[Handbook of Economic Growth](#)
Philippe Aghion, Steven Durlauf, 2013-12-20
Volumes 2A and 2B of *The Handbook of Economic Growth* summarize recent advances in theoretical and empirical work while offering new perspectives on a range of growth mechanisms from the roles played by institutions and organizations to the ways factors beyond capital accumulation and technological change can affect growth. Written by research leaders, the chapters summarize and evaluate recent advances while explaining where further research might be profitable. With analyses that are provocative and controversial because they are so directly relevant to public policy and private decision making, these two volumes uphold the standard for excellence in applied economics set by Volumes 1A and 1B, 2005. Offers definitive theoretical and empirical scholarship about growth economics. Empowers readers to evaluate the work of other economists and to plan their own research projects. Demonstrates the value of empirical testing with its implicit conclusion that our understanding of economic growth will help everyone make better decisions.

In August 1985 the 2nd International Conference on Illness Behaviour was held in Toronto, Ontario, Canada. The first International Conference took place one year previous in Adelaide, South Australia, Australia. This book is based on the proceedings of the second conference. The purpose behind this conference was to facilitate the development of a single integrated model to account for illness experience and presentation. A major focus of the conference was to outline

methodological issues related to current behaviour research A multidisciplinary approach was emphasized because of the bias that collaborative efforts are likely to be the most successful in achieving greater understanding of illness behaviour Significant advances in our knowledge are occurring in all areas of the biological and social sciences albeit more slowly in the latter areas Marked specialization in each of these areas has led to greater difficulty in integrating new knowledge with that of other areas and the development of a meaningful cohesive model to which all can relate Thus there is a major need for forums such as that provided by this conference
