Understanding the Alcoholic's Mind : The Nature of Craving and How to Control It Arnold M. Ludwig Evalyn A. Edwards Professor of Psychiatry University of Kentucky School of Medicine, 1987-11-26 Despite the immense obstacles they face many alcoholics do manage to recover The question is how In this groundbreaking book a doctor with over 25 years experience working with alcoholics gets inside their minds and explains the behaviors and thought processes they use to get sober and stay sober In most instances Arnold Ludwig has found that a lasting recovery can only begin after certain crucial attitude changes Regardless of the motivation of alcoholics

powerful forces lure them back to drink To remain sober alcoholics must recognize these forces and the dangerous frame of mind that fuels them Then they must use a variety of techniques that have been demonstrated to be effective for resisting temptation particularly during the early phases of recovery In time individuals will need to develop a set of attitudes values and behaviors which the author describes in detail that perpetuate and strengthen their sobriety Being sober is far more than simply not drinking it is a new way of life Over the years the author has worked with over 1000 alcoholics from all walks of life and within many different settings hospital clinics Alcoholics Anonymous meetings detoxification centers and private homes about one fourth of whom had quit drinking for significant periods of time Incorporating the findings of other researchers into his own and including many clinical vignettes and personal anecdotes he explores the basic principles necessary for achieving a successful recovery Ludwig has especially concerned himself with the nature of alcoholic craving and loss of control and describes the techniques that can help individuals to conquer their urges and also to lessen the chances of relapse This book does not use the word treatment Instead it talks about what is really at the heart of the matter sobriety and how to achieve it It will give new hope and insight not only to the recovering alcoholic but also to their families counselors and doctors

Recovery Monographs Volume I William L. White, 2015-09-16 The addictions treatment field is reaching a tipping point that is revolutionizing the ways that behavioral health leaders think about people with alcohol and other drug problems and how services and systems are developed Recovery Management Recovery Oriented Systems of Care contains six monographs by renowned recovery advocate William L. White and colleagues

These monographs provide insight and analysis of the topics important to today's addiction counselors and recovery coaches: recovery oriented systems of care, recovery management, peer based recovery services, and treating addiction as a chronic condition that requires ongoing management.

Addiction Is a Choice Jeffrey A. Schaler, 2011-09-30 Politicians and the media tell us that people who take drugs including alcohol or nicotine cannot help themselves. They are supposedly victims of the disease of addiction and they need treatment. The same goes for sex addicts, shopping addicts, food addicts, gambling addicts, or even addicts to abusive relationships. This theory, which grew out of the Temperance movement and was developed and disseminated by the religious cult known as Alcoholics Anonymous, has not been confirmed by any factual research. Numerous scientific studies show that addicts are in control of their behavior. Contrary to the shrill, mindless propaganda of the war on drugs, very few of the people who use alcohol, marijuana, heroin, or cocaine will ever become addicted, and of those who do become heavy drug users, most will mature out of it in time without treatment. Research indicates that treatment is completely ineffective, an absolute waste of time and money. Instead of looking at drug addiction as a disease, Dr. Schaler proposes that we view it as willful commitment or dedication, akin to joining a religion or pursuing a romantic involvement. While heavy consumption of drugs is often foolish and self-destructive, it is a matter of personal choice.

New sections focus on addiction in children, adolescents, adults, and the elderly, and women's health issues including pregnancy. The expanded behavioral addictions section now includes hoarding, shopping, and computer/Internet abuse. Includes access to a Companion website that has fully searchable text.
