Trade, Aid and Global Interdependence George Cho, 1995 Presents a concise analysis of the complex interrelationships between trade aid and development The world s shifting patterns of trade is illustrated with case studies from Asia Africa and Central and Latin America

Tourism and Development Richard Sharpley, David J. Telfer, 2002-04-30 The development of tourism is frequently justified on the basis of its potential contribution to the broader socio economic development of destination areas Indeed tourism is generally considered an effective vehicle of development yet the meaning and objectives of development and the extent to which it can be achieved through tourism is rarely questioned Moreover the relationship between tourism and development remains an under represented area of study and research This book addresses this gap in the literature by challenging many of the widelyheld assumptions about tourism s developmental contribution In the first part a theoretical link is established between the discrete yet interconnected disciplines of tourism studies and development studies More specifically the meaning of development and successive development paradigms are considered within the context of tourism This provides a conceptual foundation for the second part of the book which addresses a number of fundamental issues related to tourism s potential contribution to development These include issues of economic development regional development socio cultural development and environmental development Finally the third part focuses upon barriers to tourism induced development arguing that a new political economy of tourism the consumption of tourism and the dominance of the sustainable development paradigm represent significant counterpoints to overly simplistic models of tourism s potential contribution to development

Balkan Worlds: The First and Last Europe Traian Stoianovich, 2015-05-20 Encompassing the period from the Neolithic era to the troubled present this book studies the peoples societies and cultures of the area situated between the Adriatic Sea in the west and the Black Sea in the east between the Alpine region and Danube basin in the north and the Aegean Sea in the south This is not a conventional history of the Balkans Drawing upon archaeology anthropology economics psychology and linguistics as well as history the author has attempted a total history that integrates as many as possible of the avenues and categories of the Balkan experience

Routledge Encyclopedia of International Political Economy R. J. Barry Jones, 2002-09-11 This three volume Encyclopedia offers the first comprehensive and authoritative survey of the rapidly developing field of international political

economy Its entries cover the major theoretical issues and analytical approaches within the field The set also provides detailed discussion of the contributions of key individuals and surveys a wide range of empirical conditions and developments within the global political economy including its major institutions The Encyclopedia has been designed to be eclectic in approach and wide ranging in coverage Theoretical entries range from discussions of the definition and scope of the field through core methodological questions such as rationalism and the structure agent problem to surveys of the major theories and approaches employed in the study of the international political economy

Value and the World Economy Today R. Westra,A. Zuege,2003-11-30 Value and the World Economy Today brings together a diverse group of globally renowned scholars of international political economy and critical economics to examine the relevance of value theory for understanding the world economy today The book is unique in the way that it connects literatures that have for the most part developed in isolation from each other and therefore brings questions of theory to bear directly upon the problems of analyzing current global trends and formulating responses to them

Regions in Recession and Resurgence Michael Chisholm,2015-03-27 The world economy has undergone rapid evolution in recent decades along with changes in the importance of industries and their organization and sharp changes in the fortunes of regions There are differences of opinion regarding the mainsprings of change and development and the role of governments in fostering national output In order to show the relevance of these changes to regional economies the book focuses on the different schools of economic thought from the neo classical through Keynesian to Marxist radical ideas and monetarist supply side thinking providing a brief description of their structure in non spatial terms The way these theories map into contrasting ideas regarding the mechanisms of regional economic growth is then explained The book concentrates on developed economies and explicitly seeks to confront theory with fact fact with theory Bringing together non spatial economic theory regional growth theory and relevant empirical data this book is intended for students in geography and regional economics but will also be of interest for those studying politics and government

Routledge Library Editions: Economic Geography Various,2021-06-23 The books in this set originally published between 1968 and 1992 introduce the reader to the many lines of thought in the literature on economic geography and tie these various aspects together within the concept of the economy As well as providing a comprehensive overview of the Western European economy since the Second World War and including specific studies and assessments of the Dutch and Italian economies these volumes examine the economic factors that have shaped cities and patterns of urbanization

The State and the International Oil Market C. van der Linde,2012-12-06 Abbreviations ix Chapter 1 INTRODUCTION 1 Chapter 2 REDRAWING THE BOUNDARIES BETWEEN STATE AND COMPANY 3 Chapter 3 STATE PARTICIPATION IN THE ECONOMY 25 Chapter 4 INTERNATIONAL ECONOMIC INSTABILITY 49 Chapter 5 THE FAILURE OF OPEC TO SECURE ECONOMIC RENTS 67 Chapter 6 TURNING BLACK GOLD INTO DEVELOPMENT 81 Chapter 7 NATIONAL OIL COMPANIES 97 Chapter 8 AMBITIOUS CONSOLIDATION 127 Chapter 9 STRATEGIC CONSOLIDATION 151 References 155 Index 165

PREFACE This book has been kicking around my desk for quite some time On and off I returned to my work on the role of the state in the economy and the international oil market but for a long time I was not satisfied with the shape it was in I understand now that I needed the insights developed over the past couple of years on the role of the state regulation liberalization privatization and the recent events in the international oil industry to bring all my ideas together in a more coherent format It was the events that followed the Asian financial crisis that drew me back to finish writing this book The early beginnings of this book were developed at the Institute of International Affairs Chatham House in London where I was a research fellow with the Energy and Environment Programme in 1992 and 1993 At the Colorado School of Mines I had the opportunity to test my ideas in a graduate class and continue the research

International Political Economy Raymond C. Miller, 2008-09-03 This textbook is the perfect short introduction to the fundamental theories and issues of international political economy IPE Written in a concise and accessible style the text equips students with the necessary skills and knowledge to understand this complex and fascinating area Engaging with both classical theories and the main contemporary debates this is the ideal starting point for the study of IPE The text introduces students to the three main theoretical approaches in IPE free market institutionalist and historical materialist The strengths and weaknesses of the theories are then illustrated by a series of fascinating applied case studies in such core areas as international trade finance transnational corporations development and the environment Combining clear historical and theoretical explanation with detailed empirical examples this is essential reading for students of international political economy global governance and international economics

Industrializing Malaysia K. S. Jomo, 2013-05-13 Despite growing concern over environmental issues and the sustainability of economic growth industrialization is still generally associated with progress and development This is particularly true of developing countries where industrialization is often the nation's top priority *Industrializing Malaysia* presents a critical analysis of the experience of industrialization in Malaysia examining the role impact and efficacy of post independence industrialization policies The author refocuses attention on some major intended as well as unintended implications and consequences of policies and performance A wide range of issues is covered in addition to general historical commentaries and sectoral studies there are analyses of direct foreign investment technology linkages free trade zones industrial estates and rural development

Globalisation and Interdependence in the International Political Economy R. J. Barry Jones, 2013-11-07 *Globalisation and Interdependence in the International Political Economy* addresses central developments within the contemporary international system The notions of interdependence and globalisation that have accompanied the political discourse of a new world disorder are replete with definitional ambiguities theoretical difficulties and empirical complexities Barry Jones offers a critical review and analysis of these concepts their significance and place within the wider debates of international political economy He argues that contemporary conditions are complex with regionalising tendencies cross cutting those of increasing globalisation and national impulses surviving even in the face

of powerful internationalising forces Future developments it is concluded may also be far more uncertain and turbulent than is widely anticipated Written by a leading authority this volume is an effective and compelling introduction to the complex study of international political economy Where North Meets South Lawrence A. Herzog,1990 This book embraces an emerging paradox of human geography the growth of cities along international boundaries For many years the world system was ordered in such a way that international boundaries remained essentially free of human settlement In the last three decades however the axioms of traditional geopolitical organization have been shattered in a number of areas in the world including the United States Mexico United States Canada and western European border regions boundaries have come to house large scale cities From Preface page xi **Asian Industrialization and Africa** Howard Stein,1995-06-18 Drawing on case studies from the industrialization of East and Southeast Asian nations this text critically examines the structural adjustment policies used in Africa since the 1980s The Asian country studies include Singapore Malaysia Taiwan South Korea Hong Kong and Meiji Japan *The Geography of the World Economy 5th Edition* Paul Knox,John Agnew,Linda McCarthy,2014-04-04 The Geography of the World Economy provides an in depth and stimulating introduction to the globalization of the world economy The book offers a consideration of local regional national and global economic development over the long historical term The theory and practice of economic and political geography provide a basis for understanding the interactions within and among the developed and developing countries of the world Illustrated in colour throughout this new edition has been completely reworked and updated to take account of the substantial changes in the world economy and includes a new chapter on services It is ideal for upper level university undergraduates and for post graduates in a variety of specializations including geography economics political science international relations and global studies Value and Unequal Exchange in International Trade Andrea Ricci,2021-05-19 Contrary to the claims made by neoliberal governments and mainstream academics this book argues that the huge increase in trade in recent decades has not made the world a fairer place instead the age of globalization has become a time of mass migration caused by increasing global inequality The theory of unequal exchange challenges the free trade doctrine claiming that transfers of value from poorer to richer countries are hidden behind apparently equivalent market transactions Following a critical review of the existing approaches the book proposes a general theory of unequal exchange in the light of an innovative reconstruction of Marx s international law of value in which money and exchange rates play a crucial role in decoupling value captured from value produced by different countries even in perfectly competitive world markets On this theoretical basis the book provides an empirical analysis of the international transfers of value in both traditional trade and Global Value Chains The resulting world mapping of unequal exchange shows the geographical hierarchy of capital global exploitation by revealing a world divided into two quite separate camps of donor and receiving countries the former being the poorer countries and the latter the richer countries This book is addressed to scholars and students of economics and social sciences as well as activists of

the North and the South interested in a better understanding of the asymmetric power relations implied in global trade It makes a significant contribution to the literature on political economy trade Marxism international relations and economic geography

Economic and Trade Policies in the Arab World Mahmoud Elkhafif,Sahar Taghdisi-Rad,Mutasim Elagraa,2012-05-04 The Arab Spring and recent popular uprisings that have taken place in many Arab countries since the end of 2010 highlight the urgent need for economic policy reorientation in these countries This book addresses key issues relevant to the contemporary economic realities of the Arab economies including policy space generation of more productive and decent employment social justice and poverty alleviation regional integration and the common destiny of the Arab people and the failure of the structural adjustment programs recommended by the Bretton Woods institutions and implemented in these countries in the last three decades The volume explores and makes recommendations for deep pan Arab regional integration and alternative pro poor growth oriented economic and trade policies capable of promoting social justice by reducing the incidence of poverty It highlights the ways in which various types of economic and trade policies have affected the levels of employment and poverty in five Arab countries Egypt Jordan Morocco the occupied Palestinian territory and Sudan Using a mixture of qualitative and quantitative methodologies the book focuses on Arab trade integration exploring the obstacles to its implementation in the past as well as its potentials as a source of employment generation and enhancement of living conditions The book also addresses the construction interpretation and use of quantitative trade indicators for optimal policy choice at both the domestic and regional levels

Economics of Change in Less Developed Countries David Colman,F. I. Nixon,1986-01-01 The comprehensive range of topics includes the concept and measurement of development economic theory and development economic quality and development human resource development international trade foreign exchange flows and indebtedness agricultural transformation and development industrial development the transnational corporation the transformation of technology inflation stabilization and the IMF A classic book modernized for contemporary study

The Oxford Handbook of Economic Imperialism Zak Cope,Immanuel Ness,2022 Including thirty four chapters written by academics and experts in the field of international political economy The Oxford Handbook of Economic Imperialism examines the history of economic imperialism from the early modern age to the present The Handbook demonstrates the persistence of economic imperialism in today s postcolonial world and the enduring control wielded by great powers even after the end of formal empire Moreover the Handbook reveals how emerging powers are expanding economic control in new geographic and geopolitical contexts and highlights the significance of economic imperialism in the structures relations processes and ideas that sustain poverty and conflict worldwide
