Good Guys with Guns Angela Stroud, 2016-06-01 Although the rate of gun ownership in U S households has declined from an estimated 50 percent in 1970 to approximately 32 percent today Americans propensity for carrying concealed firearms has risen sharply in recent years Today more than 11 million Americans hold concealed handgun licenses an increase from 4.5 million in 2007 Yet despite increasing numbers of firearms and expanding opportunities for gun owners to carry concealed firearms in public places we know little about the reasons for obtaining a concealed carry permit or what a publicly armed citizenry means for society Angela Stroud draws on in depth interviews with permit holders and on field observations at licensing courses to understand how social and cultural factors shape the practice of obtaining a permit to carry a concealed firearm Stroud's subjects usually first insist that a gun is simply a tool for protection but she shows how much more the license represents possessing a concealed firearm is a practice shaped by race class gender and cultural definitions that separate good guys from those who represent threats Stroud's work goes beyond the existing literature on guns in American culture most of which concentrates on the effects of the gun lobby on public policy and perception Focusing on how respondents view the world around them this book demonstrates that the value gun owners place on their firearms is an expression of their sense of self and how they see their social environment

Stuff 'n' Nonsense Harry H. Bash, 2011-11 This compilation of my STUFF as George Carlin might have me refer to it includes ruminations essays and frankly spoofs that I wrote during the last decade of the twentieth century through the first decade of the twenty first Admittedly and predictably some of the items betray my long term affiliation with and dedication to the discipline of sociology Throughout my career I succeeded in ignoring Archibald MacLeish's warning not to commit a social science but I did manage to heed his other caution not to sit with statisticians Now in items some of which bear an affinity to sociology I am not above taking liberties that exceed the bounds imposed by professional sociological constraints Thus I commit value judgments I trifle with the ludicrous and I allow myself to be opinionated

Dimensions of Goodness Vittorio Hösle,2014-10-02 Dimensions of Goodness is based on the second conference of the Notre Dame Institute for Advanced Study whose aim is to bridge the normative and descriptive dimensions of knowledge by bringing in as many disciplines as possible to address fundamental philosophical issues While the first conference dealt with the elusive topic of beauty the second addressed crucial issues of ethics In the first section of this volume the German philosophers Franz von Kutschera and Markus Gabriel discuss the nature of values and the reasons why we believe that normativity has a place in the world In the second section the British historian Jonathan Israel the American theologian Jennifer Herdt and the editor of the volume analyse epochal changes in our moral beliefs due to Enlightenment Christianity and the general evolution of moral ideas which is presented in a way that markedly differs from Alasdair MacIntyre s famous account The third section explores both the light that the exact sciences shed on the process of decision making in the

contributions by the Italian neuroscientist Camillo Padoa-Schioppa and the Canadian psychologist Clive Seligman as well as the ethical challenges that modern science has brought forward in areas such as the responsibility of scientists, bioethics and medical ethics in chapters by the Swiss chemist and Nobel laureate Richard Ernst, the American bioethicist and historian of biology Jane Maienschein and the American philosopher and legal scholar Anita Allen. The fourth section focuses on specific challenges of our time: the British philosopher Robin Attfield explores the principles of environmental ethics; the Swiss business ethicist Georges Enderle investigates goodness in economy; the Mexican elder statesman, former Secretary of Economy and of Foreign Affairs, Luiz Ernesto Derbez Bautista looks at the challenges of development; and the American legal scholars Steven D. Smith and Mary Ellen O'Connell examine the place of religion in the American constitution and the power of international law in limiting violence, respectively. Finally, the last section consists of a chapter by the well-known Chinese intellectual Wang Hui on Lu Xun's struggle to find a middle way between respect of one's own tradition and the demands of globalization. There is probably no other volume in which so many different disciplines come together to try to find a convergence of perspectives on basic moral issues. The book will be invaluable to those who believe that goodness is the focal point of most academic disciplines and that academia can find a stronger point of unity in a common reflection on what goodness in various areas means.
