Beverages Graham H. Fleet, 2006-01-10 Yeasts play a key role in the production of many foods and beverages. This role now extends beyond their widely recognized contributions to the production of alcoholic beverages and bread to include the production of many food ingredients and additives, novel uses as probiotic and biocontrol agents, their significant role as spoilage organisms, and their potential impact on food safety. Drawing upon the expertise of leading yeast researchers, this book provides a comprehensive account of the ecology, physiology, biochemistry, molecular biology, and genomics of the diverse range of yeast species associated with the production of foods and beverages.

Advancing Frontiers in Mycology & Mycotechnology Tulasi Satyanarayana, Sunil Kumar Deshmukh, Mukund V. Deshpande, 2019-10-12 The book provides an introduction to the basics of fungi, discussing various types ranging from edible mushrooms to *Neurospora*, a model system for genetics and epigenetics. After addressing the classification and biodiversity of fungi and fungi in different ecological niches, it describes the latest applications of fungi, their role in sustainable environments, and in alleviating stress in plants, as well as their role in causing plant and animal diseases. Further chapters explore the advances in fungal interactions research and their implications for various systems and discuss plant pathogen interactions. The book also features a section on bioprospecting and is an extremely interesting and informative read for anybody involved in the field of mycology, microbiology, and biotechnology teaching and research.

Extremophilic Yeasts Pietro Buzzini, Benedetta Turchetti, Andrey Yurkov, 2025-10-02 This book presents the latest findings on the biodiversity, adaptation strategies, and biotechnological significance of extremophilic and extremotolerant yeasts. It is a valuable resource for researchers interested in the microbiology of these intriguing microorganisms. The book is divided into three parts: Part I gives an overview of prokaryotic and eukaryotic microbial life in extreme habitats; Part II focuses on the biodiversity, adaptation strategies, and biotechnological applications of extremophilic yeasts, categorized according to the specific limiting abiotic parameters such as thermotolerant high temperature, psychrophiles and psychrotolerant low temperature, acidophiles and acidotolerant low pH, alkaliphiles and alkalitolerant low pH, alkaliphiles and alkalitolerant high pH, halophiles and halotolerant high salinity, osmophiles and osmotolerant low water activity, piezophilic and piezotolerant high hydrostatic pressure, metallotolerant high metal concentration, and oxidative stress-tolerant yeasts; Part III discusses the use of extremophilic yeasts in extreme foods and their biotechnological applications under extreme conditions. It is written for biologists, mycologists, chemists, and all researchers whose field of study focuses on yeast biotechnology.

Food Processing: Strategies for Quality Assessment Abdul Malik, Zerrin Erginkaya, Saghir Ahmad, Hüseyin Erten, 2014-11-05 The aim of the food processing is to ensure microbiological and chemical safety of foods, adequate nutrient content, and bioavailability and acceptability to the consumer with regard to sensory properties and ease of preparation. Processing may have either beneficial or harmful effects on these properties, so each of these factors must be taken into account in the design and preparation of foods. This book offers a unique dealing with the subject and provides not only an update of state of the art

techniques in many critical areas of food processing and quality assessment but also the development of value added products from food waste safety and nanotechnology in the food and agriculture industry and looks into the future by defining current obstacles and future research goals This book is not intended to serve as an encyclopedic review of the subject However the various chapters incorporate both theoretical and practical aspects and may serve as baseline information for future research through which significant development is possible
