive elimination of calcium may lead to loss of bone density (osteoporosis).

Effects Of Hypertension

Gregory Y. H. Lip, John E. Hall

Effects Of Hypertension:

Cerebrovascular Bibliography ,1966 **Comprehensive Hypertension E-Book** Gregory Y. H. Lip,John E. Hall,2007-06-28

Primary Hypertension Werner Kaufmann, Gerd Bönner, Robert Lang, Karl A. Meurer, 2012-12-06 Some of the leading scientists in the field of hypertension accepted an invitation to actively participate in an international symposium on primary hypertension Scientists from 13 countries from western southern and eastern Europe Australia and the United States were present The meeting was held in Cologne in March 1985 After previous meetings and workshops at Titisee in the Black Forest and several symposia on the renin angiotensin aldosterone system here in Cologne this symposium on primary hypertension was organized in order to induce and to stimulate critical discussion on the basic pathogenetic mechanisms involved and the recently established therapeutic implications Numerous studies have been based on the concept that the elevation in blood pressure is mediated by several vasopressor substances For this reason the renin angiotensin system has been considered to be the essential endocrine mechanism involved in developing and sustaining arterial hypertension Other vasopressor factors such as catecholamines vasopressin and serotonin have been studied extensively and were assumed to play additional parts in blood pressure regulation However several other approaches have been initiated in recent years

California. Court of Appeal (2nd Appellate District). Records and Briefs California (State)., Received document entitled EXHIBITS TO PETITION FOR WRIT
