Eiffel The Genius Who Reinvented Himself:

Eiffel David I Harvie,2006-08-24 The Eiffel Tower is perhaps the most famous tall building in the world an icon of its own age and ours It was the dream child of French engineer Gustave Eiffel along with Budapest railway station the Douro Bridge in Portugal and the interior skeleton of the Statue of Liberty In this new biography of Eiffel the first for many years David I Harvie reveals the determination struggle and drama which characterised the life of this talented man The Eiffel Tower was proposed as the centrepiece for the World Exhibition of 1889 yet the moment the plans were unveiled they were greeted with a storm of protests An influential Artists Protest was vocal in its criticism Eiffel became involved in an extended argument with Charles Garnier architect of the Paris Opera and satirists had a field day Robust in his defence of the tower Eiffel had the last laugh when completed the tower became an instant favourite and a moneyspinner Yet at the moment of his triumph scandal beckoned While the tower was being built Eiffel had signed contracts for the biggest and riskiest project of his life the construction of the locks for the Panama Canal In 1889 the canal company was plunged into liquidation due to mismanagement Eiffel was charged with breach of trust and swindling and sentenced to two years imprisonment Although cleared on appeal the engineer from Dijon never quite recovered from the personal indignity of the scandal The man who had designed and built aqueducts and bridges throughout the world turned his back on engineering and embarked on an equally illustrious career in the study of aerodynamics

Remarkable Engineers Ioan James,2010-02-25 Engineering transformed the world completely between the 17th and 21st centuries Remarkable Engineers tells the stories of 51 of the key pioneers in this transformation from the designers and builders of the world s railways bridges and aeroplanes to the founders of the modern electronics and communications revolutions The focus throughout is on their varied life stories and engineering and scientific detail is kept to a minimum Engineer profiles are organized chronologically inviting readers with an interest in engineering to follow the path by which these remarkable engineers utterly changed our lives Eiffel David I Harvie,2006-08-24 Presenting the story of Gustave Eiffel this book examines the conception and controversial construction of the tower that bears his name one of the most famous tall buildings in the world Just at the point of his greatest success he signed contracts for the project which was to bring scandal on his name the Panama Canal The Personality of Paris Alan R. H. Baker,2021-01-28 What was the personality of 19th century Paris To answer that question this book eschews the conventional narrative and chronological route taken by most histories of Paris Instead it thematically analyses the complex personality traits of Paris from the onset of the Revolution of 1789 to the beginning of the Great War Starting with the topographical and cultural legacies that late 18th century Paris inherited from its foundation in pre Roman and Roman times and from its medieval infancy and early modern adolescence The Personality of Paris unpacks the social and material complexity of the 19th century city It considers the role of immigration in the making of Parisians and in the city s growth from half a million in 1801 to almost three million in 1911 It examines the making of its distinctive landscape through the

construction of monuments and architectural icons through its massive re modelling by Napol on III and Baron Haussmann through its five world exhibitions through its emphasis on food fashion and leisure and through the ways in which Parisians sought rural release from urban pressure Finally the book considers the self harm done to the person of 19th century Paris by revolutions and wars and the damage inflicted on it by 20th century hubristic politicians and architects

The Evolution of Society Erik W. Aslaksen, 2023-02-17 This book covers the work of Erik W Aslaksen who continues to develop the view of society and its evolution published in earlier work *The Social Bond* Springer 2018 *The Stability of Society* Springer 2020 and *Measures of Social Evolution* Springer 2021 bringing together core material of that work with the results of recent investigations in order to present the evolution of society as an integrated and continuous story leading right up to the present time A story of human action driven by our beliefs desires and an ideology arising out of our ability to transform and exploit our environment through the development and application of technology The distinguishing feature of the work is the treatment of society as an information processing system and applying the system methodology for handling complexity as it is applied e.g. in engineering This focus on information is particularly pertinent in the current circumstances where the world has arrived at a critical point in its history through the conjunction of a number of issues that appear to be spiralling out of control Global warming and the associated climate change the destruction of our environment through such processes as land clearing and industrialisation with associated loss of biodiversity the rapidly increasing visibility of the inequality in the quality of life with associated tensions and above all the determination of the US led Western alliance to cling to its hegemonial role apparently at all cost With the sophistication and proliferation of nuclear weapons the latter has the potential to bring on the end of civilisation as we know it The resolution of any of these issues depends on the information available to all parties involved and hence the availability and quality of information is seen as the crucial and overarching issue of the present time A number of aspects of this issue including the role of education economic inequality and the control of the media are treated in some detail and proposals for some small steps in the right direction are put forward

[When Paris Sizzled](#) Mary McAuliffe, 2016-09-15 *When Paris Sizzled* vividly portrays the City of Light during the fabulous 1920s les Années folles when Parisians emerged from the horrors of war to find that a new world greeted them one that reverberated with the hard metallic clang of the assembly line the roar of automobiles and the beat of jazz Mary McAuliffe traces a decade that saw seismic change on almost every front from art and architecture to music literature fashion

entertainment transportation and most notably behavior The epicenter of all this creativity as well as of the era's good times was Montparnasse where impoverished artists and writers found colleagues and cafés and tourists discovered the Paris of their dreams Major figures on the Paris scene such as Gertrude Stein Jean Cocteau Picasso Stravinsky Diaghilev and Proust continued to hold sway while others now came to prominence including Ernest Hemingway Coco Chanel Cole Porter and Josephine Baker as well as André Citroën Le Corbusier Man Ray Sylvia Beach James Joyce and the irrepressible Kiki of Montparnasse Paris of the 1920s unquestionably sizzled Yet rather than being a decade of unmitigated bliss les Années folles also saw an undercurrent of despair as well as the rise of ruthless organizations of the extreme right aimed at annihilating whatever threatened tradition and order a struggle that would escalate in the years ahead Through rich illustrations and evocative narrative Mary McAuliffe brings this vibrant era to life
