## **Founders Classics Canons Modern Disputes Over The Origins And Appraisal Of The Social Sciences:**

**Founders, Classics, Canons** Peter Baehr, 2017-07-05 Founders classics and canons have been vitally important in helping to frame sociology's identity. Within the academy today a number of positions: feminist postmodernist, postcolonial, question the status of tradition. In *Founders Classics Canons* Peter Baehr defends the continuing importance of sociology's classics and traditions in a university education. Baehr offers arguments against interpreting, defending and attacking sociology's great texts and authors in terms of founders and canons. He demonstrates why in logical and historical terms discourses and traditions cannot actually be founded and why the term founder has little explanatory content. Equally he takes issue with the notion of canon and argues that the analogy between the theological canon and sociological classic texts though seductive is mistaken. Although he questions the uses to which the concepts of founder, classic and canon have been put, Baehr is not dismissive. On the contrary he seeks to understand the value and meaning these concepts have for the people who employ them in the cultural battle to affirm or attack the liberal university tradition.

**Founders, Classics, Canons** Peter R. Baehr, 2002 Three categories: founders, classics, canons have been vitally important in helping to frame sociology's precarious identity, defining the discipline's sense of its past and the implications for its current activity. Today that identity is being challenged as never before. Within the academy a number of positions: feminist postmodernist, poststructuralist, postcolonial converge in questioning the status of the tradition. These currents in turn reflect wider social questioning about the meaning and uses of knowledge in technologically advanced societies. In *Founders Classics Canons* Peter Baehr scrutinizes the nature of this challenge. He provides a model of the processes through which texts are elevated to classic status and defends the continuing importance of sociology's traditions for a university education in the social sciences. The concept of classic is as Baehr notes a complex one. Essentially it assumes a scale of judgment that deems certain texts as exemplary in eminence. But what is the nature of this eminence? Baehr analyzes various responses to this question. Most notable are those that focus on the functions classics perform for the scholarly community that employs them: the rhetorical force classics are said to possess and the processes of reception that result in classic status. The concept of classic is often equated with two other notions: founders and canon. The former has a well established pedigree within the discipline but widespread usage of the latter in sociology is much more recent and polemical in tone. Baehr offers arguments against these two ways of interpreting, defending and attacking sociology's great texts and authors. He demonstrates why in logical and historical terms discourses and traditions cannot actually be founded and why the term founder has little explanatory content. Equally he takes issue with the notion of canon and argues that the analogy between the theological canon and sociological classic texts though seductive is mistaken. While questioning the uses to which the concepts of founder, classic and canon have been put, Baehr's purpose is not dismissive. On the contrary he seeks to understand the value and meaning they have for the people who employ them in the cultural battle to affirm or excoriate the liberal university tradition. In examining the

tactics of this battle this volume offers a model of how social theory can be critical rather than radical Peter Baehr teaches in the department of politics and sociology Lingnan University Hong Kong His previous book for Transaction *Caesar and the Fading of the Roman World* was designated an Outstanding Academic Book by Choice *Founders, Classics, Canons* Peter Baehr, 2017-09-08 Founders classics and canons have been vitally important in helping to frame sociology's identity Within the academy today a number of positions feminist postmodernist postcolonial question the status of tradition In *Founders Classics Canons* Peter Baehr defends the continuing importance of sociology's classics and traditions in a university education Baehr offers arguments against interpreting defending and attacking sociology's great texts and authors in terms of founders and canons He demonstrates why in logical and historical terms discourses and traditions cannot actually be founded and why the term founder has little explanatory content Equally he takes issue with the notion of canon and argues that the analogy between the theological canon and sociological classic texts though seductive is mistaken Although he questions the uses to which the concepts of founder classic and canon have been put Baehr is not dismissive On the contrary he seeks to understand the value and meaning these concepts have for the people who employ them in the cultural battle to affirm or attack the liberal university tradition **Ideas on the Move in the Social Sciences and Humanities** Gisèle Sapiro, Marco Santoro, Patrick Baert, 2020-04-06 This edited collection analyses the reception of a selection of key thinkers and the dissemination of paradigms theories and controversies across the social sciences and humanities since 1945 It draws on data collected from textbooks curricula interviews archives and references in scientific journals from a broad range of countries and disciplines to provide an international and comparative perspective that will shed fresh light on the circulation of ideas in the social and human sciences The contributions cover high profile disputes on methodology epistemology and research practices and the international reception of theorists that have abiding and interdisciplinary relevance such as Antonio Gramsci Hannah Arendt Karl Polanyi Pierre Bourdieu Michel Foucault Edward Said and Gayatri Spivak This important work will be a valuable resource to scholars of the history of ideas and the philosophy of the social sciences in addition to researchers in the fields of social cultural and literary theory *Sociological Amnesia* Alex Law, Eric Royal Lybeck, 2016-03-03 The history of sociology overwhelmingly focuses on the winners from the classical canon Marx Durkheim and Weber to today's most celebrated sociologists This book strikingly demonstrates that restricting sociology in this way impoverishes it as a form of historically reflexive knowledge and obscures the processes and struggles of sociology's own making as a form of disciplinary knowledge *Sociological Amnesia* focuses on singular contributions to sociology that were once considered central to the discipline but are today largely neglected Chapters explore the work of illustrious predecessors such as Raymond Aron Erich Fromm and G D H Cole as well as examining exceptional cases of reputational revival as in the case of Norbert Elias or Gabriel Tarde Through understanding the obstacles of recognition faced by female sociologists like Viola Klein and Olive Schreiner and public intellectuals like Cornelius Castoriadis the volume considers the

reasons why certain kinds of sociology are hailed as central to the discipline whilst others are forgotten In so doing the collection offers fresh insights into not only the work of individual sociologists but also into the discipline of sociology itself its trajectories forgotten promises and dead ends

*The Unmasking Style in Social Theory* Peter Baehr, 2019-05-01 This book examines the nature of unmasking in social theory in revolutionary movements and in popular culture Unmasking is not the same as scientific refutation or principled disagreement When people unmask they claim to rip off a disguise revealing the true beneath the feigned The author distinguishes two basic types of unmasking The first aimed at persons or groups exposes hypocrisy and enmity and is a staple of revolutionary movements The second aimed at ideas exposes illusions and ideologies and is characteristic of radical social theory since the eighteenth century Enlightenment The *Unmasking Style in Social Theory* charts the intellectual origins of unmasking its shifting priorities and its specific techniques in social theory It also explores sociology's relationship to the concept of unmasking through an analysis of writers who embrace adapt or reshape its meaning Such sociologists include Vilfredo Pareto Karl Mannheim Raymond Aron Peter Berger Pierre Bourdieu Luc Boltanski and Christian Smith Finally taking conspiracy theories accusations of social phobia and new concepts such as micro aggression as examples of unmasking techniques the author shows how unmasking contributes to the polarization and bitterness of much public discussion Demonstrating how unmasking is baked into modern culture yet arguing that alternatives to it are still possible this book is in sum a compelling study of unmasking and its impact
