foresee the amount of time this revision would need In fact it took more than 3 years to follow up the larger number of cases and 159 patients out of 800 i e 22.7% were not included as they had moved since their last review and simply could not be located At a time when it is in fashion to evaluate the cost of health care it is strange to see how public administrators so keen on evaluating the immediate cost of our operations do not care about the quality of their long term results which appears to us however to be the best basis for the choice of the initial treatment
