France 1800 1914 A Social History:

France, 1800-1914 Roger Magraw, 2014-07-22 Nineteenth century France was a society of apparent paradoxes It is famous for periodic and bloody revolutionary upheavals for class conflict and for religious disputes yet it was marked by relative demographic stability gradual urbanisation and modest economic change class conflict and ongoing religious and cultural tensions Incorporating much recent research Roger Magraw draws both upon still valuable insights derived from the new social history of the 1960s and upon more recent approaches suggested by gender history cultural anthropology and the linguistic turn *The Politics of Sex, Race and Working-Class Slang in Late Second Empire French Caricature* Russell Stephens, 2025-08-11 This study examines caricatures as they appeared within popular Parisian magazines in mid 19th century France at the time of the 1867 World's Fair Chapters compare the comic mockery of several of the most important satirists of this time including Am d e de No or Cham 1818 1879 as he was more popularly known and Honor Daumier 1808 1879 A major theme within the analysis is how these caricaturists secretly used argot street slang as documented in two slang dictionaries by Parisian litterateur Alfred Delvau 1825 1867 within their comic images to carry hidden encrypted messages in order to evade the censorship of the day The book focuses primarily on caricatures of Chinese visitors who were part of the 1866 diplomatic visit to Paris and images of Chinese at the 1867 Exposition Universelle showing how the satires which were published by Cham used argot to create highly sexualised images that were often racist in nature In contrast the volume proposes that Daumier used slang in his caricatures to challenge racism and to make secret reference to current political leaders and politics The book will be of interest to scholars working in art history visual culture media studies and communication studies **Bibliography of European Economic and Social History** Derek Howard Aldcroft, Richard Rodger, 1993 This bibliographical guide contains 10 000 references to the economic and social history of 30 European countries during the period 1700 1939 More than 3000 periodicals have been consulted to obtain references as well as books edited collections and conference proceedings The information is listed in categories such as industry agriculture finance migration labour conditions urban communities and organizations Full publication details are included so that references may be located easily *French Early Socialists 1790s-1870s* Pamela Pilbeam, 2025-03-05 This new edition is an updated assessment of the ideas and strategies of early French socialists incorporating recent research which observes the practical and scientific nature of socialist proposals The second edition provides increased coverage of women's contributions including the important roles of activists like Flora Tristan and Jeanne Deroin socialist women's newspapers schools run by women and the demand for suffrage in 1848 There is also further emphasis on socialist experiments in France's new colony Algeria and on transnational connections particularly with Owen in Britain and Fourierist communities in North America Association still figures prominently as the solution to the social and economic problems created by modernisation and capitalist exploitation It took a variety of forms from Fourier's proposal that private finance create profit sharing

communities to Leroux's practical cooperative venture at Boussac through Blanc and Considérant's demands for state initiative to set up worker alternatives to capitalism. The democratic republic of 1848 gave socialists the opportunity to engage in politics and despite the setbacks of the Second Empire socialists were set on a parliamentary route in which they still have a presence. **French Early Socialists 1790s-1870s** is an engaging resource for students and scholars in histories of France, politics and gender.

Alfred Loisy and the Making of History of Religions Annelies Lannoy, 2020-08-10. This monograph studies the professionalization of History of religions as an academic discipline in late 19th and early 20th century France and Europe. Its common thread is the work of the French Modernist priest and later Professor of History of religions at the Collège de France Alfred Loisy (1857-1940) who participated in many of the most topical debates among French and international historians of religions. Unlike his well-studied Modernist theology, Loisy's writings on comparative religion and his rich interactions with famous scholars like F. Cumont, M. Mauss or J. G. Frazer remain largely unknown. This monograph is the first to paint a comprehensive picture of his career as a historian of religions before and after his excommunication in 1908. Through a contextual analysis of publications by Loisy and contemporaries and a large corpus of private correspondence, it illuminates the scientification of the discipline between 1890-1920 and its deep entanglement with religion, politics and society. Particular attention is also given to the role of national and transnational scholarly networks and the way they controlled the theoretical and institutional frameworks for studying the history of religions.

The French Second Empire Roger Price, 2001-11-15. This book is about a major historical figure, Napoleon III, and a political regime. It examines how Louis Napoleon Bonaparte, nephew of the first Napoleon, was able to secure election as President of the Republic and subsequently to launch a coup d'état to establish a Second Empire. It then considers the ways in which power was exercised by the new imperial regime. Later, apparent stability led Napoleon III to engage in a difficult process of transition towards a more liberal regime, but at the point of success the decision was taken to go to war against Prussia, which resulted in a catastrophic defeat and the destruction of his regime. This is a most thoroughly researched book on the Second Empire, which makes a contribution to our knowledge of a vitally important period of French history following the 1848 revolution and the intense mid-century crisis.

A Social History of England 1851-1990 Francois Bedarida, 2013-06-17. In this, the second edition of *A Social History of England*, Francois Bedarida has added a new final chapter on the last fifteen years. The book now traces the evolution of English society from the height of the British Empire to the dawn of the single European market. Making full use of the Annales school of French historiography, Bedarida takes his inquiry beyond conventional views to penetrate the attitudes, behaviour and psychology of the British people.

Rise of French Laïcité Stephen M. Davis, 2020-08-07. Americans are often baffled by France's general indifference to religion and laws forbidding religious symbols in public schools, full-face veils in public places and even the interdiction of burkinis on French beaches. An understanding of laïcité provides insight in beginning to understand France and its people. Laïcité has been described as the

complete secularization of institutions as a necessity to prevent a return to the Ancien Regime characterized by the union of church and state To understand the concept of laicite one must begin in the sixteenth century with the Protestant Reformation and freedom of conscience recognized by the Edict of Nantes in 1598 This has been called the period of incipient laicite in the toleration of Protestantism The Revocation of the Edict of Nantes in 1685 reestablished the union of the throne and altar which resulted in persecution of the Huguenots who fought for the principle of the freedom of conscience French laicite presents a specificity in origin definition and evolution which led to the official separation of church and state in 1905 The question in the early twentieth century concerned the Roman Catholic Church s compatibility with democracy That same question is being asked of Islam in the twenty first century

Sexual Crime, Religion and Masculinity in fin-de-siècle France Timothy Verhoeven, 2018-02-28 This book explores a vital though long neglected clash between republicans and Catholics that rocked fin de si cle France At its heart was a mysterious and shocking crime In Lille in 1899 the body of twelve year old Gaston Foveaux was discovered in a school run by a Catholic congregation the Fr res des coles Chr tiennes When his teacher Fr re Flamidien was charged with sexual assault and murder a local crime became a national scandal The Flamidien Affair shows that masculinity was a critical site of contest in the War of Two Frances pitting republicans against Catholics For republicans Flamidien s vow of chastity as well as his overwrought behaviour during the investigation made him the target of suspicion Catholics in turn constructed a rival vision of masculinity to exonerate the accused brother Both sides drew on the Dreyfus Affair to make their case

Amand Clive Scott Catriona Seth Judith Sribnai Joanna Stalnaker Aleksandar Stevi Kate E Tunstall Steven Ungar and Wes Williams **Global Crises and Social Movements** Edmund Burke, 2019-03-06 Traditionally scholars have traced the origins and characteristics of social movements to purely local and national determinants Until recently the global dimension of such movements has been relatively neglected This book takes the innovative step of linking social movements to international political and economic crises identifying the general features of industrial and developing societies that predispose them toward social movements of particular kinds The book consists of three parts views the origins of the European working class collective movement of 1848 from a variety of perspectives reexamines the debate on the moral economy of the peasant in terms of peasant nonrevolt and global political economy considers the emergence of fascist and populist movements in Western Europe and East Asia in their intersocietal dimensions Each of the cases has been selected for its strategic contribution to an understanding of the occurrence of social movements in relation to large scale societal crises Collectively the essays underscore the methodological utility of situating such movements in a global context **A Social History Of Women And Gender In The Modern Middle East** Margaret Lee Meriwether, 2018-02-12 Synthesizing the results of the extensive research on women and gender done over the last twenty years Margaret L Meriwether and Judith E Tucker provide an accessible overview of the scholarship on women and gender in the nineteenth and twentieth century Middle East The book is organized along thematic lines that reflect major focuses of research in this area gender and work gender and the state gender and law gender and religion and feminist movements and each chapter is written by a scholar who has done original research on the topic *Secularization and Religious Innovation in the North Atlantic World* David Hempton, Hugh McLeod, 2017-05-12 In the early twenty first century it had become a cliché that there was a God Gap between a more religious United States and a more secular Europe The apparent religious differences between the United States and western Europe continue to be a focus of intense and sometimes bitter debate between three of the main schools in the sociology of religion According to the influential Secularization Thesis secularization has been an integral part of the processes of modernisation in the Western world since around 1800 For proponents of this thesis the United States appears as an anomaly and they accordingly give considerable attention to explaining why it is different For other sociologists however the apparently high level of religiosity in the USA provides a major argument in their attempts to refute the Thesis *Secularization and Religious Innovation in the Atlantic World* provides a systematic comparison between the religious histories of the United States and western European countries from the eighteenth to the late twentieth century noting parallels as well as divergences examining their causes and especially highlighting change over time This is achieved by a series of themes which seem especially relevant to this agenda and in each case the theme is considered by two scholars The volume examines whether American Christians have been more innovative and if so how far this explains the apparent God Gap It goes beyond the simple American European binary to ask what is American or European in the Christianity of the

nineteenth and twentieth centuries and in what ways national or regional differences outweigh these commonalities

Nineteenth Century Businesswomen Charlotte Le Chapelain, 2024-06-30 The book examines female entrepreneurship in the nineteenth century Economic history has long accorded women entrepreneurs a very minor place relegating them to the status of historical anecdotes The hypothesis of women's withdrawal from the business sphere after the eighteenth century has long dominated However this view has recently been subject to a fundamental questioning Women did in fact actively contribute to economic development by occupying key positions in the business sphere as independent workers investors and entrepreneurs Businesswomen were no exception in the nineteenth century They ran businesses of all sizes and in a wide range of industrial sectors This book helps to bring nineteenth century women entrepreneurs out of invisibility by examining their entrepreneurial practices and shedding light on the role of the legal framework in which they operated This interdisciplinary book will appeal to students scholars and researchers of economic history business history history of law and economics and management sciences in general interested in a better understanding of female entrepreneurship in the nineteenth century

Picturing Children Marilyn R. Brown, 2017-07-05 The representation of children in modern European visual culture has often been marginalized by Art History as sentimental and trivial For this reason the subject of childhood in relation to art and its production has largely been ignored Confronting this dismissal this unique collection of essays raises new and unexpected issues about the formation of childhood identity in the nineteenth century and makes a significant contribution to the development of interdisciplinary studies within this area Through a range of stimulating and insightful case studies the book charts the development of the Romantic ideal of childhood starting with Rousseau's *Emile* and attends to its visual social and psychological transformations during the historical period from which Freud's psychoanalytic theories eventually emerged Foremost scholars such as Anne Higonnet Carol Mavor Susan Casteras and Linda A Pollock uncover the means by which children became an important conduit for prevailing social anxieties and demonstrate that the apparently timeless images of them that proliferated at the time should be understood as complex cultural documents Over 50 illustrations enhance this rich and fascinating volume

History of Education: Education in its social context Roy Lowe,2000 *Explaining Religious Party Strength* Mário Rebelo,2022-12-30 Explaining Religious Party Strength explores why religious political parties are electorally successful in some countries but not in others Drawing on insights from political science and sociology this book argues that religious parties are typically formed for defensive reasons reacting against state builders attempts to secularize public services such as education welfare and healthcare Building on these findings the author argues that the strength of religious parties is determined by the infrastructural power of the state Weak states that fail to provide adequate public services open up space for religious communities to build a dense network of private schools hospitals and charities which translates into votes for religious political parties By contrast strong states that provide efficient public services squeeze out private welfare providers undermining the electoral strength of religious political parties The author tests this theory through statistical analysis using a new dataset on all religious parties which have participated in national parliamentary elections between 1800 and 2015 He includes comparative historical analyses of Roman Catholic political parties in France and Italy and Sunni Islamic political parties in Egypt Turkey and Albania This book will interest students and scholars of religion and politics specifically those interested in party formation voting and political activism as well as policymakers
