Four hundred centuries of cave art. Transl. by Mary E. Boyle Henri Breuil, 1952 *Four hundred centuries of cave art, by abbe h. breuil* Abbe h Breuil, Palaeolithic Cave Art at Creswell Crags in European Context Sergio

Ripoll, 2007-03-29 This comprehensively illustrated book presents the Creswell art itself the archaeology of the caves and the region and the context of the Upper Palaeolithic era in Britain as well as a number of studies of Palaeolithic cave art in Spain Portugal France and Italy *Interpreting Sapiens' Consciousness through Paleolithic Cave Art* Gary J. Maier, 2023-08-08

This book is the first to identify an interpretive path through Paleolithic cave art that can provide plausible meaning to the animal figures in the Lascaux cave in France The artwork was created during a period described as the Creative Explosion spanning from 35 000 to 11 000 BC The author has found that the artists or shamans have left clear evidence of aspects of their worldview and by using ethological evidence such as a bison shedding its winter coat to identify spring as the season portrayed in a specific panel he adds a level of certainty to his interpretations In sum this book argues that the cave art describes the journey of the soul from the spirit world to the natural world and back and that it identifies a spectrum of consciousness involving the five traditional senses sight smell touch taste and hearing Moreover the book explores the hunting strategies employed early survival groups which are depicted in the cave art The role of the shamans impact on the artwork is also addressed Cave Paintings and the Human Spirit David S. Whitley, 2009-09-25 Whitley one of the world s

leading experts on cave paintings rewrites the understanding of shamanism and its connection with artistic creativity myth and religion by interweaving archaeological evidence with the latest findings of cutting edge neuroscience *Master Plan* Heather Pringle, 2006-02-15 A fascinating volume detailing the Nazis crackpot theories about prehistory and the Indiana Jones style lengths they went to prove them Publishers Weekly In 1935 Heinrich Himmler established a Nazi research institute called The Ahnenerbe whose mission was to send teams of scholars around the world to search for proof of ancient Aryan conquests But history was not their most important focus Rather the Ahnenerbe was an essential part of Himmler s master plan for the Final Solution The findings of the institute were used to convince armies of SS men that they were entitled to slaughter Jews and other groups And Himmler also hoped to use the research as a blueprint for the breeding of a new Europe in a racially purer mold The Master Plan is a groundbreaking expose of the work of German scientists and scholars who allowed their research to be warped to justify extermination and who directly participated in the slaughter many of whom resumed their academic positions at war s end It is based on Heather Pringle s extensive original research including previously ignored archival material and unpublished photographs and interviews with living members of the institute and their survivors A sweeping history told with the drama of fiction The Master Plan is at once horrifying

transfixing and monumentally important to our comprehension of how something as unimaginable as the Holocaust could have progressed from fantasy to reality Pringle's engrossing book explores a little known corner of Nazi history the story of the Ahnenerbe rich in such bizarre characters ridiculous theories and colorful anecdotes Massively researched and engagingly written The Daily Telegraph

Replications Whitney Davis, 2010-11-01 The twelve interdisciplinary essays collected here explore what Whitney Davis calls replication in archaeology art history and psychoanalysis the sequential production of similar artifacts or images substitutable for one another in specific contexts of use Davis suggests that while archaeology deals with the physics of replication its material conditions and constraints psychoanalysis deals with the psychics of replication its mental conditions and constraints Because art history is equally interested in the material properties and in the personal and cultural meaning of artifacts and images it can mediate the interests of archaeology and psychoanalysis Thus Replications explores not only the differences between but also the common ground shared by archaeology art history and psychoanalysis focusing for example on their mutual interest in the style of artifacts or image making their need to treat the nonintentional or nonmeaningful element in production and their models of the subjective and social transmission of replications in the life history of persons and communities Replications is an original contribution to an emerging field of study in domains as diverse as philosophy cognitive science connoisseurship and cultural studies the intersection of the material and the meaningful in the human production of artifacts Davis develops formal models for and theories about this relationship exploring the ideas of a number of philosophers historians and critics and presenting his own distinctive conceptual analysis

Sacred Darkness Holley Moyes, 2012-09-01 Caves have been used in various ways across human society but despite the persistence within popular culture of the iconic caveman deep caves were never used primarily as habitation sites for early humans Rather in both ancient and contemporary contexts caves have served primarily as ritual spaces In Sacred Darkness contributors use archaeological evidence as well as ethnographic studies of modern ritual practices to envision the cave as place of spiritual and ideological power and a potent venue for ritual practice Covering the ritual use of caves in Europe Asia Australia Africa Mesoamerica and the US Southwest and Eastern woodlands this book brings together case studies by prominent scholars whose research spans from the Paleolithic period to the present day These contributions demonstrate that cave sites are as fruitful as surface contexts in promoting the understanding of both ancient and modern religious beliefs and practices This state of the art survey of ritual cave use will be one of the most valuable resources for understanding the role of caves in studies of religion sacred landscape or cosmology and a must read for any archaeologist interested in caves
