Blind People's Pragmatic Abilities Jolanta Sak-Wernicka, 2017-05-11 This book offers an analysis of blind people's pragmatic abilities By exploring the impact of visual impairment on the interpretation of utterances it identifies common ground between the pragmatic analysis of comprehension and visual impairment and shows how the study of pragmatics can be enriched by the study of visual impairment It also investigates the role of accessible contextual cues and the effect of visual impairment on comprehension Although it is generally accepted that context plays a crucial role in comprehension it is still unknown what effect a lack or insufficiency of certain contextual information has on interpretation and mutual communication between people This raises the question of whether people who are blind are equally competent and successful in interpreting spoken language as sighted people Also bearing in mind the specific difficulties and delays faced by blind children in social and linguistic development indicated in previous studies it is worth exploring whether these initial difficulties are eventually overcome by blind adults This book in offering a satisfactory answer to this relevant question is one of the very few publications devoted to the analysis of the pragmalinguistic consequences of blindness

Learning to Teach in an Inclusive Era Martin Musengi, editor, 2018-10-29 Learning to Teach in an Inclusive Era starts a welcome conversation on educational inclusion Such a conversation is missing in many developing countries therefore this is an important contribution to an emerging field that is still shrouded in uncertainty Written by diverse lecturers in teacher education this book is based on several authors' interactions among themselves with student teachers in lecture rooms in dissertation supervision and on teaching practice supervision in several African countries Such interactions revealed the tensions in understanding what inclusion is and it is these tensions that the book tries to debunk by focusing on teaching methods that can make inclusion possible The first two chapters are introductory and provide the conceptual framework binding the book together by mapping out context and content The next seven chapters form the bulk of the book and focus on specific aspects of inclusive education including individualization task analysis peer tutoring play multi sensory approaches precision and milieu teaching Although these chapters use diverse illustrations the final two chapters focus on two sensory disabilities hearing and visual impairment This book addresses inclusive education as one of the most pressing issues facing educators globally The book provides a platform for critical engagement initiated by emerging African scholars
