Berlin, 1984-04-30 Defining a rhetoric as a social invention arising out of a particular time place and set of circumstances Berlin notes that no rhetoric not Plato's or Aristotle's or Quintilian's or Perelman's is permanent At any given time several rhetorics vie for supremacy with each attracting adherents representing various views of reality expressed through a rhetoric Traditionally rhetoric has been seen as based on four interacting elements reality writer or speaker audience and language As emphasis shifts from one element to another or as the interaction between elements changes or as the definitions of the elements change rhetoric changes This alters prevailing views on such important questions as what is appearance what is reality In this interpretive study Berlin classifies the three 19th century rhetorics as classical psychological epistemological and romantic a uniquely American development growing out of the transcendental movement In each case studying the rhetoric provides insight into society and the beliefs of the people *The Pedagogy of Consciousness* Nadira

Jack, 2020-04-14 Integrating experience and observations with theoretical ideologies and philosophical dispositions the author provides a refreshing methodology and vision to the development of curriculum and instruction for administrative leaders educators and policymakers in an urban education setting Collectively combining her administrative and instructional experience as an educator principal and superintendent she shares with readers a new pedagogical approach that emphasizes principles of collaboration and co investigation among educators and students to explore universal life lessons and confront systemic oppression that impact urban youth The Pedagogy of Consciousness is one that emphasizes a humanizing approach to education with balanced partnerships and shared connections among educators and students The promise of this compelling model is that it collectively revitalizes a broken disenfranchised system while demonstrating the capacity to revolutionize urban education and transform lives The book opens up with a historical analysis of education beginning with its inception and culminating with its present state of affairs confronting systemic inequities and modes of standardization that still permeate today The author provokes administrative leaders and educators to value student diversity and rethink the architecture of the traditional school systems by placing students at the forefront of their education through the co development of curriculum and learning themes that impact their lives on a daily basis The Pedagogy of Consciousness provides innovative measures for educators and students alike to recognize the excellence that they were born with The model which is based on the dynamic disposition of education as a fluid organic process highlights relationship building among educators and students as a core element necessary to create a classroom culture based upon facets of loyalty trust

and mutual respect To this end educators and students investigate issues that affect their lives on a daily basis to experience self growth and liberation that ultimately transcends into a shift in perception thoughts and action Embedded in the model is also the use of coping mechanisms and daily affirmations that allow students to recognize the highest form of one's inner consciousness The author demonstrates the importance of leading educational reform through teaching students that they are pillars of their own success

**Driving Desired Futures** Michael Shamiyeh, 2014-01-23 Headed by the slogan Design Thinking a debate has unfolded over the last ten years about design methods which goes far beyond the specialist boundaries of design disciplines Executives and business owners today recognize the potential for economic innovation lying in the creative and analytical mindset of designers The extensive literature available on Design Thinking focuses on the methodology of the design process while the conditions necessary to spark innovation processes in the first place have long remained more or less unnoticed Driving Desired Futures starts here and asks how established innovations arise from a simple idea What criteria are mostly likely to be the basis from which the ideas of an individual can take hold in a social system What are conditions under which they can become incorporated into a diverse group of people What topics induce managers to choose and then to invest in a specific idea Questions such as these are pursued in international contributions by renowned experts using the first digital camera as a case study They identify the individual and social processes associated with the exchange and implementation of new ideas

**Catalog of Copyright Entries. Third Series** Library of Congress. Copyright Office, 1957 *Christian Education: Its History and Philosophy* Kenneth O. Gangel, Warren S. Benson, 2002-03-05 A history of Christian education must not be confused with a record of the achievements of the Sunday School The discipline has advanced well beyond that stage

and today's sophisticated students fully understand that no proper concept of the history and philosophy of Christian education can be gained without seeing all the ramifications, implications and influences that have affected it from pre-Christian times to the present. So Drs Gangel and Benson have written this book a historical flow of philosophical thought from a Christian point of view. Its focus is cultural biographical, discussing each philosophy in its particular socio-historical setting and giving special attention to significant individuals. The format is chronological, beginning with education in biblical times, working upward through history to arrive at the present and beyond, raising questions and issues for the future.

*Third Conference on Empirical Research in Black Psychology*, 1977. **Philosophical Foundations of Education** Siddheshwar Rameshwar Bhatt, 2018-07-16. This book provides a philosophical foundation to the theory and practice of education from the Indian perspective. It is guided by an axionoeitic approach to education and therefore it deals with the epistemological foundation and value orientation of education. The author discusses the ontological, epistemological, logical, ethical and axiological bases of education in a holistic and integrated manner. The author maintains that education is a planned, methodical and purposive enhancement of human potentialities as a natural development. This presupposes correct and adequate formulation of the objectives and goals of education as per the needs and aspirations of pupils. Education also equips individuals for a good quality of life. Keeping in view the applied dimension of philosophy, this book analyses practical issues of moral education like character building, value negativism in the context of education. It also deals with issues concerning peace, sustainable development, sustainable judicious consumption etc which should have a bearing on educational policies and programmes.

**Education, Democracy, and Public Knowledge** Elizabeth A. Kelly, 2019-03-04. This timely volume explores the present day implications of the traditional American belief in public education as a vehicle for extending democratic politics. In light of the current debates about public schools, are they still the key to upward mobility? Can they still serve to create a civic consciousness? Elizabeth A. Kelly defends the role of public education against its critics and throws light on such issues as privatization, voucher systems, the role of public intellectuals, critical literacy and educational reform. She unabashedly offers a renewed vision of public schooling as the locus of public knowledge and political democracy, a vision that will appeal to those

who are not prepared to abandon the ideals of either democracy or public education Generously conceived clearly argued and gracefully written Education Democracy and Public Knowledge is important reading not just for students of democracy and of education but for all those concerned with the future of American education
