Curiosity and the Aesthetics of Travel-Writing, 1770-1840 Nigel Leask, 2002-01-10 The decades between 1770 and 1840 are rich in exotic accounts of the ruin strewn landscapes of Ethiopia Egypt India and Mexico Yet it is a field which has been neglected by scholars and which unjustifiably remains outside the literary canon In this pioneering book Nigel Leask studies the Romantic obsession with these antique lands drawing generously on a wide range of eighteenth and nineteenth century travel books as well as on recent scholarship in literature history geography and anthropology Viewing the texts primarily as literary works rather than transparent adventure stories or documentary sources he sets out to challenge the tendency in modern academic work to overemphasize the authoritative character of colonial discourse Instead he addresses the relationship between narrative aesthetics and colonialism through the unstable discourse of antiquarianism exploring the effects of problems of creditworthiness and the nebulous epistemological claims of curiosity a leitmotif of the accounts studied here on the contemporary status of travel writing Attentive to the often divergent idioms of elite and popular exoticism *Curiosity and the Aesthetics of Travel Writing* plots the transformation of the travelogue through the period as the baroque particularism of curiosity was challenged by picturesque aesthetics systematic geographical narrative and the emergence of a transcendental self axiomatic to Romantic culture In so doing it offers an important reformulation of the relations between literature aesthetics and empire in the late Enlightenment and Romantic periods

University of Southampton Archaeologist Alice Stevenson provides a thoughtful consideration of the goals and intent behind contemporary art interventions in exhibitions of ancient Egyptian art. She challenges the curators, scholars, and museum professionals who design these exhibitions to move beyond the simplistic ancient art/contemporary art juxtaposition and instead use contemporary art interventions to create spaces for both artistic and academic insight and inspiration. I look forward to such dialogue. Kara Cooney, UCLA.

Egyptian Revival Omar Khalil, The fascination with Ancient Egypt has influenced architectural and artistic movements for centuries, culminating in what is known as the Egyptian Revival. This movement, characterized by its adaptation of ancient Egyptian motifs, emerged in response to rediscoveries of Egypt's past. The revival gained traction during the 18th and 19th centuries, driven by archaeological discoveries, historical curiosity, and a growing appreciation for non-European artistic traditions. One of the key moments that ignited interest in Ancient Egypt was Napoleon Bonaparte's Egyptian campaign (1798-1801). This military expedition was not just an act of conquest but also a scientific endeavor that brought scholars, artists, and historians to document Egypt's ancient ruins. The most significant outcome of this campaign was the publication of the *Description de l'Égypte*, a comprehensive collection of illustrations and studies that introduced Europe to the architectural grandeur of Egypt. The discovery of the Rosetta Stone in 1799 further fueled this fascination, as it eventually led to the deciphering of Egyptian hieroglyphics, allowing deeper insights into the civilization's history and culture. The widespread enthusiasm for Ancient Egypt in the early 19th century gave rise to what historians call Egyptomania. This cultural phenomenon influenced literature, fashion, decorative arts, and architecture. Egyptian imagery, including sphinxes, obelisks, and pyramidal forms, began to appear in European cityscapes. The influence was particularly noticeable in monumental architecture, where designers sought to capture the imposing and symbolic nature of ancient Egyptian structures. The fascination with Egypt was further fueled by colonial expansion, as European powers took a vested interest in the region's antiquities.

Nefer Willie Cannon-Brown, 2007-11-21. This book provides an original treatment of the concept of good and beauty in ancient Egypt. It seeks to examine the dimensions of *nefer*, the term used to describe the good and the beautiful within the context of ordinary life. Because the book is based upon original research on ancient Egypt, it opens up space for a review of the aesthetics of other African societies in the Nile Valley. Thus, it serves as a heuristic for further research and scholarship.

The Oxford Handbook of Egyptology Ian Shaw, Elizabeth Bloxam, 2020. The Oxford Handbook of Egyptology offers a comprehensive survey of the entire study of ancient Egypt from prehistory through to the end of the Roman period. Transcending conventional boundaries between archaeological and ancient textual analysis and bringing together 63 chapters that range widely across the various archaeological, philological, and cultural sub-disciplines, authored by recognized experts in their respective fields, it highlights the extent to which the discipline has diversified and stresses the need for it to seek multidisciplinary methods and broader collaborations if it is to remain contemporary and relevant. Authoritative yet accessible, it is an invaluable resource for scholars, students, and general readers.
