Hamlyn History Of Punishment And Torture:

Hamlyn History of Punishment and Torture Karen Farrington,2000 *Hamlyn History of Punishment and Torture*
Karen FARRINGTON,1996 **Blind Memory** Marcus Wood,2000 Throughout this important volume the author provides an invaluable addition to the limited literature now available on the visual images associated with slavery and abolition integrated into a sophisticated analysis of their meaning and legacy today of color images 150 illustrations **A History of the Laws of War: Volume 1** Alexander Gillespie,2011-09-06 This unique new work of reference traces the origins of the modern laws of warfare from the earliest times to the present day Relying on written records from as far back as 2400 BCE and using sources ranging from the Bible to Security Council Resolutions the author pieces together the history of a subject which is almost as old as civilisation itself The author shows that as long as humanity has been waging wars it has also been trying to find ways of legitimising different forms of combatants and regulating the treatment of captives This first book on warfare deals with the broad question of whether the patterns of dealing with combatants and captives have changed over the last 5 000 years and if so how In terms of context the first part of the book is about combatants and those who can lawfully take part in combat In many regards this part of the first volume is a series of less than ideal pathways This is because in an ideal world there would be no combatants because there would be no fighting Yet as a species we do not live in such a place or even anywhere near it either historically or in contemporary times This being so a second best alternative has been to attempt to control the size of military forces and therefore the bloodshed This is also not the case by which humanity has worked over the previous centuries Rather the clear assumption for thousands of years has been that authorities are allowed to build the size of their armed forces as large as they wish The restraints that have been applied are in terms of the quality and methods by which combatants are taken The considerations pertain to questions of biology such as age and sex geographical considerations such as nationality and the multiple nuances of informal or formal combatants These questions have also overlapped with ones of compulsion and whether citizens within a country can be compelled to fight without their consent Accordingly for the previous 3 000 years the question has not been whether there should be a limit on the number of soldiers but rather who is or is not a lawful combatant It has rarely been a question of numbers It has been and remains one of type The second part of this book is about people typically combatants captured in battle It is about what happens to their status as prisoners about the possibilities of torture assistance if they are wounded and what happens to their remains should they be killed and their bodies fall into enemy hands The theme that ties all of these considerations together is that all of the acts befall those who are to one degree or another captives of their enemies As such they are no longer masters of their own fate As a work of reference this first volume as part of a set of three is unrivalled and will be of immense benefit to scholars and practitioners researching and advising on the laws of warfare It also tells a story which throws fascinating new light on the history of international law and on the history of warfare itself *The History of Punishment* Lewis Lyons,2003-09 All

sorts of punishment from all sorts of time and place Private Law Remedies for Extraterritorial Human Rights Violations
Eric A. Engle, 2006 *The Nature and Function of Water, Baths, Bathing and Hygiene from Antiquity through the Renaissance*, 2009-03-25 These essays offer scholars teachers and students a new basis for discussing attitudes toward and technological expertise concerning water in antiquity through the early Modern period and they examine historical water use and ideology both diachronically and cross regionally Topics include gender roles and water usage attitudes practices and innovations in baths and bathing water and the formation of identity and policy ancient and medieval water sources and resources and religious and literary water imagery The authors describe how ideas about the nature and function of water created and shaped social relationships and how religion politics and science transformed and were themselves transformed by the manipulation of uses of and disputes over water in daily life ceremonies and literature Contributors are Rabun Taylor Sandra Lucore Robert F Sutton Jr Cynthia K Kosso Kevin Lawton Evi Johanne H land H l ne Cazes Alexandra Cuffel Mark Munn Brenda Longfellow Gretchen Meyers Sara Saba Scott John McDonough Etienne Dunant E J Owens Mehmet Talalan Deborah Chatr Aryamontri John Stephenson Lin A Ferrand Paul Trio Anne Scott Misty Rae Urban Ruth Stevenson Charles Connell Alyce Jordan Ronald Cooley and Irene Matthews *Dark Justice* Karen Farrington, 1996 Presents a history of different punishment and torture techniques used throughout the ages from human sacrifices of the Dark Ages to capital punishment methods used today **A History of the Laws of War: Volume 2** Alexander Gillespie, 2011-10-07 This unique new work of reference traces the origins of the modern laws of warfare from the earliest times to the present day Relying on written records from as far back as 2400 BCE and using sources ranging from the Bible to Security Council Resolutions the author pieces together the history of a subject which is almost as old as civilisation itself The author shows that as long as humanity has been waging wars it has also been trying to find ways of legitimising different forms of combatants and ascribing rules to them protecting civilians who are either inadvertently or intentionally caught up between them and controlling the use of particular classes of weapons that may be used in times of conflict Thus it is that this work is divided into three substantial parts Volume 1 on the laws affecting combatants and captives Volume 2 on civilians and Volume 3 on the law of arms control This second book on civilians examines four different topics The first topic deals with the targeting of civilians in times of war This discussion is one which has been largely governed by the developments of technologies which have allowed projectiles to be discharged over ever greater areas and attempts to prevent their indiscriminate utilisation have struggled to keep pace The second topic concerns the destruction of the natural environment with particular regard to the utilisation of starvation as a method of warfare and unlike the first topic this one has rarely changed over thousands of years although contemporary practices are beginning to represent a clear break from tradition The third topic is concerned with the long standing problems of civilians under the occupation of opposing military forces where the practices of genocide collective punishments and or reprisals and rape have occurred The final topic in this volume is about the theft or destruction

of the property of the enemy in terms of either pillage or the intentional devastation of the cultural property of the opposition. As a work of reference, this set of three books is unrivalled and will be of immense benefit to scholars and practitioners researching and advising on the laws of warfare. It also tells a story which throws fascinating new light on the history of international law and on the history of warfare itself.

History and Hope Kevin M. Cahill, 2013-05-01. The International Humanitarian Affairs Reader is a compilation of the most important chapters in the ten volume series published on this topic by Fordham University Press. Each chapter selected has been edited to delete dated material where appropriate; chapters will have a brief addendum to present current information. The Series Editor Kevin M. Cahill M.D. will write a substantial introductory essay explaining the academic evolution of the discipline of international humanitarian assistance. It will focus on the Fordham Experience: its Institute of International Humanitarian Affairs (IIHA) has developed practical programs for training field workers, especially those dealing with complex emergencies following conflicts, man-made or natural disasters. The book series has been an essential part of this effort. The new International Humanitarian Affairs Reader will be divided into seven sections, each introduced by a link page providing continuity for the text. There will be extensive appendices to assist in finding basic acronyms, abbreviations, important conventions, treaties, and accepted standards. One appendix will also provide the full table of contents for each volume in the series, and all chapters are available for digital download. The International Humanitarian Affairs Reader, scheduled for publication in Spring 2013, should provide the growing number of people both within and outside academia with a better understanding of the multi-faceted demands posed by humanitarian assistance programs. At Fordham University, there are programs at both the undergraduate Minor and graduate Masters levels. Fordham's innovative, very intense, one-month residential course for experienced humanitarian workers, the International Diploma in Humanitarian Assistance (IDHA), is recognized worldwide. The Institute now has over 2000 graduates from 133 nations. Contributors to The International Humanitarian Affairs Reader include many of the leading figures in international diplomacy, relief and refugee operations, conflict resolution and reconciliation, and transition from disaster to stability and development from the chaos of war to peace.

The British National Bibliography Arthur James Wells, 1998 □□□□□□ , *A History of the Laws of War: Volume 3* Alexander Gillespie, 2011-10-07 This unique work of reference traces the origins of the modern laws of warfare from the earliest times to the present day Relying on written records from as far back as 2400 BCE and using sources ranging from the Bible to Security Council Resolutions the author pieces together the history of a subject which is almost as old as civilisation itself The author shows that as long as humanity has been waging wars it has also been trying to find ways of legitimising different forms of combatants and ascribing rules to them protecting civilians who are either inadvertently or intentionally caught up between them and controlling the use of particular classes of weapons that may be used in times of conflict Thus it is that this work is divided into three substantial parts Volume 1 on the laws affecting combatants and captives Volume 2 on civilians and Volume 3 on the law of arms control This third volume deals with the question of the control of weaponry from the Bronze Age to the Nuclear Age In doing so it divides into two parts namely conventional weapons and Weapons of Mass Destruction The examination of the history of arms control of conventional weapons begins with the control of weaponry so that one side could achieve a military advantage over another This pattern which only began to change centuries after the advent of gunpowder was later supplemented by ideals to control types of conventional weapons because their impacts upon opposing combatants were inhumane By the late twentieth century the concerns over inhumane conventional weapons were being supplemented by concerns over indiscriminate conventional weapons The focus on indiscriminate weapons when applied on a mass scale is the core of the second part of the volume Weapons of Mass Destruction are primarily weapons of the latter half of the twentieth century Although both chemical and biological warfare have long historical lineages it was only after the Second World War that technological developments meant that these weapons could be applied to cause large scale damage to non combatants this is unlike nuclear weapons which are a truly modern invention Despite being the newest Weapon of Mass Destruction they are also the weapon of which most international attention has been applied although the frameworks by which they were contained in the last century appear inadequate to address the needs of current times As a

work of reference this set of three books is unrivalled and will be of immense benefit to scholars and practitioners researching and advising on the laws of warfare It also tells a story which throws fascinating new light on the history of international law and on the history of warfare itself *A Certain Share of Low Cunning* David J. Cox,2010-02-01 This book provides an account and analysis of the history of the Bow Street Runners precursors of today s police force Through a detailed analysis of a wide range of both qualitative and quantitative research data this book provides a fresh insight into their history arguing that the use of Bow Street personnel in provincially instigated cases was much more common than has been assumed by many historians It also demonstrates that the range of activities carried out by Bow Street personnel whilst employed on such cases was far more complex than can be gleaned from the majority of books and articles concerning early nineteenth century provincial policing which often do little more than touch on the role of Bow Street By describing the various roles and activities of the Bow Street Principal Officers with specific regard to cases originating in the provinces it also places them firmly within the wider contexts of provincial law enforcement and policing history The book investigates the types of case in which the Runners were involved who employed them and why how they operated including their interaction with local law enforcement bodies and how they were perceived by those who utilized their services It also discusses the legacy of the Principal Officers with regard to subsequent developments within policing Bow Street Police Office and its personnel have long been regarded by many historians as little more than a discrete and often inconsequential footnote to the history of policing leading to a partial and incomplete understanding of their work This viewpoint is challenged in this book which argues that in several ways the utilization of Principal Officers in provincially instigated cases paved the way for important subsequent developments in policing especially with regard to detective practices It is also the first work to provide a clear distinction between the Principal Officers and their less senior colleagues *Corrections in the United States* Dean J. Champion,2001 *A Brief History of Vampires* M.J. Trow,2013-02-07 A historical journey in pursuit of the history legend and lore of vampires Where do they come from Why do they have so much appeal today As Twilight hits the book charts and billboards and True Blood is on TV there are vampires in downtown clubs and never has it been more fashionable to be pale M J Trow looks at the story of vampires and charts its origins a long way from the shopping mall in the story of the warrior prince Vlad of Wallachia
