A History of Egypt Under the Pharaohs Heinrich Brugsch, 1879 **A History of Egypt Under the Pharaohs** Heinrich Brugsch, 1881 A History of Egypt under the Pharaohs, Derived Entirely from the Monuments Heinrich Karl

Brugsch, 2015-05-21 This illustrated two volume history of Egypt derived entirely from the monuments was first published in an English translation in 1879 Brugsch brings to bear his wide experience of the archaeological sites together with his linguistic expertise and deliberately eschews later Greek and Roman accounts of Egypt *19th Century Female Explorers* Caroline Roope, 2025-08-05 As any historian will testify a nineteenth century woman's place was very much at home Or was it For a lucky and plucky few who had a little determination and the ability to withstand lice infestations climbing mountains in corsets rascally guides and occasional certain death as well as the raised eyebrows of the society they left behind then the world really was their oyster In this lively re-telling of twenty two extraordinary ladies who did just that Caroline Roope invites you to journey to the further corners of the earth along with them From humble missionary Annie Royle Taylor who knew God would keep her safe to the haughty aristocrat Lady Hester Stanhope who defied convention and dressed as a Turkish man including pistol knife and turban their collective voices still resonate hundreds of years later Drawing on their original accounts and archival sources this expertly researched book brings to light a wealth of stories that are full of grit sometimes literally courage and just enough humor to wish we'd been there with them on their adventures on the other side of the horizon So pack a suitcase along with a good thick skirt la Mary Kingsley and prepare to go beyond the garden gate

A History of Ancient Egypt, Volume 3 John Romer, 2023-05-25 The final chapter in the definitive three volume history of the world's first known state Archaeologist John Romer has spent a lifetime chronicling the history of Ancient Egypt and here he tells the epic story of an era dominated by titans of the popular imagination the radical iconoclast Akhenaten the boy king Tutankhamun and the all conquering Ramesses II But heroes do not forge history by themselves This was also a time of international trade cultural exchange and sophisticated art even in the face of violent change Alongside his visionary new history of this the most famous period in the long history of Ancient Egypt Romer turns a critical eye on Egyptology itself Paying close attention to the evidence he corrects prevailing narratives which cast the New Kingdom as an imperial state power in the European mould Instead he reveals through broken artefacts in ruined workshops or preserved letters between a tomb builder and his son a culture more beautiful and beguiling than we could have imagined Romer carefully reconstructs the real story of the New Kingdom as evidenced in the archaeological record and the result the final volume of a life long project secures his status as Ancient Egypt's finest chronicler

Torch and Colonial Book Circular, 1891 *Empirico-Statistical Analysis of Narrative Material and its Applications to Historical Dating* A.T. Fomenko, 2013-11-11 Today the methods of applied statistics have penetrated very different fields of knowledge including the

investigation of texts of various origins. These texts may be considered as signal sequences of different kinds: long genetic codes, graphic representations which may be coded and represented by a text as well as actual narrative texts for example historical chronicles, originals, documents etc. One of the most important problems arising here is to recognize dependent texts, i.e. texts which have a measure of resemblance arising from some kind of common origin. For instance in pattern recognition problems it is essential to identify from a large set of patterns a pattern that is closest to a given one. In studying long signal sequences it is important to recognize homogeneous subsequences and the places of their junction. This includes in particular the well known change point problem which is given considerable attention in mathematical statistics and the theory of stochastic processes. As applied to the study of narrative texts the problem of recognizing dependent and independent texts, e.g. chronicles, leads to the problem of finding texts having a common source, i.e. the same original. Such texts are naturally called dependent or, on the contrary, having different sources, such texts are naturally called independent. Clearly such problems are exceedingly complicated and therefore the appearance of new empirico-statistical recognition methods which along with the classical approaches may prove useful in concrete studies, e.g. source determination, is welcome.
