Olsen, 2012-12-06 M HAUG Universite Louis Pasteur Laboratoire de Psychophysi%gie URA 1295 7 rue de Universite 67000 Strasbourg France This varied and impressive volume is a record of the major presentations at the NATO sponsored Advanced Research Workshop on The Development of Sex Differences and Similarities in Behaviour held at the Chateau de Bonas Gers France July 14 18 1992 It is fitting that a meeting evaluating masculine and feminine characteristics was located in the Gascony region immortalised in Alexandre Dumas epic macho tale of The Three Musketeers It is even more satisfying that Marc HAUG the French Director a D Artagnan equivalent was ably assisted by a US French Consortium of three co Directors Drs Richard E WHALEN Claude ARON and Kathie L OLSEN The ARW also provided opportunities to explore the region around the Chateau to appreciate the complex history of the area and to sample armagnac and other local gastronomic creations A lively and varied cultural programme classics to jazz was also provided to maintain the interests and enthusiasms of the participants

The Human Nervous System Juergen K Mai, George Paxinos, 2011-12-13 The previous two editions of the Human Nervous System have

been the standard reference for the anatomy of the central and peripheral nervous system of the human. The work has attracted nearly 2 000 citations demonstrating that it has a major influence in the field of neuroscience. The 3e is a complete and updated revision with new chapters covering genes and anatomy, gene expression studies and glia cells. The book continues to be an excellent companion to the Atlas of the Human Brain and a common nomenclature throughout the book is enforced. Physiological data, functional concepts and correlates to the neuroanatomy of the major model systems, rat and mouse, as well as brain function, round out the new edition. Adopts standard nomenclature following the new scheme by Paxinos, Watson and Puelles and aligned with the Mai et al Atlas of the Human Brain, new edition in 2007. Full color throughout with many new and significantly enhanced illustrations. Provides essential reference information for users in conjunction with brain atlases for the identification of brain structures, the connectivity between different areas and to evaluate data collected in anatomical, physiological, pharmacological, behavioral and imaging studies.

The Human Nervous System George Paxinos, Juergen K Mai, 2004-01-19. This long awaited update of the classic The Human Nervous System stands as an impressive survey of our knowledge of the brain, spinal cord and peripheral nervous system. The book has been completely redone and brought up to date. An impressive and respected cast of international authors have contributed 37 chapters on topics ranging from Brain Evolution, all phases of Brain Development to all areas of the adult brain and peripheral pathways along with careful descriptions of the spinal cord and peripheral nervous system, brainstem and cerebellum. The Human Nervous System, Second Edition will again serve as the gold standard providing a one stop source of up to date information about our knowledge of the human nervous system. This second edition of the standard reference on the human nervous system is extensively and completely revised and updated from the 1990 first edition. Written by the leading researchers, many chapters have been completely rewritten, new chapters have been added. A new section on Evolution and Development provides a broader perspective and all chapters include references and perspectives to neurological disease.
