Foundations Of Social Archaeology Selected Writings Of V Gordon Childe:

Foundations of Social Archaeology Vere Gordon Childe, 2004 V Gordon Childe is probably the most widely read early archaeologist of the 20th century and one of the world's most renowned prehistorians. A thorough understanding of the evolution of Childe's theoretical perspective is crucial to an understanding of the foundations of social archaeology. For the first time, a diverse collection of Childe's writings have been brought together in one volume. These fourteen essays, from his earliest seminal work in 1935 to his reflective essay *Retrospect* written in 1958 shortly before his death, document the progression of this dynamic thinker. Essays such as *Archaeology and Anthropology* show the evolution of Childe's theories from a conception of the past as a trait list to conceptualization of culture to an understanding of the profound importance of social relations in transforming human history. His understanding of history evolved from a static notion into a dynamic conception that openly embraced social interaction and all that it entailed, a transformation that marked the earliest strains of social archaeology. The introduction by prominent anthropologists Thomas Patterson and Charles Orser places Childe's work in a larger context and explores Childe's ongoing value to modern readers. This volume will be of interest to archaeologists, anthropologists, and historians of social archaeology. *History* Peter Claus, John Marriott, 2017-04-07

Demystifying the subject with clarity and verve. History: An Introduction to Theory, Method and Practice familiarizes the reader with the varied spectrum of historical approaches in a balanced, comprehensive and engaging manner. Global in scope and covering a wide range of topics from the ancient and medieval worlds to the twenty-first century, it explores historical perspectives not only from historiography itself but from related areas such as literature, sociology, geography and anthropology. Clearly written, accessible and student-friendly, this second edition is fully updated throughout to include an increased spread of case studies from beyond Europe, especially from American and imperial histories. New chapters on important and growing areas of historical inquiry such as environmental history and digital history. Expanded sections on political, cultural and social history. More discussion of non-traditional forms of historical representation and knowledge like film, fiction and video games. Accompanied by a new companion website www.routledge.com/cw/clauss containing valuable supporting material for students and instructors such as discussion questions, further reading and web links, this book is an essential introduction for all students of historical theory and method. **Scientific Dating in Archaeology** Seren Griffiths, 2022-10-21

A variety of techniques have been developed to provide scientific chronologies of archaeological sites and material culture. These chronologies underpin the narratives that are generated for prehistoric and other periods. The application of Bayesian statistical analysis to scientific chronologies has been hailed as a revolution in understanding and has brought renewed emphasis onto how we generate scientific chronological data, how these data are applied into wider narratives, and the epistemological importance of these data. This volume will provide a timely review of the methods, applications and challenges of applying different scientific dating techniques to archaeological sites and material culture. It

will then provide an introduction to Bayesian modelling and highlight a series of considerations in the application of scientific dating techniques

Communities and knowledge production in archaeology Julia Roberts, Kathleen Sheppard, Ulf R. Hansson, Jonathan R. Trigg, 2020-01-15 This electronic version has been made available under a Creative Commons BY NC ND open access license The dynamic processes of knowledge production in archaeology and elsewhere in the humanities and social sciences are increasingly viewed as the collaborative effort of groups clusters and communities of researchers rather than the isolated work of so called instrumental actors Shifting focus from the individual scholar to the wider social contexts of her work and the dynamic creative processes she participates in this volume critically examines the importance of informal networks and conversation in the creation of knowledge about the past Engaging with theoretical approaches such as the sociology and geographies of knowledge and Actor Network Theory ANT and using examples taken from different archaeologies in Europe and North America from the seventeenth to the mid twentieth century the book caters to a wide readership ranging from students of archaeology anthropology classics and science studies to the general reader

Economic Representations , Archaeological Perspectives on the Southern Appalachians Ramie A. Gougeon, Maureen Meyers, 2015-03-10 This volume demonstrates how archaeologists working in the Southern Appalachian region over the past 40 years have developed rich interpretations of prehistoric and historic Southeastern Native societies by examining them from multiple scales of analysis The end results of these examinations demonstrate both the uses and the constraints of multiscalar approaches in reconstructing various lifeways across the Southeast

The Oxford Handbook of the Archaeology of Death and Burial Sarah Tarlow, Liv Nilsson Stutz, 2013-06-06 The Oxford Handbook of the Archaeology of Death and Burial reviews the current state of mortuary archaeology and its practice highlighting its often contentious place in the modern socio politics of archaeology It contains forty four chapters which focus on the history of the discipline and its current scientific techniques and methods Written by leading international scholars in the field it derives its examples and case studies from a wide range of time periods such as the middle palaeolithic to the twentieth century and geographical areas which include Europe North and South America Africa and Asia Combining up to date knowledge of relevant archaeological research with critical assessments of the theme and an evaluation of future research trajectories it draws attention to the social symbolic and theoretical aspects of interpreting mortuary archaeology The volume is well illustrated with maps plans photographs and illustrations and is ideally suited for students and researchers

The Varied Facets of History Aniruddha Ray, 2011 Aniruddha Ray retired as Professor of History from the Department of Islamic History and Culture University of Calcutta Kolkata West Bengal Well known for his profound interest in historical research Aniruddha Ray has written extensively about Mughal administration technology and travelogues the society and culture of Medieval Bengal the economic history of the Sultanate and Mughal periods overseas trade and merchants and the French East India Company on the basis of a fine blending of his knowledge of Bengali English and French sources As a mark of esteem and affection scholars in India and abroad have joined hands to offer him this volume The festschrift reflects the range of Aniruddha Ray's interests and influences in some measure The theme of the present volume includes the contemporary effort within academia to question the traditional representation of Indian history and the attempts in various areas of study to de-centre the writing of history and to provide an alternative perspective to the history of fifteenth to nineteenth century India In this eclectic collection of essays one can see an innovative approach at work which raises interesting questions when one situates these ideas and the historical evidence within the big picture as one moves back and forth between the macro perspective and the micro history addressed in most of these essays With eminent historians of the subcontinent contributing to it The Varied Facets of History Essays in Honour of Aniruddha Ray throws new light on aspects of Indian history its sources and their interpretations the evolution of cultural aspects like languages especially Hindi and Bengali archaeology painting technology trade and commerce and labour

From Prehistoric Villages to Cities Jennifer Birch, 2014-04-11 Archaeologists have focused a great deal of attention on explaining the evolution of village societies and the transition to a Neolithic way of life Considerable interest has also concentrated on urbanism and the rise of the earliest cities Between these two landmarks in human cultural development lies a critical stage in social and political evolution Throughout world at various points in time people living in small dispersed village communities have come together into larger and more complex social formations These community aggregates were essentially middle range situated between the earliest villages and emergent chiefdoms and states This volume explores the

social processes involved in the creation and maintenance of aggregated communities and how they brought about revolutionary transformations that affected virtually every aspect of a society and its culture While there have been a number of studies that address coalescence from a regional perspective less is understood about how aggregated communities functioned internally The key premise explored in this volume is that large scale long term cultural transformations were ultimately enacted in the context of daily practices interactions and what might be otherwise considered the mundane aspects of everyday life How did these processes play out on the ground in diverse and historically contingent settings What are the strategies and mechanisms that people adopt in order to facilitate living in larger social formations What changes in social relations occur when people come together This volume employs a broadly cross cultural approach to interrogating these questions employing case studies which span four continents and more than 10 000 years of human history

Cities, Politics & Power Simon Parker, 2010-11-02 Traditionally the study of power in the city was confined to the institutions of urban government and the actors involved in contesting and making political decisions in and for metropolitan societies Increasingly however attention has turned to the function of the city not only as a centre of urban governance but as a major economic social cultural and strategic force in its own right Cities Politics and Power combines this traditional concern with how the cities in which we live are organized and run with a broader focus on cities and urban regions as multiple sites and agents of power This book is divided into five sections with a short introduction outlining the argument and organisation of the text Part two charts the development of the urban polity and considers the ways in which coercion and force continue to be used to segregate oppress and annihilate urban populations Part three critically examines the key collective actors and processes that compete for and organise political power within cities and how urban governance operates and interacts with lesser and greater scales of government and networks of power Part four then explores the ways in which the political is constituted by urban inhabitants and how social identity information and communication networks and the natural and built environment all comprise intersecting fields of urban power The conclusion calls for a broader theoretical and thematic approach to the study of urban politics This book makes extensive use of comparative and historical case studies providing broad coverage of politics and urban movements in both the Global North and the Global South with a particular focus on the UK USA Canada Latin America and China It is written in an accessible and lucid style and provides suggestions for further reading at the end each chapter

Palaeoart of the Ice Age Robert G. Bednarik, 2017-08-21 The many hundreds of books and thousands of academic papers on the topic of Pleistocene Ice Age art are limited in their approach because they deal only with the early art of southwestern Europe This is the first book to offer a comprehensive synthesis of the known Pleistocene palaeoart of six continents a phenomenon that is in fact more numerous and older in other continents It contemplates the origins of art in a balanced manner based on reality rather than fantasies about cultural primacy Its key findings challenge most previous perceptions in this field and literally re write the discipline Despite the eclectic format and its high academic

standards the book addresses the non specialist as well as the specialist reader It presents a panorama of the rich history of palaeoart stretching back more than twenty times as long in time as the cave art of France and Spain This abundance of evidence is harnessed in presenting a new hypothesis of how early humans began to form and express constructs of reality and thus created the ideational world in which they existed It explains how art producing behaviour began and the origins of how humans relate to the world consciously

Water and War at Pyreneus Mountains: Historical Eco-Archaeology of Lavras do Abade

Diogo M. Costa, 2011-02 The Lavras do Abade research is a multiple perspective archaeological study about the environmental impacts of a gold mining village in Mid Western Brazil that was destroyed by neighboring villages at the end of the nineteenth century According to local narratives the conflict was the consequence of a dispute about the control and use of natural resources such as water However this investigation reveals that the conflict was caused also by economic and political disputes between the villages in the region In this work each stage of investigation is presented in separate chapters Research was conducted to validate hypotheses and to combine different approaches to each element that compounds this mosaic of information The result of this work is a combination of various complementary investigations into the same object and is a theoretical and methodological referential that establishes the Lavras do Abade case study as an original bridge to understanding many Water Wars in the modern world today

Archaeological Encounters Margarita Díaz-Andreu, 2012-11-13 This book examines the relationship between British and Spanish archaeology in the light of international geographies of knowledge It looks at the practical aspects of the personal relationships established between British and Spanish prehistoric archaeologists from the 1920s to the 1970s Part I of the book sets the scene It provides some contextual information on the main events in the archaeology of both countries in the period under study It also introduces Professor Luis Pericot the archaeologist whose archive serves as the basis for much of what is discussed throughout the following chapters In Part II of the book an analysis of the correspondence held in the Pericot Archive the Fons Pericot in the Biblioteca de Catalunya is undertaken The examination of the letters exchanged between Spanish and British prehistorians in general and in particular between Luis Pericot and about a dozen major British scholars of his time allows the reconstruction of the nature of the relationships formed between them The analysis has been divided into three chapters corresponding to the three main towns where his correspondents lived for most of their academic careers London Cambridge and Oxford In Part III of the book the information obtained from the correspondence is then complemented and re examined considering three main aspects the production transmission and reception of knowledge This analysis puts together aspects discussed in Part I of the book with the data gathered from the letters in Part II as well as other information provided by publications including translations and reviews First of all an assessment is made as to whether the geographical context affected the way knowledge of prehistoric archaeology was produced Secondly the mechanisms and networks that allowed the international transmission of both ideas and practices linked to prehistoric archaeology are assessed A third aspect looked into is the

reception of knowledge linking this with issues such as academic prestige and authority Peruvian Archaeology Henry Tantaleán, 2016-07-01 This book offers a unique critical perspective on the history of Peruvian archaeology by a native scholar Leading Peruvian archaeologist Henry Tantaleán illuminates the cultural legacy of colonialism beginning with founding father Max Uhle and traces key developments to the present These include the growth of Peruvian institutions major figures from Tello and Valcárcel to Larco Rowe and Murra war political upheaval and Peruvian regimes developments in archaeological and social science theory as they impacted Andean archaeology and modern concerns such as heritage neoliberalism and privatization This post colonial perspective on research and its sociopolitical context is an essential contribution to Andean archaeology and the growing international dialogue on the history of archaeology
