Applied Impact Mechanics C. Lakshmana Rao,V. Narayanamurthy,K. R. Y. Simha,2016-06-13 This book is intended to help the reader understand impact phenomena as a focused application of diverse topics such as rigid body dynamics structural dynamics contact and continuum mechanics shock and vibration wave propagation and material modelling It emphasizes the need for a proper assessment of sophisticated experimental computational tools promoted widely in contemporary design A unique feature of the book is its presentation of several examples and exercises to aid further understanding of the physics and mathematics of impact process from first principles in a way that is simple to follow

Applied Mechanics Reviews ,1973 **Proceedings of an international conference on Dynamic Crack Propagation** George C. Sih,2013-06-29 The planning meeting for a conference on Dynamic Crack Propagation was held at MIT in February 1971 and attended by research workers from several industrial governmental and academic organizations It was felt that a more specialized meeting would provide a better opportunity for both U S and foreign researchers to exchange their ideas and views on dynamic fracture a subject which is seldom emphasized in national or international fracture conferences Dynamic crack propagation has been a concern to specialists in many fields continuum mechanics metallurgy geology polymer chemistry orthopedics applied mathematics as well as structural design and testing It impinges on a wide variety of problems such as rock breaking and earthquakes pressure vessels and line pipes comminution and the performance of armament and ordnance etc Advances have been numerous covering theories and experiments from both the microscopic and macroscopic points of view Hence the need for comparing the theoretical and experimental results and bridging the gaps between the atomistic and continuum approaches must be constantly emphasized It also appeared that the overall problem of dynamic fracture could benefit from a consolidation of crack models proposed for the various types of materials metals ceramics composites rocks glasses polymers and biomaterials *NASA Technical Paper* ,1990 **NASA Technical Paper** United States.
