Queensland's Threatened Animals Lee K Curtis, 2012-02-01 Queensland is home to 70% of Australia's native mammals 226 species over 70% of native birds 630 species just over half of the nation's native reptiles 485 and native frogs 127 and more than 11 000 native plant species Hundreds of these have a threatened status in Queensland In order for Queensland to maintain and recover a healthy biodiversity we must address the serious problems faced by our natural environment habitat loss inappropriate land management change in fire regimes pollution of natural resources proliferation of invasive species and climate change This book features up to date distribution data photos and maps for most of Queensland's threatened animals It also includes a comprehensive list of resources with key state national and international organisations involved in the recovery and management of threatened species Queensland's Threatened Animals will provide vital information to scientists educators business entities government agencies students community groups environmental NGOs regional NRMs and potential volunteers

Developing Place-responsive Pedagogy in Outdoor Environmental Education Alistair Stewart, 2020-02-25 This book is a rhizomatic curriculum autobiography that charts the author's efforts to develop and promote Australian outdoor environmental education practices that are inclusive of and responsive to the places in which they are performed Joining philosophical concepts created by Gilles Deleuze and Felix Guattari with William Pinar's autobiographical method for curriculum inquiry the author re-considers the interrelated concepts contexts and complex conversations with colleagues students and others that have shaped his approach to curriculum pedagogy and research for fifteen years or more Emphasising the complexity of developing curricula and pedagogies that engage in a respectful and generative way with the natural and cultural history of the Australian continent the author explicates and enacts his attempts to think differently about the cultural curricular and pedagogical understandings that inform the practices of Australian outdoor environmental educators Outdoor environmental education in Australia has historically been influenced by imported universalist ideas particularly from the USA and the UK However during the last two decades a growing number of researchers in this field have challenged the applicability of such taken-for-granted approaches and advocated the development of curricula and pedagogies informed by the unique bio geographical and cultural histories of the locations in which educational experiences take place As this book demonstrates Alistair Stewart is prominent among the vanguard of Australian outdoor environmental educators who have led such advocacy by combining practical experience with theoretical rigour

Wildlife of the Otways and Shipwreck Coast Grant Palmer, 2019-04-01 The Otways and Shipwreck Coast is known for its natural beauty and attracts millions of visitors each year particularly along the

Great Ocean Road The value of the region's rich biodiversity is recognised at the national and global level and its wildlife is markedly different to other regions including eastern Victoria which supports similar vegetation types Wildlife of the Otways and Shipwreck Coast is a photographic field guide to the vertebrate wildlife of Victoria's south west It covers all the mammals birds reptiles and frogs that occur in the region including on land and in coastal waters Each of the 288 species profiles includes a description and information on identification range conservation status habitat use and ecology and is complemented by an exquisite colour photograph and a detailed distribution map The book also includes chapters on habitat types conservation and management and on 14 key places in the region to view wildlife This book will allow those interested in wildlife including residents and visitors to identify vertebrate animals found in the region Readers will also become more familiar with the distinct role the Otways has in conserving Australia's biodiversity

Helm Dictionary of Scientific Bird Names James A. Jobling, 2010-06-30 A comprehensive dictionary of the meaning and derivation of scientific bird names Many scientific bird names describe a bird's habits habitat distribution or a plumage feature while others are named after their discoverers or in honour of prominent ornithologists This extraordinary work of reference lists the generic and specific name for almost every species of bird in the world and gives its meaning and derivation In the case of eponyms brief biographical details are provided for each of the personalities commemorated in the scientific names This fascinating book is an outstanding source of information which will both educate and inform and may even help to understand birds better

National Geographic Complete Birds of the World National Geographic Society (U.S.), 2009 Offers detailed information on every bird family in the world including their physical characteristics behaviors conservation status taxonomy and photographs of individual species

Extinct Birds Julian P. Hume, 2017-08-24 A comprehensive review of the hundreds of bird species that have become extinct over the last 1 000 years of habitat degradation over hunting and rat introduction Extinct Birds has become the standard text on this subject covering both familiar icons of extinction as well as more obscure birds some known from just one specimen or from travellers tales This second edition is expanded to include dozens of new species as more are constantly added to the list either through extinction or through new subfossil discoveries The book is the result of decades of research into literature and museum drawers as well as caves and subfossil deposits which often reveal birds long gone that disappeared without ever being recorded by scientists while they lived From Great Auks Carolina Parakeets and Dodos to the amazing yet almost completely vanished bird radiations of Hawaii and New Zealand via rafts of extinction in the Pacific and elsewhere this book is both a sumptuous reference and astounding testament to humanity's devastating impact on wildlife

Australian Book Review, 2003 **Advances in Reintroduction Biology of Australian and New Zealand Fauna** Doug Armstrong, Matthew Hayward, Dorian Moro, Philip Seddon, 2015-05-15 The publication of Reintroduction Biology of Australian and New Zealand Fauna nearly 20 years ago introduced the new science of reintroduction biology Since then there have been vast changes in our understanding of the process of reintroductions and

other conservation driven translocations and corresponding changes in regulatory frameworks governing translocations

Advances in Reintroduction Biology of Australian and New Zealand Fauna is a timely review of our understanding of translocation from an Australasian perspective ensuring translocation becomes an increasingly effective conservation management strategy in the future Written by experts including reintroduction practitioners researchers and policy makers the book includes extensive practical advice and example case studies identifies emerging themes and suggests future directions Topics include key questions in reintroduction biology population establishment prey naivety disease management dispersal the roles of trials and experiments modelling projections assisted colonisation population interchange genetic diversity disease management metapopulation dynamics reintroduced species as ecological engineers the contributions of sanctuary networks and zoos and extensive insights from reintroduction programs This book is aimed at conservation practitioners and researchers as well as conservation management agencies and NGOs Although it is based on Australasian examples it will be of interest globally due to synergies with reintroduction programs throughout the world

Biogeography and Evolution in New Zealand Michael Heads, 2016-10-04 Biogeography and Evolution in New Zealand provides the first in depth treatment of the biogeography of New Zealand a region that has been a place of long enduring interest to ecologists evolutionary scientists geographers geologists and scientists in related disciplines It serves as a key addition to the contemporary discussion on regionalization how is New Zealand different from the rest of the world With what other areas does it share its geology history and biota Do new molecular phylogenies show that New Zealand may be seen as a biological parallel universe within global evolution

Birds of New Guinea Bruce M. Beehler, Thane K. Pratt, 2016-03-29 Gazetteer of New Guinea ornithology by Jennifer L Mandeville and William S Peckover pages 560 632

The Action Plan for Australian Birds 2020 Stephen T. Garnett, G Barry Baker, 2021-12-01 The Action Plan for Australian Birds 2020 is the most comprehensive review of the status of Australia's avifauna ever attempted The latest in a series of action plans for Australian birds that have been produced every decade since 1992 it is also the largest The accounts in this plan have been authored by more than 300 of the most knowledgeable bird experts in the country and feature far more detail than any of the earlier plans This volume also includes accounts of over 60 taxa that are no longer considered threatened mainly thanks to sustained conservation action over many decades This extensive book covers key themes that have emerged in the last decade including the increasing impact of climate change as a threatening process most obviously in Queensland's tropical rainforests where many birds are being pushed up the mountains However the effects are also indirect as happened in the catastrophic fires of 2019-20 Many of the newly listed birds are subspecies confined to Kangaroo Island where fire destroyed over half the population But there are good news stories too especially on islands where there have been spectacular successes with predator control Such uplifting results demonstrate that when action plans are followed by action on the ground threatened species can indeed be recovered and threats alleviated

Wildlife of Victoria's South-West Grant Palmer, Jules Farquhar, 2024-02-01 Victoria's South West is an iconic region of Australia that includes the exceptional landscape features of the Grampians, Gariwerd, the Victorian Volcanic Plain with crater lakes and cones, the forests of the Great Dividing Range and Melbourne and Port Phillip Bay. Victoria's South West supports remarkable wildlife, including some found only in the region, and is recognised as both nationally and globally significant for the conservation of biodiversity. *Wildlife of Victoria's South West* is a comprehensive photographic field guide to the region's wildlife, many of which occur throughout south-eastern Australia. It covers all the mammals, birds, reptiles, and frogs that occur in the region, including on land and in the coastal marine environment. Each of the 432 taxa profiles includes detailed information on identification, range, conservation status, habitat, and ecology, and the local Aboriginal name for the species, when known. An outstanding colour image and regional distribution map is also included for each species. Additional information is provided on habitat types, conservation, and management of wildlife in Victoria's South West, as well as 19 places in the region to visit and view wildlife. Ideal for those who wish to identify and learn more about the diversity of animals found in the region while also gaining an understanding of the distinct role Victoria's South West has in contributing to conserving Australia's stunning wildlife.

Bird Minds Gisela Kaplan, 2015-08-03 In her comprehensive and carefully crafted book, Gisela Kaplan demonstrates how intelligent and emotional Australian birds can be. She describes complex behaviours such as grieving, deception, problem solving, and the use of tools. Many Australian birds cooperate and defend each other, and exceptional ones go fishing by throwing breadcrumbs in the water, extract poisonous parts from prey, and use tools to crack open eggshells and mussels. The author brings together evidence of many such cognitive abilities, suggesting plausible reasons for their appearance in Australian birds. *Bird Minds* is the first attempt to shine a critical and scientific light on the cognitive behaviour of Australian land birds. In this fascinating volume, the author also presents recent changes in our understanding of the avian brain and links these to life histories and longevity. Following on from Gisela's well-received books on the Australian Magpie and the Tawny Frogmouth, as well as two earlier titles on birds, *Bird Minds* contends that the unique and often difficult conditions of Australia's environment have been crucial for the evolution of unusual complexities in avian cognition and behaviour.

The Emu, 2006 **Where Song Began** Tim Low, 2016-09-27 An authoritative and entertaining exploration of Australia's distinctive birds and their unheralded role in global evolution. Renowned for its gallery of unusual mammals, Australia is also a land of extraordinary birds. But unlike the mammals, the birds of Australia flew beyond the continent's boundaries and around the globe many millions of years ago. This eye-opening book tells the dynamic but little-known story of how Australia provided the world with songbirds and parrots among other bird groups, why Australian birds wield surprising ecological power, how Australia became a major evolutionary center, and why scientific biases have hindered recognition of these discoveries. From violent swooping magpies to tool-making cockatoos, Australia's birds are strikingly different from birds of other lands, often more intelligent and aggressive, often larger and longer lived. Tim Low, a renowned

biologist with a rare storytelling gift here presents the amazing evolutionary history of Australia's birds. The story of the birds it turns out is inseparable from the story of the continent itself and also the people who inhabit it. Living in a Dynamic Tropical Forest Landscape Nigel Stork, Stephen M. Turton, 2009-01-26. This book brings together a wealth of scientific findings and ecological knowledge to survey what we have learned about the Wet Tropics rainforests of North Queensland, Australia. This interdisciplinary text is the first book to provide such a holistic view of any tropical forest environment, including the social and economic dimensions. The most thorough assessment of a tropical forest landscape to date. Explores significant scientific breakthroughs in areas including conservation genetics, vegetation modeling, agroforestry, and revegetation techniques, biodiversity assessment, and modeling impacts of climate change and the integration of science into natural resource management. Research achieved in part due to the Cooperative Research Centre for Tropical Rainforest Ecology and Management, the Rainforest CRC. Written by a number of distinguished international experts, contains chapter summaries and section commentaries. *Handbook of the Birds of the World* Andrew Elliott, 2008. Penduline tits to Shrikes. Prólogo sobre la migración de las aves. Más de 6000 referencias bibliográficas. **Birds of Prey of Australia** Stephen J. S. Debus, 2012. Illustrated field guide to diurnal raptors, a bird group that many people find among the most difficult birds to identify. Raptors are popular and iconic birds, important ecologically as well as in legislation. Also provides a brief overview of the biology of raptors and an indication of current state of knowledge on them.
