knowledge about the oceans created through work and play scientific investigation and also through human ambitions for profiting from the sea has played a central role in defining our relationship with this vast trackless and opaque place It has helped us to exploit marine resources control ocean space extend imperial or national power and attempt to refashion the sea into a more tractable arena for human activity But while deepening knowledge of the ocean has animated and strengthened connections between people and the world s seas to understand this history we must address questions of how by whom and why knowledge of the ocean was created and used and how we create and use this knowledge today Only then can we can forge a healthier relationship with our future sea
