Novel Treatment of Epilepsy Humberto Foyaca Sibat, 2011-09-22 Epilepsy continues to be a major health problem throughout the planet affecting millions of people mainly in developing countries where parasitic zoonoses are more common and cysticercosis as a leading cause is endemic There is epidemiological evidence for an increasing prevalence of epilepsy throughout the world and evidence of increasing morbidity and mortality in many countries as a consequence of higher incidence of infectious diseases head injury and stroke We decided to edit this book because we identified another way to approach this problem covering aspects of the treatment of epilepsy based on the most recent technological results in vitro from developed countries and the basic treatment of epilepsy at the primary care level in rural areas of South Africa Therefore apart from the classic issues that cannot be missing in any book about epilepsy we introduced novel aspects related with epilepsy and neurocysticercosis as a leading cause of epilepsy in developing countries Many experts from the field of epilepsy worked hard on this publication to provide valuable updated information about the treatment of epilepsy and other related problems Proceedings of Fourth International Conference on Computing and Communication Networks

Book of the Fourth World Gordon Brotherston, 1995-11-24 The Book of the Fourth World offers detailed analyses of texts that range far back into the centuries of civilised life from what is now Latin and Anglo America At the time of its discovery the American continent was identified as the Fourth World of our planet In the course of just a few centuries its original inhabitants though settled there for millennia and countable in many millions have come to be perceived as a marginal if not entirely dispensable factor in the continent's destiny Today the term has been taken up again by its native peoples to describe their own world both its threatened present condition and its political history which stretches back thousands of years before Columbus In order to explore the literature of this world Brotherston uses primary sources that have traditionally been ignored because they have not conformed to Western definitions of oral and written literature such as the scrolls of the Algonkin the knotted strings Quipus of the Inca Navajo dry paintings and the encyclopedic pages of Meso America's screenfold books Lower Hall. Commentary on Books 3 and 4 of Achilles Tatius' Leucippe and Clitophon John L. Hilton, 2024-02-26 This volume presents a new account informed by recent scholarship on ancient narrative fiction of a world that calls to mind the scenes of the Palestrina mosaic with ships traversing the Nile delta hippopotamus hunting religious processions and festivities and leisurely sightseeing The commentary argues that the author was most probably an erudite Alexandrian with a polymathic interest in topics as diverse as the arrival of the phoenix in Heliopolis contemporary art medical theories of the function of blood in causing psychological imbalances in the young herbal remedies for poisoning and the colour of Nile water in glass
