Four Fields Five Gates:

Four Fields, Five Gates Anne Loris Hill, 1954 Cader Idris faces Cardigan Bay and on the mountain's northern edge is the long estuary of the river Mawddach. It was in this picturesque landscape that three resourceful young women decided to make a new life for themselves. Four Fields Five Gates Anne L. Hill, 1999-01-01 **Four Fields, Five Gates. [An**

MECHI, 1859 **Princeton Alumni Weekly**, 1965 *System on the Farm*, 1918 **High Magnetic Fields in Semiconductor Physics II** Gottfried Landwehr, 2012-12-06 This volume contains contributions presented at the International Conference The Application of High Magnetic Fields in Semiconductor Physics which was held at the University of Würzburg from August 22 to 26 1988. In the tradition of previous Würzburg meetings on the subject the first conference was held in 1972 only invited papers were presented orally. All 42 lecturers were asked to review their subject to some extent so that this book gives a good overview of the present state of the respective topic. A look at the contents shows that the subjects which have been treated at previous conferences have not lost their relevance. On the contrary the application of high magnetic fields to semiconductors has grown substantially during the recent past. For the elucidation of the electronic band structure of semiconductors high magnetic fields are still an indispensable tool. The investigation of two dimensional electronic systems especially is frequently connected with the use of high magnetic fields. The reason for this is that a high B field adds angular momentum quantization to the boundary quantization present in heterostructures and superlattices. A glance at the contributions shows that the majority deal with 2D properties. Special emphasis was on the integral and fractional quantum Hall effect. Very recent results related to the observation of a fraction with an even denominator were presented. It became obvious that the polarization of the different fractional Landau levels is more complicated than originally anticipated.
