*Four-Dimensional Realism* Simon Marinberg, 1992-12-01      *The Fourth Dimension and Non-Euclidean Geometry in Modern Art, revised edition* Linda Dalrymple Henderson, 2018-05-18 The long awaited new edition of a groundbreaking work on the impact of alternative concepts of space on modern art In this groundbreaking study first published in 1983 and unavailable for over a decade Linda Dalrymple Henderson demonstrates that two concepts of space beyond immediate perception the curved spaces of non Euclidean geometry and most important a higher fourth dimension of space were central to the development of modern art The possibility of a spatial fourth dimension suggested that our world might be merely a shadow or section of a higher dimensional existence That iconoclastic idea encouraged radical innovation by a variety of early twentieth century artists ranging from French Cubists Italian Futurists and Marcel Duchamp to Max Weber Kazimir Malevich and the artists of De Stijl and Surrealism In an extensive new Reintroduction Henderson surveys the impact of interest in higher dimensions of space in art and culture from the 1950s to 2000 Although largely eclipsed by relativity theory beginning in the 1920s the spatial fourth dimension experienced a resurgence during the later 1950s and 1960s In a remarkable turn of events it has returned as an important theme in contemporary culture in the wake of the emergence in the 1980s of both string theory in physics with its ten or eleven dimensional universes and computer graphics Henderson demonstrates the importance of this new conception of space for figures ranging from Buckminster Fuller Robert Smithson and the Park Place Gallery group in the 1960s to Tony Robbin and digital architect Marcos Novak      **Applications of 3-D and 4-D Visualization Technology in Transportation** Harlow C. the performance of disability between the early modern period and our own      Duchamp and the Aesthetics of Chance Herbert Molderings, 2010-05-31 Marcel Duchamp is often viewed as an artist engineer scientist a kind of rationalist who relied heavily on the ideas of the French mathematician and philosopher Henri Poincaré Yet a complete portrait of Duchamp and his multiple influences draws a different picture In his 3 Standard Stoppages 1913 1914 a work that uses chance as an artistic medium we see how far Duchamp subverted scientism in favor of a radical individualistic aesthetic and experimental vision Unlike the Dadaists Duchamp did more than dismiss or negate the authority of science He pushed scientific rationalism to the point where its claims broke down and alternative truths were allowed to emerge With humor and irony Duchamp undertook a method of artistic research reflection and visual thought that focused less on beauty than on the notion of the possible He became a passionate advocate of the power of invention and thinking things that had never been thought before The 3 Standard Stoppages is the ultimate realization of the play between chance and dimension visibility and invisibility high and low art and art and anti art Situating Duchamp firmly within the literature and philosophy of his time Herbert Molderings recaptures the spirit of a frequently misread artist and his thrilling aesthetic of chance      Dimensions.
