Philosophy      **Documentary and Stereotypes** Catalin Brylla, 2023-08-22 This book studies how documentaries and factual media in general can contribute to the reduction of social stigma and prejudice. It adopts models from social psychology, media studies and cultural studies and is intended for scholars and media makers who aim to increase social inclusion and diversity by deconstructing harmful boundaries between social groups. Such boundaries may be based on the stereotyping of ethnicity, culture, age, disability, gender and sexual orientation, for example. The first part of the book outlines the functionality of stereotypes as essential processes for social cognition both in real life and during documentary viewing. The second part establishes a classification system for stigmatising media stereotypes and formulates a methodology based on critical discourse analysis to analyse them in narrative and audio-visual representations. The third and final part of the book conceptualises a set of methodologies to reduce stigmatising stereotypes. These methodologies are based on 1 representations that prompt perspectival alignment with screen characters and 2 the perceived salience of multiple intersecting social identities.

*Digital Dialogues and Community 2.0* Tara Brabazon, 2012-04-25 *Digital Dialogue and Community 2.0* After avatars, trolls and puppets explores the communities that use digital platforms, portals and applications from daily life to build relationships beyond geographical locality and family links. The book provides detailed analyses of how technology realigns the boundaries between connection, consciousness and community. This book reveals that alongside every engaged, nurturing and supportive group are those who are excluded, marginalised, ridiculed or forgotten. It explores the argument that community is not an inevitable result of communication. Following an introduction from the Editor, the book is then divided into four sections exploring communities and resistance, structures of sharing, professional communication and fandom, and consumption. *Digital Dialogues and Community 2.0* combines ethnographic methods and professional expertise to open new spaces for thinking about language, identity and social connections. Provides innovative interdisciplinary research incorporating Library and Information Management, Internet Studies, Cultural Studies, Media Studies, Disability Studies and Community Management. Offers a balanced approach between the bottom-up and top-down development of online communities. Demonstrates the consequences on the configuration of a community when consumers become producers and their lives and experiences are commodified.
