EBOOK: Assessment, Learning And Employability Peter Knight, Mantz Yorke, 2003-10-16 What is assessed gets attention what is not assessed does not When higher education is expected to promote complex achievements in subject disciplines and in terms of employability problems arise how are such achievements to be assessed In the first part of the book it is argued that existing grading practices cannot cope with the expectations laid upon them while the potential of formative assessment for the support of learning is not fully realised The authors argue that improving the effectiveness of assessment depends on a well grounded appreciation of what assessment is and what may and may not be expected of it The second part covers summative judgements for high stakes purposes Using established measurement theory a view is developed of the conditions under which affordable useful valid and reliable summative judgements can be made One conclusion is that many complex achievements resist high stakes assessment which directs attention to low stakes essentially formative alternatives

Assessment for learning and employability demands more than module level changes to assessment methods The final part discusses how institutions need to respond in policy terms to the challenges that have been posed The book concludes with a discussion of how institutions can respond in policy terms to the challenges that have been posed Assessment Learning and Employability has wide and practical relevance to teachers module and programme leaders higher education managers and quality enhancement specialists **The Cambridge Handbook of Computing Education Research** Sally A.
