**France and Britain, 1940-1994** P. M. H. Bell, 2014-09-25. This is the second volume in Philip Bell's study of Franco-British relations in the twentieth century. It covers the period from the Fall of France in 1940 to the opening of the Channel Tunnel. Philip Bell views the half century as a long separation with France committed early on to a new concept of Europe in partnership with Germany whilst Britain stood apart. The tensions and resentments it has generated have kept French-British relations at the very heart of the burning question of Britain's place in Europe. Yet the story has another side to which Philip Bell also does justice. Much has been achieved by the two countries together and alongside their European partners. For all their divergencies and antagonisms the French and British know and understand each other better today than at any other time in their modern histories and all these developments are fully explored in Philip Bell's engrossing and often amusing account.

**The Brussels and North Atlantic Treaties, 1947-1949** Tony Insall, Patrick Salmon, 2014-10-10. This volume documents the drafting, negotiation and signature of the treaty that has been the cornerstone of European defence for the past sixty-five years: the North Atlantic Treaty signed in April 1949. The story begins at the end of 1947 when the British Foreign Secretary Ernest Bevin became convinced of the need to persuade the United States of America, which had emerged from the Second World War as the pre-eminent global military and economic power and one of the only two superpowers to underwrite the future security of Western Europe. It progresses through the negotiation of the Brussels Treaty of March 1948, an essential prerequisite to securing American participation in a wider defensive system, and ends with the signature of the North Atlantic Treaty after a series of setbacks, difficulties and security threats. The documents drawn from the archives of the Foreign and Commonwealth Office, the Cabinet Office and No. 10, with some transferred into the public domain for the first time, demonstrate how diplomatic skills and determination inspired by Bevin's vision led to a system of collective security that played an indispensable part in the preservation of peace between East and West for the rest of the twentieth century. This book will be of much interest to students of the Cold War, European and American history, British political history, international history and IR in general.
