Basics of Acupuncture Gabriel Stux,Bruce Pomeranz,2013-11-11 In 1987 our first book Acupuncture Textbook and Atlas received rave reviews e g in New England Journal of Medicine This prompted us to write this smaller affordable version in order to reach a wider audience The smaller format has been so successful that we are now into our fourth revised edition This has given us the opportunity to update and improve the book For example numerous new references to scientific advances have been added Also the section on traditional Chinese medicine TCM was added because it gives a more complete picture of the current practice of acupuncture Acupuncture has come a long way since our first book in 1987 There has been a surge of interest in treating drug addictions by ear acupuncture in 450 centers world wide The treatment of nausea and vomiting has been so well tested scientifically that the FDA USA is considering making this the major indication for acupuncture in America Research into its efficacy for neurological and pulmonary diseases is also gaining credibility No longer is chronic pain the only scientifically acceptable use for acupuncture based on the endorphin mechanism

 Treatment of Neurological Diseases Liming Lu, Nenggui Xu, Myeong Soo Lee, Chunzhi Tang, Yong Tang, Bing Zhu, 2023-06-21
 Neurological disorders such as Alzheimer's disease and Parkinson's disease are an important cause of disability and death
 worldwide and pose a serious burden on the global health system over the past 30 years Acupuncture as the most widely
 used traditional Chinese medicine therapy in the world has been widely used in 183 countries and regions Acupuncture can
 treat more than 300 kinds of diseases especially for neurological diseases Due to the unique advantages of acupuncture such
 as good therapeutic effect and low side effects many researchers have conducted extensive clinical studies on the
 effectiveness and safety of acupuncture in the treatment of neurological diseases laying a foundation for the practicability
 and scientific vigor of this complementary and alternative therapeutic approach There are still many problems unanswered in
 the current clinical research on acupuncture for the treatment of neurological diseases First of all clinical research is lagging
 behind due to the lack of emphasis on modern advanced methods and analytical techniques e.g. artificial intelligence omics
 analysis bioinformatics analysis data mining and multidisciplinary integration process Secondly the quality of reports on most
 clinical studies of acupuncture treatment for neurological diseases is extremely low Most clinical studies have not adopted
 standardized methodological evaluations authoritative disease diagnosis standards and efficacy evaluation standards The
 lack of compliance regulations and strict study design reduces the accuracy and authenticity of the research Thirdly there is
 a lack of integrated assessment of the distribution of evidence for acupuncture treatment of neurological diseases Therefore
 strictly designed clinical research and in depth and systematic analysis method are currently needed to provide high quality
 evidence for acupuncture treatment of neurological diseases In this Research Topic we hope to further understand the role of
 acupuncture in the treatment of neurological diseases through clinical research and secondary research The range of
 acupuncture includes manual acupuncture electro acupuncture body needling auricular acupuncture scalp acupuncture laser
 acupuncture and acupressure etc Neurological diseases include stroke meningitis encephalitis tetanus Alzheimer's disease
 and other dementias Parkinson's disease epilepsy multiple sclerosis motor neurone disease migraine tense type headaches
