## **Four Centuries Of Special Geography:**

*The Oxford Handbook of European Romanticism* Paul Hamilton, 2016 The Oxford Handbook of European Romanticism focuses on the period beginning with the French Revolution and extending to the uprisings of 1848 across Europe It brings together leading scholars in the field to examine the intellectual literary philosophical and political elements of European Romanticism The volume begins with a series of chapters examining key texts written by major writers in languages including French German Italian Spanish Russian Hungarian Greek and Polish amongst others Then follows a second section based on the naturally inter disciplinary quality of Romanticism encapsulated by the different discourses with which writers of the time set up an internal comparative dynamic These chapters highlight the sense a discourse gives of being written knowledgeably against other pretenders to completeness or comprehensiveness of understanding and the Enlightenment encyclopaedic project Discourses typically push their individual claims to resume European culture collaborating and trying to assimilate each other in the process The main examples featuring here are history geography drama theology language geography philosophy political theory the sciences and the media Each chapter offers original and individual interpretation of individual aspects of an inherently comparative world of individual writers and the discursive idioms to which they are historically subject Together the forty one chapters provide a comprehensive and unique overview of European Romanticism

*Four Centuries of Special Geography* O.F.G. Sitwell, 2011-11-01 Geography as an academic discipline dates back to the last few decades of the nineteenth century However during the preceding centuries a large body of English language literature relevant to the field of special geography was published Four Centuries of Special Geography lists all the works published before 1888 and includes descriptions of each entry and notes on later editions Francis Sitwell has written an extensive introduction in which he provides a detailed guide to the organization and contents of the bibliography He also evaluates special geography as a genre which contributed to scholarly discourse from the sixteenth to the nineteenth centuries In addition he examines the genre as a whole and discusses its relation to the evolving world of ideas during the same time period The result of several years of data gathering this book will be a valuable research tool for anyone seeking to examine aspects of the development of the field of geography in the years before it was defined as a distinct academic discipline It will also be useful to those whose research focuses on the acquisition and transmission of geographical knowledge prior to the twentieth century in particular on the place of geography in educational curricula

**Placing the Enlightenment** Charles W. J. Withers, 2008-09-15 The Enlightenment was the age in which the world became modern challenging tradition in favor of reason freedom and critical inquiry While many aspects of the Enlightenment have been rigorously scrutinized its origins and motivations its principal characters and defining features its legacy and modern relevance the geographical dimensions of the era have until now largely been ignored Placing the Enlightenment contends that the Age of Reason was not only a period of pioneering geographical investigation but also an age with spatial dimensions

to its content and concerns Investigating the role space and location played in the creation and reception of Enlightenment ideas Charles W J Withers draws from the fields of art science history geography politics and religion to explore the legacies of Enlightenment national identity navigation discovery and knowledge Ultimately geography is revealed to be the source of much of the raw material from which philosophers fashioned theories of the human condition Lavishly illustrated and engagingly written Placing the Enlightenment will interest Enlightenment specialists from across the disciplines as well as any scholar curious about the role geography has played in the making of the modern world **A Concise Companion to**

**the Restoration and Eighteenth Century** Cynthia Wall,2008-04-15 This Concise Companion presents fresh perspectives on eighteenth century literature Contributes to current debates in the field on subjects such as the public sphere travel and exploration scientific rhetoric gender and the book trade and historical versus literary perceptions of life on London streets Searches out connections between the remarkable number of new genres that appeared in the eighteenth century Crosses conventional disciplinary lines Demonstrates that philosophy history politics and social theory both influence and are influenced by literature The Bloomsbury Encyclopedia of the American Enlightenment Mark G. **Europe and the British Geographical Imagination, 1760-1830** Paul Stock, 2019 Europe and the British Geographical Imagination 1760-1830 explores what literate Britons of the period understood about Europe focussing on key themes which shaped ideas about the continent including religion the natural environment race the state borders commerce empire and ideas about the past progress and historical change

**The Social Life of Maps in America, 1750-1860** Martin Brückner, 2017-10-26 In the age of MapQuest and GPS we take cartographic literacy for granted We should not the ability to find meaning in maps is the fruit of a long process of exposure and instruction A carto coded America a nation in which maps are pervasive and meaningful had to be created The Social Life of Maps tracks American cartography's spectacular rise to its unprecedented cultural influence Between 1750 and 1860 maps did more than communicate geographic information and political pretensions They became affordable and intelligible to ordinary American men and women looking for their place in the

world School maps quickly entered classrooms where they shaped reading and other cognitive exercises giant maps drew attention in public spaces miniature maps helped Americans chart personal experiences In short maps were uniquely social objects whose visual and material expressions affected commercial practices and graphic arts theatrical performances and the communication of emotions This lavishly illustrated study follows popular maps from their points of creation to shops and galleries schoolrooms and coat pockets parlors and bookbindings Between the decades leading up to the Revolutionary War and the Civil War early Americans bonded with maps Martin Br ckner s comprehensive history of quotidian cartographic encounters is the first to show us how

**China in European Encyclopaedias, 1700-1850** Georg Lehner,2011-05-10 This book shows the ways in which English French and German eighteenth and early nineteenth century encyclopaedias dealt with things Chinese offering an analysis of the broad variety of sources and an overview of the main strands of discourse on China

*Utopian Geographies and the Early English Novel* Jason H. Pearl,2014-10-01 Historians of the Enlightenment have studied the period s substantial advances in world cartography as well as the decline of utopia imagined in geographic terms Literary critics meanwhile have assessed the emerging novel s realism and in particular the genre s awareness of the wider world beyond Europe Jason Pearl unites these lines of inquiry in *Utopian Geographies and the Early English Novel* arguing that prose fiction from 1660 to 1740 helped demystify blank spaces on the map and make utopia available anywhere This literature incorporated debunked and reformulated utopian conceptions of geography Reports of ideal societies have always prompted skepticism and it is now common to imagine them in the future rather than on some undiscovered island or continent At precisely the time when novels began turning from the fabulous settings of romance to the actual locations described in contemporaneous travel accounts a number of writers nevertheless tried to preserve and reconfigure utopia by giving it new coordinates and parameters Margaret Cavendish Aphra Behn Daniel Defoe Jonathan Swift and others told of adventurous voyages and extraordinary worlds They engaged critically and creatively with the idea of utopia If these writers ultimately concede that utopian geographies were nowhere to be found they also reimagine the essential ideals as new forms of interiority and sociability that could be brought back to England Questions about geography and utopia drove many of the formal innovations of the early novel As this book shows what resulted were new ways of representing both world geography and utopian possibility

**The Enlightenment and the Book** Richard B. Sher,2008-09-15 The late eighteenth century witnessed an explosion of intellectual activity in Scotland by such luminaries as David Hume Adam Smith Hugh Blair William Robertson Adam Ferguson James Boswell and Robert Burns And the books written by these seminal thinkers made a significant mark during their time in almost every field of polite literature and higher learning throughout Britain Europe and the Americas In this magisterial history Richard B Sher breaks new ground for our understanding of the Enlightenment and the forgotten role of publishing during that period *The Enlightenment and the Book* seeks to remedy the common misperception that such classics as *The Wealth of Nations* and *The Life of Samuel Johnson* were written by authors who eyed

their publishers as minor functionaries in their profession To the contrary Sher shows how the process of bookmaking during the late eighteenth century involved a deeply complex partnership between authors and their publishers one in which writers saw the book industry not only as pivotal in the dissemination of their ideas but also as crucial to their dreams of fame and monetary gain Similarly Sher demonstrates that publishers were involved in the project of bookmaking in order to advance human knowledge as well as to accumulate profits The Enlightenment and the Book explores this tension between creativity and commerce that still exists in scholarly publishing today Lavishly illustrated and elegantly conceived it will be must reading for anyone interested in the history of the book or the production and diffusion of Enlightenment thought

**Geographies of the Romantic North** A. Byrne, 2013-08-28 This book examines British scientific and antiquarian travels in the North circa 1790 1830 British perceptions representations and imaginings of the North are considered part of late eighteenth and early nineteenth century processes of British self fashioning as a Northern nation and key in unifying the expanding North Atlantic empire **Geographies of the Book** Charles W.J. Withers, 2016-04-15 The geography of the book is as old as the history of the book though far less thoroughly explored Yet research has increasingly pointed to the spatial dimensions of book history to the transformation of texts as they are made and moved from place to place from authors to readers and within different communities and cultures of reception Widespread recognition of the significance of place of the effects of movement over space and of the importance of location to the making and reception of print culture has been a feature of recent book history work and draws in many instances upon studies within the history of science as well as geography Geographies of the Book explores the complex relationships between the making of books in certain geographical contexts the movement of books epistemologically as well as geographically and the ways in which they are received

**Regnum Chinae: The Printed Western Maps of China to 1735** Marco Caboara, 2022-10-24 Listen to the New Books Network Podcast The first European map of China faintly relied on the copy of a Chinese original obtained through bribing and espionage the last covered in this book was the result of the largest land survey ever made until that time These two and another 125 maps depict sometimes uniquely sometimes copying each other a country whose images were so different that it was hard to understand which to trust This study reproduces and describes for the first time all the maps of China printed in Europe between 1584 and 1735 unravelling the origin of each individual map their different printing issues and publication dates It also tells for each the unique story that made possible these visions from another world stories marked by scholarly breakthroughs obsession missionary zeal commercial sagacity and greed For a presentation from the author related to the publication entitled China on Copper Plates The First 150 Years of Chinese Maps in Western Prints 1584 1735 see here A summary On June 23 2022 the fourth session of the academic lecture series on The Weavers of Four Dimensional Space Time and Their Creation on the History of Maps was held in the form of an online seminar at the Kuang Chi International Scholars Center Dr Marco Caboara an Italian scholar from the Lee Shau Kee Library of Hong Kong University of Science and
