Keeves, Ryo Watanabe, 2013-11-11 The aim of the Handbook is to present readily accessible but scholarly sources of information about educational research in the Asia Pacific region The scale and scope of the Handbook is such that the articles included in it provide substantive contributions to knowledge and understanding of education in the Asia region In so doing the articles present the problems and issues facing education in the region and the findings of research conducted within the region that contribute to the resolution of these problems and issues Moreover since new problems and issues are constantly arising the articles in the Handbook also indicate the likely directions of future developments The different articles within the Handbook seek to conceptualize the problems in each specific content area under review provide an integration of the research conducted within that area the theoretical basis of the research the practical implications of the research and the contribution of the research towards the resolution of the problems identified Thus the articles do not involve the reporting of newly conducted research but rather require a synthesis of the research undertaken in a particular area with reference to the research methods employed and the theoretical frameworks on which the research is based In general the articles do not advocate a single point of view but

rather present alternative points of view and comment on the debate and disagreements associated with the conduct and findings of the research Furthermore it should be noted that the Handbook is not concerned with research methodology and only considers the methods employed in inquiry in so far as the particular methods of research contribute to the effective investigation of problems and issues that have arisen in the conduct and provision of education at different levels within the region *Handbook of the Arts in Qualitative Research*, 2022 **Enhancing the Doctoral Experience** Steve

Hutchinson, Helen Lawrence, 2017-03-02 One of the major intangible benefits associated with the postgraduate research experience is precisely that the experience And more specifically for an increasing number of international research students the British doctoral experience This experience is often largely defined and shaped by their relationship with and support from their supervisor Enhancing the Doctoral Experience brings together the authors experience and research frameworks and models as well as pragmatic feedback and understanding This synthesis of scholarly theory and pragmatic sampling has produced a book that provides a scaffold for students and supervisors to have conversations about their expectations to discuss what supervision is to articulate clearly what both parties need in order for a successful relationship to occur and to build a mutually beneficial endeavour In many cases these conversations can be complicated by cultural and linguistic differences so the text explicitly addresses these and other sources of misunderstanding Against a challenging background of growing numbers of students but also increasing pressures on time and costs Enhancing the Doctoral Experience offers an approach to improve the effectiveness of the doctoral student and increase the professionalization of research supervision It does so by providing both with an awareness of and a toolkit to approach student diversity **The Routledge Handbook of**
