The Essential Handbook of Denominations and Ministries George Thomas Kurian, Sarah Claudine Day, 2017-03-14 Though the church universal is an ancient institution the contemporary ministry landscape is always changing That s why a new resource with useful information about Christian organizations is needed *The Essential Handbook of Denominations and Ministries* is an easy to use guide to more than 200 of the largest denominations and 300 ministries in the United States The entries for organizations include a brief history and summary a contemporary profile and discussion on doctrinal emphases creeds membership and interdenominational and ecumenical alliances Pastors ministry leaders community leaders and students will find this resource a helpful guide as they seek to understand Christian denominations and ministries **The Marketplace of Christianity** Robert B. Ekelund, Jr., Robert F. Hebert, Robert Tollison, 2008-09-26 Economics can help us understand the evolution and development of religion from the market penetration of the Reformation to an exploration of today s hot button issues including evolution and gay marriage This startlingly original and sure to be controversial account of the evolution of Christianity shows that the economics of religion has little to do with counting the money in the collection basket and much to do with understanding the background of today s religious and political divisions Since religion is a set of organized beliefs and a church is an organized body of worshippers it s natural to use a science that seeks to explain the behavior of organizations economics to understand the development of organized religion *The Marketplace of Christianity* applies the tools of economic theory to illuminate the emergence of Protestantism in the sixteenth century and to examine contemporary religion influenced issues including evolution and gay marriage The Protestant Reformation the authors argue can be seen as a successful penetration of a religious market dominated by a monopoly firm the Catholic Church The Ninety

five Theses nailed to the church door in Wittenberg by Martin Luther raised the level of competition within Christianity to a breaking point The Counter Reformation the Catholic reaction continued the competitive process which came to include product differentiation in the form of doctrinal and organizational innovation Economic theory shows us how Christianity evolved to satisfy the changing demands of consumers worshippers The authors of *The Marketplace of Christianity* avoid value judgments about religion They take preferences for religion as given and analyze its observable effects on society and the individual They provide the reader with clear and nontechnical background information on economics and the economics of religion before focusing on the Reformation and its aftermath Their analysis of contemporary hot button issues science vs religion liberal vs conservative clerical celibacy women and gay clergy gay marriage offers a vivid illustration of the potential of economic analysis to contribute to our understanding of religion
