Litow, 2018-06-06 A roadmap to improve corporate social responsibility The 2016 U S Presidential Campaign focused a good deal of attention on the role of corporations in society from both sides of the aisle In the lead up to the election big companies were accused of profiteering plundering the environment and ignoring even exacerbating societal ills ranging from illiteracy and discrimination to obesity and opioid addiction Income inequality was laid squarely at the feet of us companies The Trump administration then moved swiftly to scrap fiscal social and environmental rules that purportedly hobble business to redirect or shut down cabinet offices historically protecting the public good and to roll back clean power consumer protection living wage healthy eating initiatives and even basic public funding for public schools To many eyes and the lens of history this may usher in a new era of cowboy capitalism with big companies unfettered by regulation and encouraged by the presidential bully pulpit free to go about the business of making money no matter the consequences to consumers and the commonwealth While this may please some companies in the short term the long term consequences might result in just the opposite And while the new administration promises to reduce foreign aid and the social safety net Stanley S Litow believes big companies will be motivated to step up their efforts to create jobs reduce poverty improve education and health and address climate change issues both domestically and around the world For some leaders in the private sector this is not a matter of public relations or charity It is integral to their corporate strategy resulting in creating new markets reducing risks attracting and retaining top talent and generating growth and realizing opportunities Through case studies many of which the author spearheaded at IBM *The Challenge for Business and Society* provides clear guidance for companies to build their own corporate sustainability and social responsibility plans positively effecting their bottom lines producing real return on their investments This book will help Create an effective corporate social responsibility and sustainability plan Provide long term bottom line benefit Protect and enrich brand value Recruit and retain top talent Perfect for CEOs CFOs Human Resource Corporate Affairs executives but also for government and not for profit leaders this book helps you come up with a solid plan for giving back to society producing real sustainable value **The Collaboration**

President's Commission on Law Enforcement and Administration of Justice, 1967 This report of the President s Commission on Law Enforcement and Administration of Justice established by President Lyndon Johnson on July 23 1965 addresses the causes of crime and delinquency and recommends how to prevent crime and delinquency and improve law enforcement and the administration of criminal justice In developing its findings and recommendations the Commission held three national conferences conducted five national surveys held hundreds of meetings and interviewed tens of thousands of individuals

Separate chapters of this report discuss crime in America juvenile delinquency the police the courts corrections organized crime narcotics and drug abuse drunkenness offenses gun control science and technology and research as an instrument for reform Significant data were generated by the Commission's National Survey of Criminal Victims the first of its kind conducted on such a scope The survey found that not only do Americans experience far more crime than they report to the police but they talk about crime and the reports of crime engender such fear among citizens that the basic quality of life of many Americans has eroded The core conclusion of the Commission however is that a significant reduction in crime can be achieved if the Commission's recommendations some 200 are implemented The recommendations call for a cooperative attack on crime by the Federal Government the States the counties the cities civic organizations religious institutions business groups and individual citizens They propose basic changes in the operations of police schools prosecutors employment agencies defenders social workers prisons housing authorities and probation and parole officers **The**

Toepler,2009-11-24 Recently the topic of civil society has generated a wave of interest and a wealth of new information Until now no publication has attempted to organize and consolidate this knowledge The International Encyclopedia of Civil Society fills this gap establishing a common set of understandings and terminology and an analytical starting point for future research Global in scope and authoritative in content the Encyclopedia offers succinct summaries of core concepts and theories definitions of terms biographical entries on important figures and organizational profiles In addition it serves as a reliable and up to date guide to additional sources of information In sum the Encyclopedia provides an overview of the contours of civil society social capital philanthropy and nonprofits across cultures and historical periods For researchers in nonprofit and civil society studies political science economics management and social enterprise this is the most systematic appraisal of a rapidly growing field **The Challenge of World Theatre History** Steve Tillis,2020-09-19 The future of

theatre history studies requires consideration of theatre as a global phenomenon The Challenge of World Theatre History offers the first full scale argument for abandoning an obsolete and parochial Eurocentric approach to theatre history in favor of a more global perspective This book exposes the fallacies that reinforce the conventional approach and defends the global

perspective against possible objections It moves beyond the conventional nation based geography of theatre in favor of a regional geography and develops a new way to demarcate the periods of theatre history Finally the book outlines a history that recognizes the often connected developments in theatre across Eurasia and around the world It makes the case that world theatre history is necessary not only for itself but for the powerful comparative and contextual insights it offers to all theatre scholars and students whatever their special areas of interest

The Understanding of Family in Ghana as a Challenge for a Contextual Ecclesiology Moses Asaah Awinongya, 2013 The life and nature of the Church are better understood in terms of a self identity that relies on the language and cultural framework of the stakeholders Since theological reflections do not take place in a vacuum the socio cultural context gains importance The question is How much culture can the Church as a whole accommodate without losing its universal character With a focus on the West African country of Ghana this book analyzes the potential trade offs and conflicts between the Church and culture in a pluri religious and multi cultural society Further it shows the dangers of exclusion within the Church and offers possible solutions Series Studien zur systematischen Theologie und Ethik Vol 64
