France and European Integration Michel R. Gueldry, 2001-05-30 Gueldry analyzes the substantive transformations brought upon the French state by European integration through an incremental and cumulative process generally described as Europeanization This restructuring is characterized by the erosion of traditional political and economic parameters the emergence of new means and models of public action and a general paradigmatic redefinition including a search for renewed political legitimacy by French elite Covering the period from 1957 to the present Gueldry examines how regional integration affects French governmental structures public policies political processes and culture He emphasizes the post Single European Act February 1986 period because of the accelerating momentum of the integration process after this milestone treaty Students scholars and policy makers involved with EU history institutions and policies will be particularly interested in the work

**Italy and the European Union** Federiga M. Bindi, 2011-01-07 Offers a comprehensive study of Italy's role in the European Union as well as the country's relations with the EU and other EU members Original **The Netherlands and EC Membership Evaluated** Menno Wolters, Peter Coffey, 1990 European Union and National Macroeconomic Policy

James Forder, Anand Menon, 1998-03-19 Considers the way in which the European Union has affected autonomy in macroeconomic policy making of the member states It begins with an introduction to economic ideas and explores current themes surrounding monetary and fiscal policy and European integration including economic policy coordination objectives in national policy making and motivation **Economic Management and French Business** M. Maclean, 2002-10-02 How is it that the modest pace of change which typified the French economy a century ago gave way after 1945 to a new revived capitalism and a superior economic performance Maclean traces the development of French economic and business life in the context of the European and international economy over the past fifty years She examines the main economic trends and events from nationalization to privatization from war with Germany to reconciliation and ever greater union from the franc to the euro and from national champions to mega mergers with foreign companies Maclean argues that the new French capitalism of the twenty first century is the product of an ideological struggle in which the forces of modernization triumphed over the old guard of French nationalism **Italy and EC Membership Evaluated** Francesco Francioni, 1992 This is a study of the costs and benefits to Italy of EC membership Compared to their counterparts in the rest of Europe Italians have always been amongst the most favourable to European integration The level of domestic consensus is borne out by the fact that since the 1970s no Italian party has adopted the anti European platform This has reflected a perception that Italy would benefit politically and economically from association with a larger network of states in Europe Certainly in political terms the benefits have outweighed the costs The contributors to this volume assess whether or not this will continue to be the case in the future

**Electing the French President** Robert Elgie, 2016-07-27 This study of the 1995 French presidential election explains why Jacques Chirac was elected the fifth President of the Fifth French Republic it also places Chirac's election in the

**The European Union and the Regulation of Media Markets** Alison Harcourt, 2005 National broadcasting and press regulation is undergoing a process of convergence in Europe This book newly available in paperback explains how this process has been shaped by the actions of the European Union EU institutions Alison Harcourt observes that whilst communications is one of the EU's most successful policy areas European decision making is eroding the national capacity to regulate for the public interest European level efforts to protect public interest goals have been constrained by the European Treaties The author argues that increased European coordination in public interest regulation could be more conducive to growth and competitiveness than the dismantling of existing national laws This however would require changes to the political composition of the European Union This book assesses the potential EU media regulation provides for market growth and the protection of media pluralism the citizen and ultimately democracy itself These opportunities are presented in the coming decade with the developing European Constitution EU enlargement and the implementation and revision of European regulation

The European Union and Member States Dietrich Rometsch, Wolfgang Wessels, 1996 This work provides a country by country analysis of how European policy is made and applied Its central focus is the involvement in European policy making of national institutions governments parliaments sub national government the courts and public administration

*A Certain Idea of Europe* Craig Parsons, 2003 The quasi federal

European Union stands out as the major exception in the thinly institutionalized world of international politics. Something has led Europeans and only Europeans beyond the nation state to a fundamentally new political architecture. Craig Parsons argues in *A Certain Idea of Europe* that this something was a particular set of ideas generated in Western Europe after the Second World War. In Parsons's view today's European Union reflects the ideological and perhaps visionary project of an elite minority. His book traces the progressive victory of this project in France where the battle over European institutions erupted most divisively. Drawing on archival research and extensive interviews with French policymakers, the author carefully traces a fifty year conflict between radically different European plans. Only through aggressive leadership did the advocates of a supranational community Europe succeed at building the EU and binding their opponents within it. Parsons puts the causal impact of ideas and their binding effects through institutions at the center of his book. In so doing he presents a strong logic of social construction, a sharp departure from other accounts of EU history that downplay the role of ideas and ideology.
