triggered the global rainforest movement and illuminated for the first time how vital rainforests are to our planet For 15 months Hanbury Tenison and a team of some of the greatest scientists in the world immersed themselves in a place and a way of life that is on the cusp of extinction Much of what was once a wildlife paradise is now a monocultural desert devastated by logging and the forced settlement of nomadic tribes where traditional ways of life and unimaginably rich and diverse species are slowly being driven to extinction This is a story for our time one that reminds us of the fragility of our planet and of the urgent need to preserve the last untamed places of the world *Kaapse bibliotekaris* ,1990 Issues for Nov 1957 include section Accessions Aanwinste Sept 1957 **International Who's Who of Authors and Writers 2004**
