Mays, 2010-05-19 There is no more fundamental resource than water The basis of all life water is fast becoming a key issue in today s world as well as a source of conflict This fascinating book which sets out many of the ingenious methods by which ancient societies gathered transported and stored water is a timely publication as overextraction and profligacy threaten the existence of aquifers and watercourses that have supplied our needs for millennia It provides an overview of the water technologies developed by a number of ancient civilizations from those of Mesopotamia and the Indus valley to later societies such as the Mycenaeans Minoans Persians and the ancient Egyptians Of course no book on ancient water technologies would be complete without discussing the engineering feats of the Romans and Greeks yet as well as covering these key civilizations it also examines how ancient American societies from the Hohokams to the Mayans and Incas husbanded their water supplies This unusually wide ranging text could offer today s parched world some solutions to the impending crisis in our water supply This book provides valuable insights into the water technologies developed in ancient civilizations which are the underpinning of modern achievements in water engineering and management practices It is the best proof that the past is the key for the future Andreas N Angelakis Hellenic Water Supply and Sewerage Systems Association Greece This book makes a fundamental contribution to what will become the most important challenge of our civilization facing the global crisis the problem of water Ancient Water Technologies provides a complete panorama of how ancient societies confronted themselves with the management of water The role of this volume is to provide for the first time

on this issue an extensive historical and scientific reconstruction and an indication of how traditional knowledge may be employed to ensure a sustainable future for all Pietro Laureano UNESCO expert for ecosystems at risk Director of IPOGEA Institute of Traditional Knowledge Italy Water Culture in Roman Society Dylan Kelby Rogers, 2018-07-17 Water played an important part of ancient Roman life from providing necessary drinking water supplying bath complexes to flowing in large scale public fountains The Roman culture of water was seen throughout the Roman Empire although it was certainly not monolithic and it could come in a variety of scales and forms based on climatic and social conditions of different areas This article seeks to define water culture in Roman society by examining literary epigraphic and archaeological evidence while understanding modern trends in scholarship related to the study of Roman water The culture of water can be demonstrated through expressions of power aesthetics and spectacle Further there was a shared experience of water in the empire that could be expressed through religion landscape and water's role in cultures of consumption and pleasure **Diodorus'**

Mythistory and the Pagan Mission Iris Sulimani, 2011-04-11 Examining Diodorus Siculus historiographical methods and his representation of mythical culture heroes this study demonstrates the significant contribution of the author's first pentad to his universal history and its importance as a supplement to our perception of Hellenistic civilization **New Frontiers**

Paul J du Plessis, 2014-03-17 An interdisciplinary edited collection on social science methodologies for approaching Roman legal sources Roman law as a field of study is rapidly evolving to reflect new perspectives and approaches in research Scholars who work on the subject are i Aqueduct Hunting in the Seventeenth Century Harry B. Evans, 2002 An insightful assessment of the work of Raffaele Fabretti the first researcher of Rome's aqueduct system **Water and Roman**

Urbanism Adam Rogers, 2013-04-15 Water and Roman Urbanism Towns Waterscapes Land Transformation and Experience in Roman Britain offers a new perspective for investigating Roman settlement and how urban spaces were created and experienced by focusing on the relationship between settlement and water and the meanings attributed to these places Rather than a descriptive approach to the urban fabric it emphasises social context and cultural meaning through interpretative frameworks of analysis Central are the cultural and experiential implications of water forming part of towns rather than economic and practical arguments and the way in which these places were used and altered over time The book emphasises a social approach and has considerable implications for our understanding of life in the Roman period as a whole

An Archaeology of Egyptian Monasticism Louise Blanke, 2019-08-30 The White Monastery in Upper Egypt and its two federated communities are among the largest most prosperous and longest lived loci of Coptic Christianity Founded in the fourth century and best known for its zealous and prolific third abbot Shenoute of Atripe these monasteries have survived from their foundation in the golden age of Egyptian Christianity until today At its peak in the fifth to the eighth centuries the White Monastery federation was a hive of industry densely populated and prosperous It was a vibrant community that engaged with extra mural communities by means of intellectual spiritual and economic exchange It was an important

landowner and a powerhouse of the regional economy It was a spiritual beacon imbued with the presence of some of Christendom's most famous saints and it was home to a number of ordinary and extraordinary men and women who lived, worked, prayed, and died within its walls This new study is an attempt to write the biography of the White Monastery federation to reconstruct its longue duree through archaeological and textual sources and to assess its place within the world of Late Antiquity

A Tale of Three Thirsty Cities Jaime-Chaim Shulman, 2017-11-01 In *A Tale of Three Thirsty Cities: The Innovative Water Supply Systems of Toledo, London, and Paris in the Second Half of the Sixteenth Century* Chaim Shulman presents an analysis of three projects of urban water supply systems carried out between 1560s-1610s The technical and economic differences between these projects resulted from external conditions not directly related to the water supply problem Although the same basic technology was apparently available at the time in all cases the geographical, engineering, entrepreneurial, and cultural nature of each region differed The inhabitants' wellbeing improvement achieved varied accordingly Much broader insights are drawn on the policies of the three monarchies regarding the initiative of and support for grand scale public works in general

A History of Energy Flows Anthony N. Penna, 2019-09-18 This book presents a global and historical perspective of energy flows during the last millennium The search for sustainable energy is a key issue dominating today's energy regime This book details the historical evolution of energy following the overlapping and slow flowing transitions from one regime to another In doing so it seeks to provide insight into future energy transitions and the means of utilizing sustainable energy sources to reduce humanity's fossil fuel footprint The book begins with an examination of the earliest and most basic forms of energy use namely that of humans metabolizing food in order to work with the first transition following the domestication and breeding of horses and other animals The book also examines energy sources key to development during the industrialization and mechanization such as wood and coal as well as more recent sources such as crude oil and nuclear energy The book then assesses energy flows that are at the forefront of sustainability by examining green sources such as solar, wind, power, and hydropower While it is easy to see energy flows in terms of revolutions, transitions have taken centuries to evolve and transitions are never fully global as for example wood remains the primary fuel source for cooking in much of the developing world This book not only demonstrates the longevity of energy transitions but also discusses the possibility for reducing transition times when technological developments provide inexpensive and safe energy sources that can reduce the dependency on fossil fuels This book will be of great interest to students and scholars of energy transitions, sustainable energy, and environmental and energy history

A Historical and Topographical Guide to the Geography of Strabo Duane W. Roller, 2018-01-11 Strabo's *Geography* completed in the early first century AD is the primary source for the history of Greek geography This Guide provides the first English analysis of and commentary on this long and difficult text and serves as a companion to the author's *The Geography of Strabo* the first English translation of the work in many years It thoroughly analyzes each of the seventeen books and provides perhaps the most thorough bibliography as yet

created for Strabo's work Careful attention is paid to the historical and cultural data the thousands of toponyms and the many lost historical sources that are preserved only in the Geography This volume guides readers through the challenges and complexities of the text allowing an enhanced understanding of the numerous topics that Strabo covers from the travels of Alexander and the history of the Mediterranean to science religion and cult

The Making of Feudal Agricultures?

Miquel Barceló, François Sigaut, 2004-02-01 Was there a discernible set of changes in the techniques of arable farming animal husbandry and their associated technologies at the end of antiquity which marked a clear break with an established ancient world economy and ushered in the new agricultures of the early middle ages Were such changes not already visible in antiquity And what was the impact of political economic social and environmental change in these processes The 6 papers in this volume reject simple evolutionary models charting progress from protohistory to the Roman period to the Dark Ages to the Middle Ages and insisted rather on the notion of inheritance so that the farming economy laid down in protohistoric times continued to exist during the early Middle Ages The collapse of a capitalistic commercial economy of the later Roman Empire though accompanied by political and military crises did not entail a regression of the farming economy The growth in farming in the 8th 9th C resting on a demographic increase combined with intensive land clearance episodes owed much to the preceding centuries the change resides more in an intensification than in the introduction of new features With contributions by Pascal Reigniez Catherine Rommelaere Georges Raepsaet G Comet Aline Durand and Philippe Leveau

Designing for Luxury on the Bay of Naples Mantha Zarmakoupi, 2014 This study explores Roman luxury villa lifestyle and architecture to shed light on the villas design as a dynamic process related to cultural social and environmental factors Through an analysis of five villas from around the bay of Naples it shows how the Romans developed a sophisticated interplay between architecture and landscape

A Companion to the Archaeology of the Roman Empire, 2 Volume Set Barbara

Burrell, 2024-03-13 A one of a kind exploration of archaeological evidence from the Roman Empire between 44 BCE and 337 CE In *A Companion to the Archaeology of the Roman Empire* distinguished scholar and archaeologist Professor Barbara Burrell delivers an illuminating and wide ranging discussion of peoples institutions and their material remains across the Roman Empire Divided into two parts the book begins by focusing on the unifying factors institutions and processes that affected the entire empire This ends with a chapter by Professor Greg Woolf Ronald J Mellor Professor of Ancient History at UCLA which summarizes and enlarges upon the themes and contributions of the volume Meanwhile the second part brings out local patterns and peculiarities within the archaeological remains of the City of Rome as well as almost every province of its empire Each chapter is written by a noted scholar whose career has focused on the subject Chronological coverage for each chapter is formally 44 BCE to 337 CE but since material remains are not always so closely datable most chapters center on the first three centuries of the Common Era plus or minus 50 years In addition the book is amply illustrated and includes new and little known finds from oft ignored provinces Readers will also find A thorough introduction to the peoples and

operations of the Roman Empire including not just how the center affected the periphery Romanization but how peripheral provinces operated on their own and among their neighbors Comprehensive explorations of local patterns within individual provinces Contributions from a diverse panel of leading scholars in the field A unique form of organization that brings out systems across the empire such as transport across sea rivers and roads monetary systems pottery and foodways the military construction and technology Perfect for graduate and advanced undergraduate students of archaeology and the history of the Roman Empire A Companion to the Archaeology of the Roman Empire will also earn a place in the libraries of professional archaeologists in other fields including Mayanists medievalists and Far Eastern scholars seeking comparanda and bibliography on other imperial structures

In the Shadow of the Machine Jeremy Naydler, 2018-05-29 Contemporary life is so deeply reliant upon digital technology that the computer has come to dominate almost every aspect of our culture What is the philosophical and spiritual significance of this dependence on electronic technology both for our relationship to nature and for the future of humanity And what processes in human perception and awareness have produced the situation we find ourselves in As Jeremy Naydler elucidates in this penetrating study we cannot understand the emergence of the computer without seeing it within the wider context of the evolution of human consciousness which has taken place over millennia Modern consciousness he shows has evolved in conjunction with the development of machines and under their intensifying shadow The computer was the product of a long historical development culminating in the scientific revolution of the 17th century It was during this period that the first mechanical calculators were invented and the project to create more complex thinking machines began in earnest But the seeds were sown many hundreds of years earlier deep in antiquity Naydler paints a vast panorama depicting human development and the emergence of electronic technology His painstaking research illuminates an urgent question that concerns every living person today What does it mean to be human and what if anything distinguishes us from machines
