The Dynamic Interlanguage Miriam R. Eisenstein, 2013-06-29 Recent work in applied linguistics has expanded our understanding of the rule governed nature of language The concept of an idealized speaker hearer whose linguistic competence is abstract and separate from reality has been enriched by the notion of an actual interlocutor who possesses communicative competence a knowledge of language which accounts for its use in real world contexts Areas of variation previously relegated to idiosyncratic differences in performance have been found to be dynamic yet consistent and lend themselves to study and systematic description Because language acquisition involves the development of communicative competence by its very nature it incorporates variation and systematicity Second language acquisition is similarly variable since interlanguage is subject to the same universal and language specific conventions In addition aspects of the second language have been found to be unevenly acquired and are differentially reflected in particular contexts or settings Yet despite our expanding knowledge this variability is only beginning to be treated in much of the second language acquisition literature This volume presents the work of some researchers and methodologists who have taken on the challenge of including variation in their research designs and pedagogical recommendations Variation is shown to be relevant to linguistic social and psychological aspects of language It is apparent in the registers and dialects of the target language and in the inter language of learners

The Development of Second Language Grammars Elaine C. Klein, Gita Martohardjono, 1999-05-15 This volume is a collection of state of the art papers in generative studies of second language L2 acquisition bringing together an unusually broad range of interests and inquiry Selected papers report on controlled experimental studies within specific areas of research investigating the development of L2 grammars others formulate exciting new proposals for methodology and learnability in both first and second language acquisition Following an introduction which argues for new research strategies that focus on the process of acquisition along with its product the book is divided into two sections Current Perspectives includes compelling new work on the development of functional categories within a parameter setting model of L2 acquisition the second section New Directions introduces research and discussion on topics which reflect the latest developments in the field including syntax semantics correspondences L2 processing research code switching from a UG perspective and applications of Chomsky's 1995 Minimalist Program to second language acquisition studies

Enriching Esol Pedagogy Vivian Zamel, 2002-12-18 Enriching ESOL Pedagogy Readings and Activities for Engagement Reflection and Inquiry is a collection of thought provoking articles and activities designed to engage practicing and prospective ESOL teachers in an ongoing process of reflecting on critically examining and investigating theory and practice Its twofold purpose is to provide a theoretical perspective and to offer ways for making the teaching of English to speakers of other languages ESOL meaningful for both teachers and learners Underlying the activities and the readings themselves is the assumption that teachers need to play a role in exploring shaping and theorizing the work

they do The readings included represent a range of genres They are informed by a common philosophical perspective about language acquisition and treat language teaching and learning holistically The book is organized into five integrated units that raise questions about conventional notions of methods take into account the complicated nature of real classrooms provide theoretical principles for teaching that promotes language acquisition include rich descriptions of actual classroom experiences and question assumptions about language and literacy Each set of readings begin with a Before Reading section and is followed by Reflecting on the Readings Reading for Further Reflection and Suggested Projects for Inquiry sections This volume is a valuable resource for practicing and prospective teachers in the field of TESOL who work with diverse student populations at all levels in both mainstream and ESL bilingual settings Analyzing Learner Language Rod

Ellis, Gary Barkhuizen, 2025-01-06 This book provides a clear and accessible introduction to the main methods of analysing samples of learner language It examines the theoretical and research bases for the different methods and thereby serves as an introduction to the field of second language acquisition research The book is intended for students on postgraduate courses in TESOL or Applied Linguistics or for teachers wishing to do action research to find out more about how learners learn language *Cases on Error Analysis in Foreign Language Technical Writing* Lebedeva, Nadezhda

Anatolievna, 2023-07-21 There is a clear tendency to consider the errors committed by learners in the process of learning a foreign language not as a negative aspect but as a natural process in the development of their language skills In the past teachers and researchers pondered these errors as something unfavorable something to prevent from occurring at all costs In order to regulate this appearance of errors many researchers in the field of foreign language technical teaching have started to study and track the errors made by these students Knowing the most common types of errors is an important and necessary step to inform teachers about where to direct their efforts regarding the most problematic areas students face while producing their technical writing assignments in a foreign language *Cases on Error Analysis in Foreign Language Technical Writing* provides relevant theoretical foundations and the latest empirical research findings in the area of error analysis in foreign language technical writing This book also summarizes the experience of teaching a foreign language for professional purposes in various fields of higher education Covering topics such as error analysis lexical skills and writing outputs this casebook is an essential resource for preservice teachers educators administrators librarians researchers and academicians *Linguistics across Historical and Geographical Boundaries* Dieter Kastovsky, Aleksander

Error Analysis Jack C. Richards, 2015-12-14 The eleven essays in this book cover a wide range of topics from the role of interlanguage and the influence of external factors on the process of language learning to the development of syntax and the methodology of error analysis Collectively they provide a valuable perspective on the learning process which both enriches our theoretical understanding of the processes underlying second language acquisition and suggests ways in which teaching practice may best exploit a learner's skills

Transfer and Interference in Language Monika Bruggemeier, Dietmar Fütterer, 1984 The topic of this bibliography in its broadest sense is the subject of a wide range of academic disciplines Given these circumstances the particular associations and connotations of the terms transfer and interference in each of these areas are legion with resultant differences in meaning in the disparate literature on these subjects And yet it is in one way or another contact and interaction of languages in the speaker hearer and learner in language acquisition contexts as well as in society in general which is basic to these two concepts throughout the various disciplines The discovery of this basic unitary notion is surely one of the reasons for the new interest in these phenomena In light of all this a bibliography cannot at present avoid being highly selective in order to demarcate an interdisciplinary area of research in its own right and with its own status The

establishment of such an area is one of our main aims The focus of interest in this bibliography admittedly is directed towards the psycholinguistics of language contact and interaction

Errors in Language Learning and Use Carl James, 2013-12-02 Errors in Language Learning and Use is an up to date introduction and guide to the study of errors in language and is also a critical survey of previous work Error Analysis occupies a central position within Applied Linguistics and seeks to clarify questions such as Does correctness matter Is it more important to speak fluently and write imaginatively or to communicate one's message Carl James provides a scholarly and well illustrated theoretical and historical background to the field of Error Analysis The reader is led from definitions of error and related concepts to categorization of types of linguistic deviance discussion of error gravities the utility of teacher correction and towards writing learner profiles Throughout the text is guided by considerable practical experience in language education in a range of classroom contexts worldwide

Research in Basic Writing Martin Jacobi, Michael G. Moran, 1990-02-15 This reference handbook surveys research on the central issue associated with the teaching of unprepared writers Though basic writing has only been recognized as a distinct area of teaching and research since 1975 the existing bibliographic texts already seem limited due to their age or lack of annotation This volume provides current and extensive bibliographic essays and will help to define this new field of study for teachers and researchers Following an introduction that summarizes the origins and significant texts in basic writing the book is divided into three sections Social Science Perspectives Linguistic Perspectives and Pedagogical Perspectives The first section which contains three essays views the field through the lens of social psychological and political issues The second section also containing three essays examines contributions made from studies of grammar dialects and second language acquisition The third section in its four essays focuses on the design development administration and evaluation of basic writing courses the use of computers in basic writing classrooms the role of the writing lab and the preparation of basic writing teachers An appendix that reviews current textbooks for basic writing courses is also included as well as an index This book will be a valuable resource for teachers of basic writing in education courses and workshops that train teachers and tutors and in fields such as linguistics technical writing and Teaching English as a Second Language It will also be an important addition to public and university libraries and many education programs
