Proving in the Elementary Mathematics Classroom Andreas J. Stylianides, 2016 Although proving is core to mathematics as a sense making activity it currently has a marginal place in elementary classrooms internationally Blending research with practical perspectives this book addresses what it would take to elevate the place of proving at elementary school The book uses classroom episodes from two countries to examine different kinds of proving tasks and the proving activity they can generate in the elementary classroom It examines further the role of teachers in mediating the relationship between proving tasks and proving activity including major mathematical and pedagogical issues that arise for teachers as they implement each kind of proving task In addition to its contribution to research knowledge the book has important implications for teaching curricular resources and teacher education **Getting MORE Excited About USING Data** Edie L. Holcomb, 2017-02-23 Put data to WORK to better meet the needs of all students Have you become hyper focused on state tests Do you have important data collected warehoused and gathering dust The time has come to dust off that data and put it to work for your students The new reporting requirements under ESSA combined with the flexibility to act on that data provide a huge opportunity for education leaders This is your opportunity to rebuild data processes and rekindle excitement about using data for school and student growth Getting MORE Excited About USING Data addresses both cultural and technical aspects of using data starting with underlying beliefs about students assessment and individual and collective teacher efficacy This updated edition features Guiding questions and protocols for effective professional learning communities shared leadership teams and subject grade teaching teams New material on the use of formative assessment in schoolwide planning and instructional design Renewed focus on the role of students Tips on the electronic challenges of storage retrieval privacy and security Real life examples from schools and districts ranging from specific data displays to sustained long term change The straightforward language adaptable models and focus on human elements make Getting MORE Excited about USING Data an essential resource for every leader The time is now to use data to establish a collaborative culture with student success at its core Holcomb leads educators to use data as a catalyst to foster their passion

for continuous learning I highly recommend her pragmatic approach in looking at data as a means to stir the hearts and minds of educators for the sake of our future human resources the students we serve Kathy Larson Author Coaching for Infinite Results This book is full of practical supports resources and illustrations It is well grounded in the work of schools and the importance of data to that mission Megan Tschannen Moran Professor of Educational Leadership College of William Mary Williamsburg VA The Australian Mathematics Teacher ,1995 **Describing Learning** Australian Council for Educational Research,1997 Major changes in the emphases of education programs in Australian schools have occurred since 1986 The states and territories collaborated to define the general content for a national curriculum in eight key learning areas At the same time they developed a common framework for describing what students have learned in relation to that curriculum This report presents a comprehensive picture of the key people decisions events problems and successes as the states and territories embarked on making the new outcomes based approach a reality for teachers and students The book contains a detailed chapter from each state and territory education system results from a 1996 national survey of principals and teachers commentary and insights collected from teachers during school visits and evidence and examples of best practice implementation strategies Exploring the Integer Addition and Subtraction Landscape Laura Bofferding,Nicole M. Wessman-Enzinger,2018-08-24 Over the past few decades there has been increased interest in how students and teachers think and learn about negative numbers from a variety of perspectives In particular there has been debate about when integers should be taught and how to teach them to best support students learning This book brings together recent work from researchers to illuminate the state of our understanding about issues related to integer addition and subtraction with a goal of highlighting how the variety of perspectives support each other or contribute to the field in unique ways In particular this book focuses on three main areas of integer work students thinking models and metaphors and teachers thinking Each chapter highlights a theoretically guided study centered on integer addition and subtraction Internationally known scholars help connect the perspectives and offer additional insights through section commentaries This book is an invaluable resource to those who are interested in mathematics education and numerical thinking *Developing Numeracy in the Secondary School* Howard Tanner,Sonia Jones,Alyson Davies,2020-03-26 As the National Numeracy Strategy NNS extends into secondary schools this book for trainee and practicing mathematics teachers provides practical guidance on developing effective strategies for the teaching of numeracy at KS3 and 4 based on the DfEE requirements The teaching and learning approaches suggested in the NNS are analyzed and explained using case study examples from secondary schools Many of these ideas were developed by teacher inquiry groups in the Raising Standards in Numeracy project The book includes examples of pupils work lesson plans and pupil activities ideas for using ICT to enhance mathematics teacher guidance on both teaching and assessment and ideas for developing numeracy across the curriculum This book offers an introduction to the subject of numeracy accompanied by lesson ideas and practical guidance It will prove a valuable resource for all trainee
