Instructor's Handbook** Norman L. Munn,1948 **A Handbook of General Experimental Psychology: Receptive processes** Carl Murchison,1969 *Instructor's Handbook to Accompany A Laboratory Manual in General Experimental Psychology* Norman Leslie Munn,1948 The Psychology of Early Childhood C.W. Valentine,2015-06-05 Originally published in 1942 this title attempted to trace from their very earliest appearances after birth all aspects of mental development in childhood up to the age of about 4 or 5 It is based largely on the author s almost daily observations of his own five children over a period of some twenty years supplemented by numerous tests and experiments The first purpose of this book was to advance our knowledge of the psychology of childhood The importance of such knowledge had become increasingly recognised Even if not all is completely determined in the first 4 5 years there was little doubt by this time that these first years are of profound significance for future development and the better understanding and training of the young child may be at the root of many of our educational and social problems **Collected Works of C.W. Valentine** C.W. Valentine,2021-06-23 Charles W Valentine 1879 1964 is an important figure in the history of educational psychology Leaving school at 17 to become a teacher he continued to study at the same time gaining degrees from London Cambridge and St Andrews He was professor of education at the University of Birmingham in 1919 until his retirement in 1946 then president of the British Psychological Society from 1947 1948 His research covered many areas including child development imagery mental testing home and classroom discipline Out of print for many years the *Collected Works of C W Valentine* is an opportunity to revisit many of his finest works **Experimental Psychology: Students' manual. pt. 2. Instructor's manual** Edward Bradford Titchener,1901 The general purpose with which this book has been written is sufficiently indicated by its title I have selected a number of the classical experiments of Experimental Psychology and have tried to present them in such a way that their performance shall have a real disciplinary value for the undergraduate student Within this general purpose my aim has been two fold I have sought to show in the first place that psychology is above the laboratory that we employ our instruments of precision not for their own sake but solely because they help us to a refined and more accurate introspection And secondly just as in my *Outline of Psychology* and *Primer of Psychology* I gave the results of

experimentation a prominent place in the psychological system so here I have treated the selected experiments not as separate exercises but as points of departure for systematic discussion PsycINFO Database Record c 2005 APA all rights reserved
